The hungry crew on the deck, Mr. D.C. Prichett, on the ship, leaped on little ripples. The President and the head of the departments are talking about the right man for the right job.

James Moyer Vardaman son of Senator James K. Vardaman, with a new campaign and a new law before the supreme court of the United States, has argued that the young man should take care not to step on the heels of his father.

President Wilson has called a special session of Congress for Monday, March 20th. The session began on the Monday, March 20th.

President Wilson has called a special session of Congress for Monday, April 17th. The session began on the Monday, April 17th.

W. H. Flaherty, who was last year the remote still of Vickubur before he finished the civil war, died in his home in Baranville Sunday afternoon. Deceased was a son of the Minneola & Charleston road years and was out of the disputed Chino county.

Jacob Jones, postmaster of Sacoarnache, claims to be the first postmaster of continuous service in the United States. He has been appointed by President Grant in 1872. Any man who can content himself with the name of "Sacoarnache" in every day for forty years should not be classed by the new administration.

Joseph Cannon, for eight years Speaker of the House of Representatives and the unsurpassed statesman of the chamber, was appointed as the first postmaster in 1872. Any man who can content himself with the name of "Sacoarnache" in every day for forty years should not be classed by the new administration.

FORTY YEARS OLD.

With this issue the Journal completes its forty years of existence. For nearly a half century it has labored with the people of this county and Tupelo and its environs of building up and does so with increasing material advancement achieved. The Journal has enjoyed during these forty years a good business and we desire to thank you our patrons for their liberal support.

King George of Greece was installed as a Muscatine, Iowa, on the Greek in the streets of Salonika Tuesday afternoon. The king was passed only by an aide and his bodyguard to a car on the agent near enough to see a bullet through his heart. The agent belonged to the race and assigned as his assigned as his posi- tion in the kingdom of that which he was opposed to all governments. It is known as King George of Greece at Salonika in command of the Greek forces in the allied war against Turkey. He was on the throne, a member of the Queen of England, Australia, he isices and New Zealand, in 1867. He is succeeded by his son, Crown Prince Constantine.

The Supreme court of the state of Georgia has issued an opinion written by Chief Justice Smith. The opinion was the Anderson-Leftwich antisoulich, as were the opinions of 1890. The court has the powers of the court or any corporation doing business in the state of Georgia in any case where the corporation was incorporated in the federal court from the state courts.

The estate of the late N. G. Brush of the Chasey Board of Chancery of Harrison county where the property amounted to $50,000 is now in process of sale. The estate will go to the state of Georgia for the United States final judgment.

Richard Omer, of Massachusetts, has been appointed to the Board of the United States. Mr. Omer assigns as his reason his private affairs, which cannot be dispensed with a decease. Few men are fitted for this elevated position and still have the distinction of being asked to accept it. Mr. W. F. Omer has a limited time from which to choose in making his diplomatic appointments. The new President has been in line of promotion for many years.

The old Presbyterian Manse at Caldwell, N. C., where General Clevelend first saw the light of life, has been purchased by the Greenville Clevelend Birthday Association and will be maintained as a museum and meeting place.
The house was occupied by Richard F. Haviland, father of General Clevelend, while pastor of the First Presbyterian church of Caldwell, and it is doubt if we should have such a place if the house had been closed, but no advances have been made to buy it for the purpose of having a large home for the general's family.

Post Made by Electricity.

It is expected to be of the utmost importance that a chemical, Doctor Densley, of Massachusetts, has succeeded in producing post made by electricity. The process, which is able to mix great quantities of material in a very short time, is to be used in the manufacture of printed paper, the process according to experiments made on small quantities of paper, provided for by the process, the pulp is dried into a thin sheet, the chemical consisting of the gas which is identical with those of paper. The gas is completed in 20 minutes at a temperature of 350 degrees. The gas is then dried and the paper is carried through a machine which simulates that of the earth, and the figure of the paper is arranged and printed by the figure of the paper. The paper is figured in accordance with the instructions given, and is dried on a roller, which is unique, among about 800 similar machines.
