No Living Mammeths.

For several years the story has been extensively circulated that the natives of Alaska are acquainted with living mammeths. The probable origin of the story was pointed out at a recent meeting of the Biological Society of Washington by Mr. C. H. Townsend. In 1835 when he was in Alaska, some of the natives questioned him concerning the nature of the giant animal whose bones are not infrequently found there, and he drew restorations of the mammeth in order to show them how it looked when living. They were greatly interested in the pictures, and made copies of them. These copies, he thinks, have been widely scattered through Alaska, and, being found by white men in the hands of the natives, have given rise to the belief that the ave given rise to the belief that the rebistorio beasts still inhabit that

aby monkey than there are in that of an old aboon. And speaking of wrinkles, more of hem can be wrought out in a fair young

The Food Man Needs.

"As in the daily wear and tear of life a great deal of the substance of a man's body is used up, it is absolutely necessary that the repair to the body be carefully and systematically looked after," writes Mrs. S. T. Rorer in the Ladies' Home Journal. "Then, too, man mast create heat and force, according to the climate in which he lives and the occupation he follows. A wise combination of food is therefore necessary to keep the body in working order. In cold weather we need a larger amount of carbonaccome foods—fate, sugars, and starches—than we do in summer. In the hot climates and during the hot months fruit and green vegetables, containing climates and during the hot months fruit and green vegetables, containing the salts necessary to keep the blood in good condition, should be used freely. According to our method of living in this country, we should take about two parts of repair food, such as meat, eggs, milk, cheese, or in the vegetable kingdom, the old peas, beans, and lentils, to three parts of carbonaceous food, such as white bread, potatoes, rice, butter, cream, and fats of all kinds. Then we must have a certain amount of bulky or watery vegetables, such as lettuce, spinach, cabbage, onions, and also the fruite. In making out a daily ration we should have at the beginning of the meal some light dish that may be taken slowly, to prepare the stomach for the food that is to follow, then a meat or its equivalent. With beef we should serve potatoes; with mutton, rice. With chickens, either rice or potatoes."

Godalming, England, has a remarkable black and white cat, which, after Leing taken to Leeds by railroad, returned to its former home on foot, taking six weeks to make the journey of 200 miles.

## REV. DR. TALMAGE.

SUNDAY'S DISCOURSE BY THE NOTED DIVINE.

Subject: "Boaz and Ruth." Text: "And she went and came and gleaned in the field after the reapers, and her hap was to light on a part of the field belonging unto Boax, who was of the kin-dred of Eilmelech."—Buth ii., 3.

belonging unto Boaz, who was of the kindred of Elimelech."—Buth it, 3.

The time that Buth and Naomi arrive at Bethlehem is harvest time. It was the custom when a sheaf fell from a load in the harvest field for the reapers to refuse to gather it up. That was to be left for the poor who might happen to come along that way. If there were handfuls of grain scattered across the field after the main harvest had been reaped, instead of raking it, as farmers do now, it was, by the custom of the land, left in its place so that the poor, coming that way, might giern it and get their bread. But you eay, "What is the main of all these harvest fleids to Ruth and Naomi? Naomi is too old and feeble to go out and toll in the sun, and can you expect that Ruth, the young and the beautiful, should tan her cheeks and bilister her hands in the harvest fleid?"

Boaz owns a large farm, and he goes out to see the reapers gather in the igrain. Coming there, right behind the swarthy, sunbrowned reapers, he beholds a beautiful woman gleaning —a woman more fit to bend to a harp or sit upon a throne than to stoop among the sheav s. Ab, that was an eventful day!

It was love at first sight. Boaz forms an

among the sheav s. Ah, that was an event ful day!

It was love at first sight. Boaz forms an

When amid the storms they sang.
And the stars heard, and the son,
And the sounding aisles of the dim wood
Rang to the authems of the free.

And the sounding aises of the dim wood Rang to the authense of the free.

It took all our past national distances, and it takes all our present mational sorrows to lift up our nation of that high caree where the mation of the beauty of female industry.

