### The Osteopath

has been indicted in Corinth. What for? Because he killed a man? No, just because he cured a few cases that had been given up to die, or go through life carrying a crutch.

Now friends if you are interested in any one that is suffering, investigate the principle upon which osteopathy is based and get a thorough knowledge of it before you condemn or pass it by unnoticed.

Seeing is believing.

## ZEKE CANDLER AND TOM-BIG-BEE.

They're having fun in Congress, just as in olden times. They're not annexing Cuba, or squandering all our dimes. They've laid aside free silver, for the standards an enigma. But they tell me that in Congress, Zeke Candler's found Tom-big-bee.

Who knows not of Tom-big-bee, since Candler made his speech. Must advertise his weakness, no learnings in his reach. John Allen's noted fish pond, has dwindled to a pigmy, since Candler entered Congress, and kindly found Tom-big-bee.

Domopolis is heard of, where lime rocks hang and quiver. Shipping many barrels of cement down the river. McLaurens' quit his turnip greens, his dinings do not rig me, since Candler went to Congress, and represents Tom-big-bee.

Columbus is a mighty Queen, and running many mills. While Fulton sits a magic gem, among historic hills. From Aberdeen to Walker's bridge, across to old time Tibbee, no ice will freeze a Congressman, since Candler's found Tom-big-bee.

The corridors at Washington, are swiftly learning how. As Zeke Candler passes by them, just to make a little bow. And every other Congressman, from mastodon to pigmy, tips his hat to our Zeke, and calls him big Tom-big-bee.

The late Congressman Amos J. Cummings of New York was proud of his career as a printer, and to the day of his death he carried with him always as a pocket piece, which he valued more than the dollars against which it rubbed, the old printer's rule with which he had stuck so many thousand ems of type. Amos was one of the most democratic and approachable of men, and he was always at home to the old "print" who happened this way and was down on his lack. Many and many a time has a five or ten flashed from Amos' most generous pocket to help one of the craft of which he was proud to be a member. When he closed his eyes in death the printers of the nation lost one of their truest and best friends. They know it, and when he was on his deathbed there came every morning from one of the typographical unions of Baltimore a large bunch of fresh and fragrant American Beauty roses as a testimonial of their love and esteem for the man.

When they heard that the Great Foreman of the Universe had called "30" for Amos, there were dim eyes that read the "take" as it was sent to notify the reading world that one of the manliest of men had "crashed his string" and gone to his eternal rest.
