

THE DAILY BEE. COUNCIL BLUFFS. THURSDAY MORNING, FEB. 4. OFFICE, NO. 12, PEARL STREET.

SOME LEGISLATION REQUIRED

Checks Needed to Prevent the Waste of the People's Money in Justice Courts. COMING COASTING CARNIVAL. Showing Up Querer Money—Labor Meeting To-night—Accident to Fayette Smith—New Suits Against Cocks & Morgan.

Minor Mentions.

Pants to order, from \$5 up, at Reiter's. The Methodist has a social this evening in the church parlors. There are 100 more pupils in the public schools than ever before. Council Bluffs proposes to show Omaha how to run a coasting carnival. The funeral of Mrs. Kingston was held yesterday forenoon and was largely attended. Martin Hughes has been given the contract for plastering the new Episcopal church. The Episcopal entertainment in Masonic hall this evening promises to be highly enjoyable. Justice Aylesworth has sent Mary Mowry to the reform school, her mother being unable to make her behave herself. 'The Irish Lion' and 'Interviewing Mrs. Pratt,' at Masonic hall, Thursday, February 4, remember the date. Admission, 25 cents. Mrs. J. W. Fuller will not entertain the Married Ladies' Progressive Euchre club Saturday evening, owing to the continued illness of Mr. Fuller. The case of Lawson, charged with stealing a watch from L. B. Hicks of Glenwood, was again continued yesterday, but is expected to be heard to-day. Two more telephones are added to the list, John Linder's office, No. 100, and Mrs. J. W. Fuller's, residence, No. 165. Subscribers should add the numbers to their books. The heating apparatus in the w county jail seems better adapted for hot weather than for cold. By the help of stove the inmates are kept from getting frost bitten. A McClure, of Rockford township, yesterday brought in the scalp of a wild cat killed by him, and besides showing his trophy and evidence of his prowess as a hunter, secured the proffered bounty. Mary A. Short has commenced a suit against the Chicago, Milwaukee & St. Paul railway, claiming \$100 damages on the ground that the company has run a truck through a portion of her lot on Thirtieth avenue. City warrants were selling readily yesterday for 80 cents on the dollar, and some claim to have got so high as 85 cents. An attempt was made by some to buy warrants in at 78 cents, but no seller could be found, and many would not sell at 80 cents. Adelaide Moore, supported by an excellent company, appeared at the opera house last evening in 'As You Like It.' A very enjoyable entertainment was afforded all present, and the merit of the company will cause a still larger number to attend this evening at the presentation of Romeo and Juliet. The relief fund has been about exhausted, and a large number of needy families have received no relief. The committee who have expended the money will make a detailed report as soon as the work is complete, showing that the generous giving of the citizens has been followed by wise distributing. The agitation of the question of a union depot for Council Bluffs is one which ought to be kept up until something is accomplished. The transfer is so far out of the main part of the city as to be really no union depot at all. Many advantages would be gained by the city if it had a union depot centrally located, and the public would be greatly inconvenienced. S. S. Keller's elegant new residence had a narrow escape from being burned Tuesday night. The water pipes in the water closet had frozen, and water from a gasoline stove was ignited. While the family were in a distant part of the house the above exploded, knocking out the windows, throwing open several doors, and scattering flames about very recklessly. The fire department was called, and the loss not being more than \$20 or \$30. A sad Ending. The many friends and acquaintances of Fayette Smith of Marysville, Mo., will be shocked to learn of his sudden death. He has been in the grain business there for some time, and was putting in some scales near there, when by some accident he was killed suddenly. Mr. Smith was best known among the horsemen, as he took great interest in the meetings here. He became widely known as being the owner of Richwald, the wonderful pacer, whom he brought out and afterwards won for a large sum of money. The cause of the accident by which he lost his life is not known beyond what is stated above. Cramorous Creditors. A number of additional suits were commenced yesterday against the firm of Cooke & Morgan, but they were straight suits and not attachments. The creditors thus pressing their claims are as follows: Brown, Durrell & Co., Boston, \$ 576 Folwell Bros. & Co., Indianapolis, " 305 Hotel Bros. & Co., New York, " 430 Worcester Carpet Co., Worcester, Mass. 49 D. C. Bloom, Council Bluffs, for rent. 180 Total \$3,001 Beyond these new suits there is little change in the situation of the unfortunate firm. Thanks to Omaha. At the regular meeting of branch No. 284, C. K. of A., February 2, the following resolution was passed: Resolved, That we hereby thank our sincere thanks to branch No. 292, C. K. of A., of Omaha, for the kind invitation to attend the lecture by the Right Rev. Bishop O'Connor, in Boyd's opera house, January 24, and for the many courtesies extended us while there. PETER WIS, President. P. J. EMIG, Secretary. Personal Paragraphs. O. W. Hays left yesterday for St. Paul, Minn. He will return Monday. Colonel Baker of Birmingham was in the city yesterday looking up coal interests. Professor McDermid of the institution of the deaf and dumb is still confined to his home by an illness, which is proving to be of quite a serious nature. W. L. Foster, the station editor, was in the city yesterday. Presiding Elder Smith returned yesterday from Blanchard. STRAYED or STOLEN From my farm one span of dark brown mares, one light mare, one horse, the other a mare—the mare having been kicked on her leg which was swollen. Any person finding or giving information of same will be amply rewarded by J. J. Browns, Seventh st., Council Bluffs. Meeting of Labor. A grand labor meeting will be held by the Ninth District Protective assembly, corner of Pearl street and Fifth avenue, Thursday evening, February 4, at 7:30 o'clock. Dr. F. S. Lewis, of Nebraska, will address the meeting. Everybody invited.

