HIGHWAY LEGISLATION

(Continued from Page Two) in a minor degree of broad public service.

c. Mileage that now and likely will continue to accommodate so small a volume of travel, as not to justify the construction investment on 7% System standards.

(5) It is recommended that a Committee be appointed by the Governor, to include at least two members of the Senate and two members of the House, and other qualified persons representative of all parts and all interests of the State, to make a further and more comprehensive study of highway conditions, problems, and finances giving particular attention to the matter of Highway Financial Districts, and to formulate a long-range highway improvement program.

Since Montana is the only State in the Union now operating under the Highway Financial District System, it is recommended that the Legislature study the desirability of continuing or discarding the present established Highway Financial District System. It is recommended that a sufficient appropriation be made for Committee purposes. The Committee so appointed to report its findings and recommendations to the Governor and to release them to the press on or before July 1, 1950.

It is recommended that the Legislature direct a memorial to Congress requesting more liberal Federal highway allocations for Forest, Indian and Federal Lands highway projects, and to increase the

percentage of federal aid to Montana's highway construction program.

In the pursuit of the Committee's studies and deliberations, it has made every attempt to exclude prejudice founded on difference of political views, geographic location, business and personal affiliations.

This report has been compiled and is submitted with only one object in view—to alleviate the distress of our highway program for the benefit of all Montanans.
