 Individuals may not send samples for analysis, and any such received will receive no attention. Only those samples taken and forwarded to the state chemist by the inspector will receive attention. If samples upon being tested show violations of the law, said Mr. Stewart, "the matter will be placed in the hands of the county attorney in the county from which the sample comes for prosecution. Otherwise there will be no publicity given the oil tests made."

This will soak into the soil about four inches, will start the wheat and oats and will also do good to the grass. About 95 per cent of the wheat in the county is seeded and about 15 to 20 per cent of oats. Only a small acreage of flax is in. Weather conditions after the rain is medium warm. The rain was especially valuable to the fall rye and wheat as before the rain a good many fields were beginning to die out due to the lack of moisture.
