Why Farmers are Turning to

for Economical Transportation

In 1922 Chevrolet jumped from seventh to second place in sales of all cars, and to first place in sales of fully equipped modern cars.

Purchases by farmers were the chief factor in this remarkable development.

Farmers want automobiles not only of low first price, but also of low later cost for operation and maintenance.

They want room, comfort, and the ability to stand up under hard conditions.

They find that Chevrolet, fully equipped as sold, is the best value per dollar in the low-priced field, and neighbors tell them it costs less per mile to operate.
