

Shake Off That Grip

When Spring comes, with its changeable weather and your exposure, it is best to clear away all the symptoms left after an attack of grip. That evil disease leaves you weakened, and when its victim attempts to "do his bit" he exposes himself to the risk of a second attack, for which he is less prepared, and which may have graver consequences.

There's Danger in Delay

April and May are pneumonia months. In this time a weakened system is a constant source of danger, for the pneumonia and grip infections are in the air, and after a long winter the body is so clogged with waste it cannot resist them. Fortify the health, remove the catarrh, and improve the digestion.

For Quick Relief PERUNA

This reliable tonic is recommended to remove the waste from the body, counteract the catarrhal poisons and allay the inflammation that is catarrh, restore the regular appetite and tone up the entire system to resist disease. A well man is safe.

As a tonic after grip it has won many commendations, while its effectiveness in catarrhal conditions is unquestioned. Take no chances—Take Peruna.

Peruna Tablets are always ready to take. You may carry a box with you and ward off colds and chills. The liquid medicine in your home is a great safeguard. Protect your family.

GIST OF THE NEWS GATHERED HERE AND THERE AND PRESENTED IN BRIEF FORM.

The state council of defense in Maine has set aside \$250,000 to be loaned to farmers.

Wednesday, April 3, was a peak day in sales of War Savings Stamps, when \$4,120,932 was recorded at the Treasury for the day's receipts from stamp sales.

Investigations by the Department of Agriculture in 15 states show that of a total of 6,836,492 sheep, 34,083 were killed by dogs in one year and were paid for by the counties.

Field and garden seed are unconditionally exempted from all embargoes, according to the Department of Agriculture. Instructions are issued to all railroads to do everything possible to expedite the movement of seed.

The Shipping Board plans construction of three launching ways for three 3,500-ton concrete vessels. This type of vessel is still in an experimental stage, and if found successful the board may build 7,500-ton concrete ships.

The order prohibiting the sale of flour in lots of less than 12 pounds has been suspended. Licensed dealers have been advised that they may market several sizes of packages weighing less than 12 pounds, with a 2-pound minimum.

Over 200,000 applications for insurance by officers and enlisted men of the naval service had been filed by March 31. The average amount of insurance on each policy was about \$7,300, making a total of more than \$1,500,000,000. Payments on war-risk allotments are now about \$1,000,000 a month.

In Oklahoma, county councils of defense are securing pledges from automobile owners to furnish transportation to speakers for community councils.

The pledge provides that the chairman of the county council may hire a car at the expense of any signer who fails to furnish transportation at the time promised.

Throughout England 102 daily newspapers have been forced to increase their prices, and 676 weekly papers have followed suit. The monthly magazines selling before the war at 9 cents now cost 16 to 18. The cost of novels and books has largely increased, even the popular and widely sold classes having risen from 50 to 100 per cent.

English market reports show the amount of home-grown meat of all kinds coming to the principal markets has averaged 55,000,000 pounds

LIBERTY BONDS BRING CITIZENS REAL THRIFT

Millions Doing Patriotic Duty Find Themselves Financial Gainers.

Before the government began to issue the Liberty Bonds there were less than 500,000 bondholders in the United States. Now there are more than 12,000,000. Soon there will be many more millions to learn how simple it is to put \$50, \$100, \$500 or \$1,000 into a safe bond that will bring 4, 4½ or 5 per cent as regularly as the year rolls around, besides returning the full amount invested at date of maturity.

There is no risk as in any other kind of investment, and no taxes to pay. An investor that holds a mortgage on a house must bother about insurance, repairs, and must personally collect interest and principal. On a Liberty Bond it is only necessary to tear off a little coupon twice a year, which will be cashed by any bank or trust company.

Moreover, if money is invested in a mortgage on a house, whatever happens, the mortgage stands for one, two, three years, or whatever period was originally fixed. If money is put into a Liberty Bond the principal can be recovered any day in the year.

Therefore, when a farmer, a mechanic, a doctor, a lawyer or any other citizen buys a Liberty Bond he is not only putting money into the one safe investment in the world but he becomes a patriot just as surely as the soldier who shoulders a gun. But he risks nothing, while the man in khaki offers his life a living sacrifice upon the altar of freedom.

The future of the nation depends upon Liberty Bond buyers.

Determining Age of Planets.

A novel idea in estimating the physical condition of planets was put forth by M. Veronnet before the Academie des Sciences at a recent meeting in Paris. He based it upon a calculation of the quantity of water that rocks such as granite and porphyry absorb before becoming perfectly dry.

He said that on the moon all water has been completely absorbed by slow diffusion as the rocks gradually cooled. Venus is still surrounded by a thick layer of vapor, while no water has yet been condensed on the surface of Mercury, this planet being still in a condition in which its geological life has not begun, and consequently no clouds have yet formed on its surface.

M. Veronnet calculates that the rocks of our earth now contain absorbed water which would cover the earth to an average depth of about 400 metres.

Titled Lady as Shoemaker.

It is an interesting fact that, although the women of the United Kingdom have invaded most employments that formerly were followed chiefly by men, the shoemaking trade has not experienced much change in this respect. Yet, something over a hundred years ago, shoemaking was one of the "employments of high society" in London. Lady Sarah Spencer, in a letter to her brother, written about the year 1808, says: "In the evening we divide our time between music and shoemaking, which is now the staple trade of the family. I am today in a state of great vanity, for I have made a pair of shoes—there is news for you. So if all other trades fall I shall certainly establish myself, cross-legged, at the corner of an alley to earn a livelihood in the midst of leather, awls and hammers."

a week since January 1, as against 227,000,000 pounds average for the same period of 1916. The number of cattle coming to market has decreased 65 per cent, sheep 40 per cent, hogs 68 per cent, compared to the same period in 1916.

All airplanes manufactured in the United States for the Army and Navy will bear a red, white and blue ball's-eye of three concentric circles, similar to the insignia of allied planes, on the wings, and vertical red, white and blue stripes on the rudders. These markings were adopted by the joint Army and Navy Technical Aircraft Board and approved by the Secretary of War and the Secretary of the Navy.
