Market Outlook

(Continued From Page 12)

cial broiler and fryer supplies will remain heavy and will keep prices from advancing as much as usual. Storage stocks of chickens to be distributed during the winter and spring are below average, but are ample in view of increased winter production of broilers and fryers.

TURKEYS—Prices strengthened during the pre-Thanksgiving trade but it is doubtful if they will go still higher for the Christmas trade. Remaining supplies are heavy. Storage stocks on Nov. 1 were more than double last year's. The government has been making minor purchases to support prices.

EGGS—Prices will move lower for the next three or four months as more of the new pullet crop comes into full production. October production was 7 percent larger than a year ago, although laying flocks were only 2 percent larger. Production turned upward earlier in the fall than ever before. Storage stocks are less than one-fourth of the 1944-48 average, so that sharp temporary price upturns may occur when fresh arrivals lag because of unfavorable weather. Prices for the better grades probably will sag to the support level by March. It is likely to be about 5 cents a dozen lower than last spring but will be profitable for efficient producers.

POTATOES—A moderate price rise is probable in the next three months. In the last 41 years, farm prices for potatoes have advanced from November to December in about two years out of three, from December to January in about seven years out of eight and from January to February in two years out of three. The advance this year may be less than usual, since the late crop turned out considerably better than expected and is above average in relation to demand. In some sections, growers are holding for the higher support prices of late winter.

Price support for the 1950 crop will be at 60 percent of parity calculated on the new basis and will be about \$1.60 per cwt. compared with \$1.80 per cwt. for the 1949 crop. The commercial acreage allotment for 1950 is 1,138,000 acres, or 7 percent less than for 1949. The production allotment is 335,000,000 bushels, or enough to provide 110 pounds per capita compared with average food use of 108 pounds from the 1948 crop. The 1949 crop was 387,000,000 bushels. Growers must observe allotments, marketing agreements and orders to be eligible for price support.

HAY—Steady to slightly higher prices appear probable during the winter. Nationally, forage supplies, including hay, silage, fodder, fall grazing and crop residues for feeding are near average, but are short in the northeast, dry parts of Montana and the Dakotas, and somewhat short in the Pacific coast states. Hay prices will be extremely high in all areas where shipments are necessary.

CASH GRAIN MARKETS ON NOV. 22:
CHICAGO—Wheat: No. 3 red, \$2.07.

THE MOST WANTED BOOTS IN AMERICA

HYER

The Brand Of Top Quality

Ask your dealer for Hyer Boots or Write Direct for Dealer's Name.

Since 1875 Hyer has been making America's finest boots for dress or hard service. The old West's most skilled bootmakers (4 generations) produce them from ONLY full grain premium leather. Unmatched comfort built right in, smart design, and a long life of service identify them. Our best recommendation stems from the fact that chances are your grandfather, great-grandfather, (father, too) wore Hyer. Any wonder Hyer boots are in such demand?
