DODGE OFFERS 248 TRUCKS IN NEW LINE

Detroit, Mich., Dec. 20—A completely new line of Dodge "Job-Rated" trucks comprising 248 basic chassis models ranging from 4250 to 23,000 pounds gross vehicle weight and up to 40,000 pounds gross train weight was announced today by L. F. VanNortwick, Director of Truck Sales of the Dodge Division, Chrysler Corporation.

Some models of the new trucks will be displayed starting January 7 by Art Brock's Libby Motors in Libby.

A combination of massive strength and smoothly flowing lines is the keynote of styling for the new trucks. They were designed to combine appearance with comfort, safety, performance, economy and ease of handling.

Conventional models can be road-serviced from the left side as the fuel tank, oil filler, radiator filler, and battery are so located.

Dodge has seven different engines to handle the power requirements of its new line. Numerous engine improvements have been made.

Braking systems are larger and improved. Front and rear axles have increased load-carrying capacity. Front springs are longer. Radiator cores have been redesigned to facilitate better cooling. Exceptional improvements have been made in frame construction.
