DATE SET FOR END OF WAR

November 11 or April 11 is the Prediction Recently Made by a "Soothsayer."

A soothsayer from Zagarabia, who wishes to remain unknown, has predicted the end of the great war toward the end of the year, and he insists that peace will be concluded on November 11. His prediction is based on logical mathematical calculations which he says cannot fail, as proved by past experience of former wars.

In fact the same rule which enabled him to find out when this war is going to end works to perfection when applied to the last Napoleonic war and the Franco-Prussian war of 1870.

The last war against Napoleon started in 1813 and ended in 1814. The soothsayer adds up these two years and divides the total, viz.: 3627, into two numbers of figures each, viz.: 36 and 27. Then adding the two figures of each number, viz.: 3 plus 6 equals 9, and 2 plus 7 equals 9, he gets the ninth day of the ninth month, viz.: September 9, the date when peace was signed.

The same result is obtained in the case of the Franco-Prussian war, begun in 1870 and ended in 1871. In fact, 1870 plus 1871 equals 3741, or 37 and 41, and 3 plus 7 equals 10 while 4 plus 1 equals 5, so that the date of peace was May 10.

Assuming that the present war ends this year then 1914 plus 1915 equals 3829, or 38 and 29; hence 3 plus 8 equals 11 and 2 plus 9 equals 11, and the result is November 11.

Supposing, however, the war lasts until 1916, then peace will be signed on April 11.

The soothsayer does not explain on what his prophecy that the war will end this year is based.—New York Sun.