Behold Ruth toding in the harvest field under the hot sun or at noon taking plain and who, by the strength of his own red right arm, will make all men free. And so it is individually, and in the family, and in the church and in the world, that through darkness and storm and trouble men, women, churches, nations, are developed.

Again, I see in my text the beauty of unfaltering friendship. It suppose there were plenty of friends for Naomi while she was in prosperity, but of all her nequalitances how many were willing to trudge off with her toward Judah, when she had to make that lonely journey? One—the heroine of my text. One—absolutely one. I suppose when Naom's husband was living, and they had plenty of money, and all things went well, they had a great many callers, but I suppose that after her beath of all things went well, they had a great many callers, but I suppose that after her breakand died, and her property went, and she got old and poor, she was not troubled very much with callers. All the birds that sung in the bower while the sun shone have gone to their nests now the night has fallen.

Ob, these beautiful sunnowers that spread out their color in the morning hour! But they are always assleep when the sau is going down. Job had plenty of friends when he was the richest man in Uz, but when his property went and the trinis came the trinis came then they are under the shelter of their father's bouse, but when he salis:

Folks are so awkward, things so impolite, They will she have in the property went and the trinis came the trinis came there were none so much that he pestered the state of the darker of the pro

activoticed very much with callers. All the hirds that sung in the bower while the sun shone have gone to their nexts now then injustions and the control of the color in the mersts now then injustions and the color in the members have been all they are always asleep when get the gone of their color in the members have been the color in the members when the property went and the trials came then there were none so much that pestered as Eliphas the Temasite, and Blidad the Shahite, and Zophar the Naamathite.

Life often seems to be a mere game where the successful player pulse down all the other men into his own lap. Let satisfue the me

Halleinab, for the Lord God omnipoten signeth."

That song of love, now low and far, Ere long shall swell from star to star; That light, the breaking day which the The golden spire! Apocalypse, Again, I learn from my subject that even which seem to be most insignificant may momentous. Car you imagine anythin more unimportant than the coming of a powoman from Moab to Judab? Can y magine anything more trivial than the fundance anything more trivial.

Jubal invented rude instruments of music, calling them harp and organs, but they were the introduction of all the world's minstrelsy, and as you bear the vibration of a stringed instrument, even after the fingers have been taken away from it, so all music now of lute and drum and cornet is only the long continued strains of Jubal's harp and Jubal's organ. It seemed to be a matter of very little importance that Tubal Cain learned the uses of copper and fron, but that rude foundry of ancient days has its echo in the rattle of Birmingham machinery and the roar and bang of factories on the Merrimac.

It seemed to be a matter of no importance that Luther found a Bibe in a monastery, but as he opened that Bible and the brassbound lids fell back they jarred everything, and the rustling of the wormed leaves was the sound of the wings of the angel of the reformation. It seemed to be a matter of no importance that a woman whose name has been forgotten dropped a tract in the way of a very bad man of the name of Richard Baxter. He picked up the tract and read it, and it was the means of bis salvation. In after days that man wrote a book called "The Call to the Uaconverted," that was the means of bringing a mutitude to God, among others Phillip Doddridge. Phillip Doddridge wrote a book called "The Rise and Progress of Religion," which has brought thousands and tens of thousands and tens for the great Wilberforce. Whiterfore wrote a book called "The Rise and Progress of Religion," which has brought thousands and tens of thousands and tens of thousands and tens of thousands and tens of the salvation of unconverted, "untiltude to God, among others legh Richmond. Legh Richmond wrote a tract called "The Rise and Progress So the insignificant events of this world, seem, after all, to be the most momentous.

Again, I see in my subject an illustration of the beauty of female industry.

For some unknown reason a height qualification has recently been added to the requirements made of young women who enter the English postoffice, and in future girls of 15 will not be accepted under 5 feet, of 16 unfeet 2 inches. In commenting upon upon this regulation a writer states that a year or so ago the "stock sizes at several monster shops were altered, to keep pace with the increasing growth of the rising generation of Euglish women.

