

of bread in the past ten years. A large percentage of milk is now used in its composition, whereas ten years ago very little if any was included. This practice has added largely to both the health and food value in bread, in fact it has increased the food value of the average loaf from 25 to 50 per cent over that of a decade ago.

The Royal Bakery is a concern that has kept pace with the baking business in this and other respects. Their equipment is modern and from the time their mixer starts until their bread is wrapped and sealed in wax paper they carefully observe every sanitary precaution.

They feature Eureka bread, which is made from the purest and richest of flour, milk and butter and other ingredients, and which is justly popular in every home in which it has been used. They are just as skilled in the production of cakes, pies, rolls and other bakery products that are baked daily and distinctive in both flavor and taste. They carefully maintain the quality and richness of their products regardless of the cost of materials and other circumstances and their business success can be traced directly to the reputation these products have built up with the public.

This firm is one of Butte's leading bakeries and their products are the equal or superior to any other bakery products baked in Montana. Their business policy is one of co-operation with Silver Bow county people, buying as they do their supplies in Butte whenever possible and thereby supporting home industry. Ask for their products at your store and do likewise.
