MASSACHUSETTS AGRICULTURE.

Among the stock exhibited at the Agricultural Exhibition at Brighton, on Wednesday last, was a fat ox raised by J. L. Boylston, Princeton, 8 years old, weighing 2451 lbs; a bull calf 7 months 9 days old, weighing 673 lbs. and several other fine cattle raised by the same gentleman; a handsome ox, weighing 2086 lbs. raised by Nathan Groat Smeburne; a bull raised by Benjamin Harrington, Princeton, 3 1/2 years old, weighing 1750 lbs. another of Silas Conant, Concord, 18 months old, weighed 1060 lbs; another of Thomas Leonard, Watertown, 2 years 5 months old, 1512 lbs. Fine bulls and other cattle were also present, owned by other persons.

David Buttrick, jr. of Concord, had in one pen a cow and two pair of handsome twins, which she had added to her owner's stock within 18 months.

Solomon Thayer, of Braintree, exhibited some straw and grain, from chance-imported seed, called by some Siberian oats, heavier than rye. It was a bushel and two quarts, planted on one square rod, produced at the rate of 80 to 100 bushels the acre.

Some fine specimens of silk were exhibited by J. R. Cobb, Dedham, in single and double cocoons, in the different stages of maturation, and also made into elegant fringe tassels, combined with worsted.

Among the vegetables exhibited, were a beet from Samuel Clapp, Jr. esq. of D. Chester, 2 1/2 feet in circumference and weighing 17 lbs; an English Turnip, from Isaac Hastings, Lexington, which girt 36 inches, and with the top weighed 1 1/2 lbs; a Russian Radish, from J. P. Prince, Jamaica Plain, weighed 19 1/2 lbs; some tremendous carrots, from R. Sullivan, Brookline, weight not stated; and a bunch of a pear tree on which the pears hung as thick as berries upon a bush, from J. Roney, Charlestown.

The premium of \$100 offered to any approved lot of 300 lbs of butter, was not awarded, there being in the estimation of the judges, no lot sufficiently excellent to justify the award. This deficiency was, however, probably owing to the lateness of the period when the premium was offered; some good butter and cheese was however exhibited, and sold at auction.

Among the rare productions particularly worthy of note, were several Lemons of immense size, from the green house of the late Hon. Timothy Bigelow, of Medford. The largest of these lemons was seventeen inches in circumference, and weighed a pound and three quarters. In a note accompanying them, the tree was stated to be 40 years old, and 12 feet in height, and to have borne 300 lemons of nearly the same average magnitude. We had the satisfaction to see this prodigious tree some weeks ago; the limbs, although large and healthy, were not sufficient to sustain the immense burden of fruit; it was necessary to apply artificial means to keep the tree from dropping to the ground. We regard it as one of the most rare arboral curiosities that we have seen.

New Threshing Machine.—We have been highly gratified with the operation of a new threshing machine, invented by Mr. Warren, of New York, which may be seen for a few

days at Messrs. Sinclair & Moore's Agricultural Implement and Seed store. It is upon a very simple plan, and occupies not more room than a common wheat fanning machine; it is not subject to get out of order; and what is a great recommendation to it, its cost will not exceed 35 or 40 dollars. With this machine, one horse, with proper attendants, can thresh one hundred bushels of wheat a day. We have seen it operate, both by water and hand power, and have no doubt that it will perform that much work. It threshes as clean as the hand flail, and the straw is sufficiently regular for cutting. *Am. Farmer.*

Among the productions of the American loom we have scarcely seen any article that surpasses in usefulness a species of flannel made entirely of cotton. Mr. John Waters, of this city, presented us, a few days since, with a piece of this truly excellent manufacture, of his own make, that richly deserves notice.

The cloth appears to have been woven with a twill, in the usual manner of cotton fabrics, and afterwards to have had a nap raised on one side only. In warmth, this cloth appears to equal the finest double ended English flannels; and in delicacy of texture, it is not surpassed by the softest beaver that the harter uses.