T. Lindsey, W. F. Sapp, Jr., Ed. Cook, J. C. Bixby, H. Leman, Joe Kintz, W. A. E. J. Steinkopf, Gus Bernheim, Frank Guannelli, Bert Evans, Will Gronewag, Adolph Beno, Phil Arnau and Charles Marshall. Committee on Music—Nick O'Brien, Ed. Becker, Ed. Cogley and L. A. Weber. Committee on Transportation—M. B. Brown, N. B. Olds, Vick Keller, Fred Davis, J. T. Hurley and Nate Phillips. Committee on Invitations—Spencer Smith, George Hughes, Judge James and Will Hardin. Another large meeting was held last night at which it was decided to have the carnival Wednesday evening, February 10. It was decided that all the committees would meet at the city hall Friday evening to complete arrangements. Substantial abstracts of title and real estate loans. J. W. & E. L. Squire, 101 Pearl street, Council Bluffs. Money to loan by Forest Smith. Querer Money. N. E. Leaman has in his possession a very odd gold coin. It bears upon its face the name of Clark, Gruber & Co., Denver, an eagle, and 'Ten D.' On the reverse side are thirteen stars, the head of the goddess of liberty, the name Pike's peak, and the year 1861. The coin is really gold, and is about the size of a ten-dollar gold piece, though its valuation is placed at 50 cents more. George R. Beard has in his possession an excellent specimen of the old colonial money, the little bit of paper with its red printing being all that remains. Its safety at this stage is, however, to some extent guaranteed by the action of a strong spring which prevents the rod from being driven back by any force short of a thousand pounds. A charge of twenty pounds of powder is all that is thought necessary for propulsion, and, this being behind the projectile, the breech is closed and the gun is ready for firing. The only other requisite is something to aim at, and when a hostile ship can be got within convenient distance, the monster gun lets fly. It is asserted that a range of 300 yards under water may be relied upon, but is considered doubtful whether the shot can overcome the resistance of the water and retain effective striking power for half the distance. The inventor, however, has tried his device, and he says he ought to know. He preserved the lateral position and uniform depth of his marine missile by weighing it to the gravity of water, and while he keeps one side under by the preponderance of weight, he has a steering vane on the upper side which opens only after leaving the mouth of the gun, and acts as a rudder in keeping the projectile in its course. Until the gun is tried the authorities are loath to express an opinion upon it. It is regarded at least as an honest attempt to establish a new principle in gunnery, in which it is quite unlike the wonderful breechloaders which were obtained from America during the Crimean war, and which were constructed for at 800 much per pound, and sent in with such a mass of metal piled upon them that they were too heavy to be moved or to work, and have never been fitted to this day.

