917-921 O, OPPOSITE POST OFFICE.

New Idea Patterns, any style, **10C**

rumors that Shaw is soon to be retired from the cabinet, because Teddy is tired of him.

The Country Gentleman is one of the numerous so-called agricultural papers which the moneyed interests took under their wing and held up by bank advertisements and in other ways so well known. It now says: "Even though millions of acres could be made to produce bountiful crops by irrigation, there is no necessity for them at this time. In fact, to open them up to cultivation would be a national calamity, and our farmers should strenuously oppose every attempt." There is plutocracy for you. To make happy homes for millions of hard working people would be a national calamity! It would relieve the congestion of the great cities and have a tendency to raise the price of labor. That, the capitalists don't want. It would tend to feed the starving of Europe and make the wretches who toll there more independent, so it must not be done.

It is said that the duties of the family doctor in New York has been reduced to the point that all he has to do is to come in when there is sickness and tell the pater familias what specialist to send for. And the services of specialists are so costly that it bankrupts the ordinary family to employ one of them.

Tuesday made the fourth successive

day of cross examination of John Mitchell by the eminent railroad attorneys before the strike commission. Although Mitchell showed signs of fatigue, not once did the railroad attorneys succeed in weakening his testimony. Finally Wayne MacVeagh said in a petulant tone, "You make the best witness for yourself that I ever confronted." Anyone knowing the least about the science of evidence knows why—John Mitchell had firmly kept to the truth in all his testimony.

The Reading railroad has answered the complaint filed by Editor Hearst with the interstate commerce commission, denying that it is in any way violating the law.

The Reading railroad has issued a circular announcing that on November 1 the wages of its employes "will be equalized with those paid by railroad companies in this vicinity"—probably a 10 per cent increase for doing 50 per cent more work.

President Gompers in his address before the American federation of labor scored President Elliot of Harvard for calling a strike-breaker a hero, Gompers believing that a strike-breaker is "an economic outcast."

Eleven aldermen in Denver have been cited for contempt and arrested at the instance of District Judge Mullins for voting for an ordinance granting a franchise to the Denver city

tramway company after they had been served with an injunction forbidding the passage of the ordinance as drawn.

Poor Teddy. After days of trying he failed to get even a shot at a bear during his recent hunt at Smedes, Miss.

A. M. Lesser, a special agent of the government land department, was in Omaha a day or two ago and declared that Col. Mosby's sensational stories about fraudulent homestead entries in Nebraska are simply "hot air."

Citizens of South Omaha are agitating the question of a charter revision this winter.

Congressman Stark of the Fourth Nebraska district has gone to Washington to attend a conference on the militia bill which is now pending. He takes his defeat philosophically.

Beyond a doubt the tendency of an indirect tax, especially a tariff on imports, levied with a view to "protection," is to create consolidation and combination. But The Independent cannot agree that this is the only factor in building up trusts, or, in fact, the most potent. Given, two manufacturing concerns both protected by the same tariff—why should one kill off the other? Why should one absorb the other? Suppose originally one has

twice the capital of the other—will mere mass of capital do the work? The Independent does not believe so. In this it is supported by such economists and sociologists as Professor Ely. What, then, does give one the power to ruin and absorb the other? Chiefly an advantage in facilities for distributing its products. In other words, railroad freight discriminations. The "Single O" at Monte Carlo does not prevent an occasional plunger from winning—but it gives the "house" a percentage of advantage which in the long run ruins everybody else.

The "lily whites" of the south got a body blow when the president removed from office Julian H. Bingham, collector of internal revenue for the district of Alabama, for expelling fully qualified and registered negroes from the state convention of the republican party of Alabama. There are a few hundred colored men in Alabama who, notwithstanding the provisions of the new constitution which was designed to exclude most of the negro vote, are entitled to the franchise. It was men such as these that the southern republicans drove out of the convention and arbitrarily erased their names from the list of delegates. This action shows that these southern republicans are true sons of the old gang of carpet-baggers who went down there just after the war and proceeded to add several degrees to General Sherman's definition of war.