The delicacy and warmth of this manufacture, will recommend it to general use in families; and especially will it find favor by the price at which it may be sold, and its great durability. *U. S. Gaz.*

Our Prospects.—It is cheering to the heart of an American—one who views as a citizen of this free and happy country SHOULD feel—to witness the rapid progress of improvement—the increasing triumph of mechanical power over physical opposition—faded over nature. What a mighty a creation has a few years made in the aspect of our country! Her wildest recesses have been explored; paces the most dark and rude and desolate, where the rough earth and the foaming torrent seem to have found their respective situations during some mighty convulsion of nature, have yielded to the skill and enterprise of her citizens; and along their conquered and unscathed way, the village and the manufactory have arisen like the creations of a dream. The mountain torrent, whose march had been onward from the bosom of time, whose strength has hitherto been wasted on the rocks of its own channel, has been arrested in its unproductive freedom, and its power applied to the benefit of man. Our people are beginning to feel and know that to be independent, America must rely upon herself—upon her own exhausted resources. The experiment has in some degree been made, and it has thus far succeeded to the admiration of its friends and the confusion of its enemies. The good work has commenced, and with the blessing of God it will go on until America, no longer fettered by foreign monopoly, shall become all that its founders intended—*independent in the spirit as well as in the letter.*

Red Ink.—The mode of preparing this ink, recommended by M. de Ribaucourt: infuse four ounces of ground Brazil wood in vinegar for three days; then heat it to the boiling point, and keep it for an hour in that temperature, after which it must be filtrated. While hot, dissolve in it one third of an ounce of gum arabic, and the same quantity of sugar, and of alum; allow it to cool, and put it in well stopped bottles.

An ink of a still more beautiful shade may be made with a decoction cochineal, to which ammonia is to be added.

The most beautiful of all the red inks, is made by a solution of carmine in liquid ammonia, allowing the excess of the alkali to evaporate, and adding a small portion of colorless gum arabic.

HILLSBOROUGH, N. C.

PUBLISHED WEEKLY BY DENNIS HEARST.
A THREE DOLLAR A YEAR, OR TWO DOLLARS A QUARTER IF PAID IN ADVANCE.
Those who do not give notice of their wish to discontinue, paper discontinued at the expiration of the year, will be presumed as desiring to be continued until countermanded.—And no paper will be discontinued until all arrears are paid, unless at the option of the publisher.
Whoever will procure six subscribers, and give the payments, shall receive the next month gratis.
Advertisements not exceeding sixteen lines will be charged three times for one dollar, and subsequent insertions for half a dollar.
All notices received by the printer, and not of the post-masters in the state.
All letters and business relative to the paper must be post-paid.

JOSEPH MARSHALL, CABINET-MAKER,
HAS just received from the public for the past year, and has hitherto received, and would inform them that he has on hand a quantity of Walnut and Stained Furniture, and an elegant assortment of BEDSTEADS.
All kinds of Mahogany and other Furniture, will be made to order, in the newest fashion and in the best manner, at short notice. All work will be disposed of at prices lower than any elsewhere been customary in this place. Corn, Wheat, Flour, or Pork, will be taken in payment at the market price, if application be made soon.
September 15. 41-25

WOOL CARDED.
THE Wool Carding Machine on Edge, at the Old Tilt Hammer, having been lately repaired, and her cylinders newly clothed with the best quality, is now ready for business. Good work will be warranted for eight or a pound, or the fifth part of a ton, to show you will bring your wool in warm weather, well picked and washed, with one pound of clean lard or oil, to every ten pound of wool.
Saml. S. Claym.
June 9. 3m-96

NO CREDIT.
SCARLETT & BACON
WOULD inform the public, that they still continue their BOOT and SHOE Manufacture at their old stand, three doors west of the store of Messrs. Kirkland & Son, where they will keep constantly on hand, a general assortment of

Boots and shoes,
of the best materials and workmanship, which will be sold low for cash. Those wishing to purchase will do well to call and examine for themselves.
Jan. 6. 63-

TO JOURNEYMEN TAYLORS.

THE subscriber wishes to employ immediately a few more journeymen Tailors, to whom good wages and constant employment will be given.
John Cooley.
Oct. 6. 91-

JEWELLERY, &c.
THE subscriber would in this way inform his friends and the public, that he has just opened his shop, at his own house in this place, where he is well prepared to execute work in his line, and will faithfully and punctually do all such work as may be committed to his care.
He has on hand a good assortment of JEWELLERY, SILVER WORK, &c. which will be sold unusually low for cash.
All those indebted to the subscriber are earnestly, and for the last time, requested to make payment forthwith. Longer indulgence cannot be given.
Wm. Huntington.
August 18. 91-1

WATCHES & JEWELLERY.
THE subscriber returns his thanks to his friends and customers for the liberal support which he has heretofore received, and begs leave to inform them, that he still continues his shop at his old stand, opposite the court house, where he keeps a handsome assortment of Watches and Jewellery, which he will sell lower than can be purchased elsewhere. He has also received a neat assortment of materials, and is prepared to repair watches and clocks at the shortest notice, and warrant to perform well. All work from a distance will be well executed and promptly attended to. All kinds of silver work made at the shortest notice.
Lemuel Lynch.
August 19. 91-11