A Good Thing to Treat Friends With.

N. Y. Tribune: 'Loaded' cigars, as instruments of mild provoking torture, are liable to come into more general use among practical jokers on account of a new method of manufacture which lessens the danger of the explosions. A small charge of powder is put in the middle of a cigar was able to furnish a large amount of hilarity, but it was liable to damage the eyesight of the unsuspecting smoker who had been selected as a victim by the jokers. Serious accidents, followed by suits for damages, made the old style 'loaded' cigar unpopular. When a man who had been known to indulge in fun at the expense of his friends offered a cigar as a gift, he was at once recognized as a practical joker, and such questions as 'Will it go off?' or 'Which way shall I point it?' A man with a reputation as a joker could keep a box of cigars open in his office with safety. His friends were sure to ask him what articles laid exposed in such a tempting way were dangerous to fool with. Recently some manufacturer has adopted a method of 'loading' cigars of a certain brand with a small quantity of which takes fire soon after the weed is lighted. There is no sudden explosion which shatters the wrappers and sends fragments of burning tobacco in all directions, but from the end of the cigar a stream of fire shoots out to a distance of about three feet in a direct line. It makes a man look for a few seconds as if he was a gas tank and held a piece of broken gas pipe in his mouth. The man who takes the cigar is sure to keep still and let the cigar sputter away. To hold the weed firmly in the teeth at such a moment is a better test of a man's nerve than to hang on the end of a burning cigar. The danger to the smoker is not that the cigar will start a conflagration if he attempts to smoke indoors. In one department of the city government the clerks have found much amusement lately in taking out of the new brand and waiting for the displays of pyrotechnics. They suddenly abandoned that form of diversion a few days ago on account of an unexpected accident. One of the clerks took a cigar to an official, but it had been consigned to the official's pocket until a more convenient time for smoking. That time came when the official got on the front platform of a street car. A stray spark from a light from a stout German, two heads were close together and the official was sucking the fire from the end of the German's half burned weed, when the weed was a fizzle like that which attends the flight of a skyrocket. A stream of fire played directly into the German's face, scorching his cheek and obliterating one large red side-whisker in an instant. The German jumped off the car with a howl of anguish. He was followed by the astonished official, who began to make an apology. 'You make one big joke,' screamed the German, 'but I hit you arrested.' The official was obliged to show his shield and give the name of the clerk who had furnished the obnoxious cigar before the German would believe his explanation. A day or two later the clerk received a letter from the German's lawyer stating that a suit for damages had been authorized. Fearing that his position in the department would be forfeited if the facts came to the notice of a commissioner, the clerk made haste to settle the matter. A sum of money which was needed in the clerk's pocket to pay the German's outraged feelings made a big hole in the clerk's monthly pay. Warned by his experience, the other clerks have since been experimenting with cigars 'loaded' only with tobacco smoke from rubber combs. The fumes of burning rubber mixed with tobacco smoke have turned the stomach of several case-hardened smokers.

THE LOADED CIGAR.