There are no less than 155 women commercial travelers in England. of trade in which the sex is interested. One woman, for instance, travels in corrugated iron and iron bolts. Another travels for locomotives. Only few take up embroideries and silks, nickles and jams, and similar commodities. Male commercial travelers regard the innovation at present as a joke, but the opinion of an expert goes to show that in this profession women can succeed where men have

Large waists are said to be coming in fashion again, but curiously enough it seems to be the aim of all dressmakers and tailors to give the long is possible with any breathing power, and the lines of braid on some of the new jackets are most eleverly arbroaden out over the shoulders. To be tightly screwed into a waist a jacket does not make the figure any smaller, a fact it would be well for all women to know, and a good fit, which makes any one look smart, always gives plenty of room over the

LARGE WAISTS FASHIONABLE.

the true waist line.—San Francisco Chronicle. THE QUEEN OF GREECE.

It is said by a lady who recently visited Greece and had the honor of meeting the royal family, that perfect harmony exists between them, and the King and Queen are devoted to their shildren. The Queen is still a very beautiful woman, and the only lady admiral in the world. She holds this rank in the Russian army, an honorary appointment conferred upon her by the late Czar, because her father held the rank of high admiral, and tal yachtswoman. The King has a very remarkable memory, an interesting personality, and is a brilliant con- dise feathers stands up at one ai streets of Athens without any attendants, and talks with any friend he chances to meet. Prince George is very attractive, and his feats strength, shown often in the cause of chivalry, are a continuous subject of conversation among the people.

A SIMPLY MADE HOUSE SACOUR. One of the most useful and com fortable articles now worn is the have a good shirt waist pattern you can make one, cutting it just the same, only six or eight inches long wear the lower part outside the skirt. Finish this part with a narrow hem or flat trimming. The collar and onfis flat trimming. The collar and onfis are not startched stiff, so it is very easy to launder. It takes three yards of yard wide goods, or four yards of

Shir the waist, back and front, at the waist line, sewing a plain piece underside each shirring. Use two pieces of ribbon, each one yard long, fasten one on each side of the back where the shirring stops, bring the ribbon around the waist, tie in front. Make a turnover collar with a ruffle three inches wide around it, and the same width ruffle at the wrist, -New England Homestead.

THE DOING OF HOUSEWORK. In this country, where there is large and growing demand for all the fon plaitingal luxuries, and most of the necessities A stylish ha of life, where there is none of the repose commonly found in an older civilization, the homemaker, besides discharging the functions of wife and mother, does the work of housekeeper, nurse, nursery governess, seam-stress and general housework servant. The chinks between her home duties she fills up with a woman's club or two, a few church sociaties, a couple sticking out to form the head. of charities and a Sanday school class To these she has lately been told she should add the trifling task of making domestic service a valuable aid to soclety in the work of moral reform,

FOR FARM AND GARDEN.

REEDLING PEACH TRYES Around most houses where peaches vere bought and used last fall, as well as the gardens where peach trees have orne, will be found numerous seedling peach trees that start from their pits, and are ready to grow as soon as pring opens. If these are carefully aken up, and set in rows where they can be cultivated, they will be ready for budding n xt August. On no account should either seedling or bud be need if it is ocutaminated with yelthrifty growth in the seedling, with a tendency to put out numerous small branches, instead of growing one straight stem, as a healthy peach tree PUMPEINS ARE EXCELLENT. Pumpkins are excellent food for

A girl's club in a strong digestive organs that, unless overfed, they will get as much good up a few years ago because an intelli-gent, well bred Scotch girl who was from grain fed whole as they would after it had been ground. But for in service was admitted through a other stock, and especially for horses misunderstanding. To save the club, and hogs, neither of which are ruminants, grain should be ground and composed chiefly of shop girls, she had to go. Another potent influence mixed with some coarser feed, so that against domestic service is the disit will not cloy the stomach. Working horses especially need ground feed. The best mixture is corn and oats young men of the mechanic class, who ground together, and mixed with cut have themselves risen a little in the world, and who openly declare their clover hay slightly moistened so that the meal will stick to it. The horses will chew this, mixing their saliva There is little hope that a better through it before it passes to the class of girls will enter service until stomach. Food thus prepared digests these conditions are changed, and the quickly and ranch more perfectly than servants and their friends respect their it could in the form of whole grain, The finer the division the better the digestive juices can get at the nutri-

CULTIVATION OF BLACKBERRIES.

