The Happiest Boys.

A Chicago youth of 19, blind from early childhood, experienced the sensation of restored sight on Christmas eve and shouted with a joy he scarcely could express. A St. Paul boy who lost his legs received a pair of artificial limbs for a Christmas present and exclaims that he is the happiest boy in America, with the richest Christmas gift.

What a priceless heritage is an unimpaired body with all natural powers and faculties intact! But it sometimes seems to require affliction to make us duly appreciative of the blessing. Here is this poor boy, permanently deprived of his natural limbs shouting in ecstasy over the gift of unnatural ones, while thousands of other boys with two sound legs that bear them swiftly wherever they wish to go, find something to make them unhappy, which means ungrateful.

What would the crippled boy not give for his own feet and legs again? And the lesson is applicable to the old as well as the young—Omaha Bee.

Dining Room Cranks.

The waiter became talkative after he had answered a question and among other things said: "Don't go to the tummy ward at Bellevue if you want to study cranks. Get a job as waiter. The man who just went out is a steady. He's all right except for coffee and bread. He must have his coffee boiling hot, and he always puts a lump of ice in it. He has always paid for special hot bread. He gets a small loaf, cuts it in two, removes all the crumb part from one half and eats the crust. The other half he leaves untouched. I have a 'regular' who puts salt and pepper on his grapefruit, and"—"He could be talking yet," said the man who related the story, "if I hadn't told him that I was a crank on being served quickly."—New York Tribune.

Locating the Poles.

Both Peary and Amundsen made allowances in determining the site of the poles. Their position is not perfectly constant, there being a counter lock elliptical movement of some thirty feet and a counter clock circular movement of some twenty-six feet in diameter in a period of 428 days at the extreme axis of the earth. This change, however, is so slight as not to be reckoned in practical calculations. Peary and Amundsen made no guesses, but took several observations from various standpoints to determine conclusively that they had reached the poles.—Christian Herald.

A Curious Case.

In 1888 Janos Meryessi, who was eighty-four years old, jumped off the suspension bridge at Budapest into the Danube. He was rescued and then explained that he wished to end his life, as he was becoming too decrepit to support his father and mother. This statement proved to be true. Meryessi's parents being aged 115 and 110 respectively, and a public subscription was organized to set all three above want.

Champion Lighting System.

You will not find a better lighting system in western Nebraska than the system Mr. Gus F. Meyers has in his home in South part of the city. Acetylene, the finest light in the world for the home. Artificial sunlight, is what it is. No light will equal it in cheapness for the candle power of light obtained. It is easy to care for and can be made as convenient as electricity.

Just the thing for the well to do farmer or the people living in small towns and not bad at all for North Platte people. Until I get in my new Garage, along side of Ritners, I will make Ritners feed store my headquarters.
