

Haste and Waste

Stop and think for a moment the next time you are about to buy soda crackers.

Instead of hastily buying soda crackers that go to waste because broken, soiled or soggy, buy

Uneededa Biscuit

in separate five-cent packages. Soda crackers in large packages soon become broken, stale and unpalatable. On the other hand, Uneededa Biscuit in handy, moisture proof packages are *always* fresh, clean, crisp and whole—not one wasted.

(Never Sold in Bulk)

Now Being Offered
SPECIALLY PRODUCTIVE
10-ACRE GULF COAST FARMLANDS
Price—\$25 an acre and up.
Terms—\$5 a month and up.

This Announcement is Important

and presents a wonderful and altogether unusual opportunity.

It tells you how, for \$25 an acre and up, you can buy from the *Washington & Choctaw Land Co.* the most productive of all farm lands in the United States today in lots of 10 acres or more, and on payments as low as \$5 a month. These lands are located near *Yellow Pine, Washington Co., Ala.* They are lands from which two, three and frequently four crops are produced each year from the same ground, under modern farming methods; where climate, rainfall and soil unite in creating bountiful harvests; where Corn and Cotton are raised to great advantage; where Orchard, General Farming, Market Gardening and Stock Raising is carried on successfully, where Poultry, Bees and Dairying are productive of splendid results, and where Pecans, Peanuts, etc., grow to profusion.

Two New Town Sites

offer an excellent investment opening and homes for winter or constant residence.

ALABAMA FARM LANDS.

Editorial Alabama Baptist, Sept. 28, 1910.

Alabama farm lands are the State's greatest asset. Long after the mines are exhausted, the soil will yet produce those things which are life's real necessities. These lands are still cheap—ridiculously cheap—and those who have the foresight to acquire them now will realize a handsome advance in a few years or leave them as a priceless heritage to their children. The time is not far removed when all lands capable of cultivation in this State will be worth a HUNDRED DOLLARS PER ACRE, while the soil of the rich alluvial prairies and that near the large centers of population will command considerably more. THE TIME TO BUY IS NOW, and there is no better place in the world to make the investment than right here in Alabama.

U. S. Government Helps

In addition to all the natural advantages of these lands, settlers have also the help of the United States Government. The Department of Agriculture maintains at Fruitdale, Alabama—which is located in close proximity to the Washington and Choctaw Lands—an experimental station with salaried representatives in charge, whose business and pleasure it is to advise and assist settlers along lines that will be a material help to them in obtaining the best results. Such assistance is a great boon to settlers in a new district.

Other Facts Briefly Stated

THE SOIL. It is a sandy loam, and without a peer in productiveness.

CLIMATE. The climate is sublime. Situated within 60 miles of the Gulf Coast, and at an elevation of 300 feet above sea level, the gulf breezes make it comparatively cool in summer, while the gulf stream moderates the winters. Out-of-door work goes on twelve months in the year, and there is never any snow.

RAINFALL. The average fall of rain is 69 inches per year, every month having a share. There are no droughts and no irrigation is needed.

HEALTH. Observation and reports by the United States Marine Hospital pronounce it the only section of country absolutely free from local diseases.

WATER. Among 9,000 samples from all parts of the country examined by the University of Illinois, it proved to be the purest of them all.

PEOPLE. This territory is being populated by energetic, red-blooded white men from the North.

MARKETS. There is an unlimited demand for everything the grower has to sell. Railroads run directly through the land and fast trains carry the produce to States North and South with low freight rates and quick service.

NURSERY. We are establishing a nursery, consisting of 320 acres, in the midst of our holdings, which when completed will be the largest nursery in the South. From it we will supply our settlers with all their nursery needs at a big discount.

ORCHARDS. Our nursery department will plant you a five-acre orchard and take care of it for five years if you wish. In many other ways also we are prepared to be of service to you. Your success is our success, in a measure, and we will be glad to help you get properly started.

AGENTS WANTED

We want agents to sell our land in unoccupied territory. Write for terms. We have a good piece of land and we want honest men to sell it for us.

Send for Our Free Booklet

If you were sure you could make \$3,000 to \$5,000 per year from a farm in the Washington & Choctaw territory, would you be interested? We print a 20 page booklet that tells all about this land at \$25 an acre and up, and gives many letters from people who know the land, have tilled it, and who are doing well. Send for this booklet; it is free; a postal card will bring it.
