**Remington PUMP GUN**

Over 50% of the Interstate Handicap winnings for 3 years have been made with Remington Guns.

They have thereby proven their title as "best at the traps"—you can demonstrate for yourself that they are also best in the field.

Remington Pump Gun—best in three important features—hammerless, solid breech, and bottom ejection of shells; the only pump gun on the market having these indispensable features. The solid breech protects the shooter's face in case of defective shells, and at the same time keeps dirt and foreign substances from the working parts located within the solid breech.

Look it over at any dealers.