St. Louis Globe-Democrat: The loaded cigar had its day in court yesterday, and much to the disgust of everybody came out victorious. The circumstances under which it got into court are as follows: About two months ago, a young man named Nolte, who clerks for his father, John Nolte, proprietor of a wholesale and retail cigar establishment at 310 Vine street, sold John Huseh a pack of cigars which were not made by two cigars. When Mr. Huseh had concluded his day's work and partaken of his supper, he lit one of his cigars and was proceeding to read a newspaper when a puff of smoke from the pipe came up to his knee. His wife came up and took a seat at his knee. She had scarcely taken her seat when a flame about a foot long shot out of the cigar accompanied by an explosion which lit the wife and set her hair on fire, and two days afterwards a miscarriage followed. She and her husband then brought suit against the senior Nolte for \$3,000. Young Nolte testified yesterday that he sold Mr. Huseh two cigars for two cents. He said that he had seen a loaded cigar could always be detected from the fact that there was a hard substance in it about an inch from the end. He was intimately acquainted with Mr. Huseh, and gave him a cigar. His father had instructed him not to sell such cigars without imparting their character. Other evidence followed, and when plaintiff had concluded his side of the case the defendant asked for an instruction to the effect that under the evidence the plaintiff was not entitled to recover. The court gave the instruction, and a non-suit followed. It was afterwards ascertained that the court acted upon the theory that the acts of young Nolte, under the circumstances above stated, could not bind the elder Nolte.

A SUBMARINE GREAT GUN.

What Capt. Ericsson Has Constructed for the British Government. London News: The special wonder at the royal arsenal at Woolwich is just now a monster weapon intended to fire projectiles or torpedoes under water. It is the invention of Capt. Ericsson, the well known scientific American, and it was made in the United States, partly under the supervision of Lieut. Gladstone of her Majesty's navy, who was sent over for the gun and has now brought it to England. It reached the arsenal only this week and now lies at the inspection branch of the royal ordnance factories, whence, after some preliminary tests, it will be sent on board ship, probably at Portsmouth, for trial at sea. The cannon and the projectile are almost of equal length, and, as they lie side by side, painted a bright red, are formidable objects to look at. No fewer than forty tons of steel are used in the construction of the gun, which is thirty feet long, and has a bore of eighteen and one-eighth inches. It is a breechloader, and closed at the stern by an arrangement of a very simple and effective character much resembling that of the great guns which were displayed at the invention exhibition of last year, which is axial, is sealed, and said to be effectual in preventing the escape of powder gases. The projectile measures twenty-five feet, which is only five feet less than the gun, and is graced to pass freely along the bore, while the latter is surmounted by its hollow, and notwithstanding its great length weighs only one ton. The proposal is to fit the gun in the bow of a ship nine feet under the water line, so as to fire straight ahead from the end of the water. A diaphragm of India rubber is fixed over the muzzle to exclude the water, but it is blown away at the first puff of the discharge. The projectile is inserted from the rear and is stopped by a pin a few inches short of the diaphragm, for it has a short rod projecting from its nose, which is to act by percussion on the charge within, and must be protected from all external pressure. The gun is so safe at this stage is, however, to some extent guaranteed by the action of a strong spring which prevents the rod from being driven back by any force short of a thousand pounds. A charge of twenty pounds of powder is all that is thought necessary for propulsion, and, this being behind the projectile, the breech is closed and the gun is ready for firing. The only other requisite is something to aim at, and when a hostile ship can be got within convenient distance, the monster gun lets fly. It is asserted that a range of 300 yards under water may be relied upon, but is considered doubtful whether the shot can overcome the resistance of the water and retain effective striking power for half the distance. The inventor, however, has tried his device, and he says he ought to know. He preserved the lateral position and uniform depth of his marine missile by weighing it to the gravity of water, and while he keeps one side under by the preponderance of weight, he has a steering vane on the upper side which opens only after leaving the mouth of the gun, and acts as a rudder in keeping the projectile in its course. Until the gun is tried the authorities are loath to express an opinion upon it. It is regarded at least as an honest attempt to establish a new principle in gunnery, in which it is quite unlike the wonderful breechloaders which were obtained from America during the Crimean war, and which were constructed for at 800 much per pound, and sent in with such a mass of metal piled upon them that they were too heavy to be moved or to work, and have never been fitted to this day.
