

### SANITY AND DEFENSE

President Says These Are Great Factors in Solving Present Day Problems.

Oyster Bay, L. I.—President Roosevelt delivered a Fourth of July oration to his townspeople in a natural amphitheater in a grove at Oyster Bay. Addressing his auditors as "my friends and neighbors, you among whom I was brought up and among whom I have lived for so many years," the president said it was a great pleasure to be here and say a few words of greeting and in a sense to give an account of his stewardship. Mr. Roosevelt said that while there were two or three things which he wanted to talk about, he would take for his text the words of Abraham Lincoln just after his election:

"In any great national trial hereafter the men of that day as compared with those of this will be as weak and as strong, as base and as good. Let us therefore study for the future." And later: "So long as I have been here I have not planted a thorn in any man's bosom."

Speaking on the conditions at the time when Lincoln spoke these words, the president said it was possible for Lincoln to say with entire truth that he bore no rancor and did his work without hatred to the doer of evil.

Lincoln did not treat anything that was done against him as a wrong calling for vengeance, but for a demand, and it is in just that spirit, the president said, that the American people must approach their problems of today. "We have not as great problems as Lincoln had," he said, "but we have problems and the way we face them will leave our children cause for pride or for shame. If citizens of Lincoln's time had not done their duty we could not have held up our heads today." (Hear, hear, came from the assembled crowd).

Prof. M. G. Rohrbough, president of the Omaha Commercial College, says:

"We are in the midst of a very prosperous era. The demand for high grade help is an infallible barometer that registers not only the necessities, but the expectations of business men. In more than twenty years of constant contact with employers, I have never known the demand for competent young people to be so large. We cannot begin to supply our requests for strictly first class stenographers and bookkeepers. The most notable thing about these requests is that employers are more exacting in their requirements than they used to be, but while they exact more they are willing to pay more.

"The demand for young lady stenographers is large, but the requests for thoroughly competent male stenographers is unprecedented. Last year was the largest in our history. We expect a very large enrollment this fall. Fortunately, we are now in our large, new building, and have ample room for the future.

"To an outsider, running a commercial college may seem an easy proposition; I have found it a strenuous one. The responsibility of caring for a large number of young people is very great; while it brings many pleasures it imposes some burdens. The ambitious ones never give us serious trouble but the sluggards often do. Happily, we do not have many of

# PE-RU-NA KEEPS THE FAMILY IN THE BEST OF HEALTH.

### This is Only One of a Million of Homes in Which Pe-ru-na Has Been a Blessing. Read This Family's Glowing Testimony.

BABY GERALD

"We Call Gerald Our Pe-ru-na Boy. He Is In The Finest Health."

MRS. H. S. CAMPBELL

MR. HENRY S. CAMPBELL.

Peruna—Once Used In The Family, Becomes a Permanent Fixture.

Mr. Henry S. Campbell, 1737 S. Williams St., Denver, Col., State Deputy of Modern Woodmen, Montana, and Delegate of Builders Trades Council, writes: "Peruna has been a blessing in our home. My wife was in poor health for several years and nothing but Peruna helped her. She gradually recovered her health and became the mother of a boy which blessed our home. We call Gerald our Peruna boy. He is in the finest of health and his mother has never enjoyed such excellent health. "I have personally found Peruna of great value to me while travelling. Getting irregular meals and often poorly prepared food ruined my stomach, but Peruna toned up my digestive organs and brought fine health to me. "We are never without Peruna in our home and know by experience that it keeps us all in the best of health."

#### A RECENT LETTER.

A recent letter received from Mr. and Mrs. Campbell is, as follows: "We still use Peruna and in addition to our son, Gerald, who is a fat and

saucy lad of 28 months, we have another son, still larger for his age. He is now ten months old and is always healthy.

"His mother says Peruna has surely made both of our children as healthy as

they are, helped, of course by Colorado's healthy air.

"A bottle of Peruna is at all times a welcome visitor to our home."

A multitude of families have discovered that Peruna is their standby.

In all the catarrhal ailments which are likely to beset the various members of the family, Peruna is the remedy that brings quick relief.

No matter whether it be a catarrhal condition of the head or lungs, or a derangement of the stomach and bowels, Peruna is the remedy.

the latter kind. You newspaper fellows need not think you have all the work. I am willing to concede that you have lots of money."

The Omaha Commercial College has an ad in our advertising columns this week.

#### THE PECTORAL FINS

Without Them the Fish Would Stand on Its Head

The pectoral fins of a fish are the two fins, one on each side, just back of the head. These fins aid the fish to some extent in swimming. They are small oars which the fish feathers very beautifully and are of value chiefly to preserve its equilibrium. It is with these fins that the fish maintains its horizontal position in the

water when not swimming. Without them the fish would stand on its head. Sometimes a fish loses one or both of its pectoral fins by disease or by accident. A fish without pectoral fins is in a bad way.

While most fishes keep a horizontal position in the water when not swimming, there are fishes that do not. One of these fishes is the filefish, which when motionless suspends itself in the water, head downward, at an angle of forty-five degrees or even nearer the perpendicular. A filefish kept in an aquarium which had lost both its pectoral fins inclined over backward past the perpendicular when motionless to about the same angle that it would have kept in the other direction if its pectoral fins had been intact, so that when not in motion

it seemed to be lying at an angle on its back.

#### There Are Others

"If I had my way," growled old Tightfist, as he opened his morning mail at the breakfast table, "I'd have a sign placed on every letter box in the city."

"What kind of a sign," queried his wife.

"One reading 'Post No Bills,'" answered the old man.