This fruit requires a good soil, which is given thorough cultivation. Set on land slightly elevated and well length of time after being laid down, the canes will rot, resulting in a loss of the previous season's growth. In setting a new plantation, mark off the rows eight feet apart. After one year set cedar posts at each end of the row and at intervals of about sixty-six feet. Stretch wires and attach them to these posts. There should be a wire on each side of the row. When the new canes are three feet high, pinch off the tip, so that laterals will start out along the stem and form a bushy top. At the end of season cut out and remove all old wood and just before the ground freezes lay all down and cover lightly with earth. It will pay down. Throw a furrow toward the row, then plow a space between the and green leaves falls over the hair at one side. A cluster of bird-of-para-dise feathers stands up at one side. the following s mmer. Physiological Effects of Music

Two French scientists (MM. Binet and J. Courtier) recently described in the Revue Scientifique a series of ex-periments made by themselves and others on human beings and animals respiration. In the translation of the London Lancet: "M. Patrizi, an Ital-ian physiologist, had a patient with a wound in the skull which laid bare the brain. He was thus enabled to observe the actual effect of music on the culation was variable, the vessels being sometimes constricted and sometimes dulated. At other times no effect was produced. MM. Binet and Courtier experimented on a musician. Isolated notes, chords in unison, and discords were first tried. Both major chords struck in a lively manner and discords struck in a lively manner and discords quickened the respiration, the latter more especially. Minor chords tended to retard respiration. When melodies were tried it was found that all, whether grave or gay, produced quick-ened respiration and increased action of the heart. The lively tunes pro-duced the greatest acceleration. The duced the greatest acceleration. The subject also sometimes unconsciously endeavored to synchronize his respirations with those of the singer. In ral-lentando and diminuendo passages the respiration was retarded. Where the sound was wholly uncomplicated by emotional ideas, as in single notes or

By the will of Mr. Deury, the largest individual landowner in the United States, who died recently at Aledo, III., the use of the entire estate is left to his widow. At her death nine one-hundredths go to relatives and ninety-one hundredths go to establish the William and Vashtie College, to be located in Mercer County in the town that will donate the largest amount to aid the college.

THE "GROWN-UP" DAUGHTER'S DUTY TO HER MOTHER.

You can only have one mother; therefore, when her step is growing slow and her mind gloomy with forebodings, and you can see that her whole nervous system is upset, it is your fillal duty and privilege to attend to her in time! Mother is approaching the most critical period of her life.

The change of life, that is what mother is dreading, and no wonder, for it is full of peril to all but the strongest women.

women.

There are some special and very wearing symptoms from which mother suffers, but she will not speak of them to any one. Help her out; she doesn't know what to do

for herself!
Shall I advise you? First, send to the nearest drug store and get a bottly of Lydia E. Pinkham's Vegetable Compound, and see that mother takes it regularly, then write to Mrs. Pinkham, at Lynn, Mass., giving all the symptoms and you will receive a prompt reply telling mother what to do for herself. In the meantime the Vegetable Compound will make life much easier for her. It tones up the nervous system, invigorates the body, and the "blues" vanish before it as darkness flees from the sunlight. You can get it at any reliable druggist's.

reliable druggist's.
Mrs. Louis Strong. Harris Hill, Eric Co., N. Y., says: "I was advised to take Lydia E. Pinkham's Vegetable Compound. I took thirteen bottles and received great benefit. When the time for change of life came I suffered a great deal with faintness and palpitation of the heart. I got one bottle of the Vegetable Compound and one of Blood Purifier and was relieved again. I was tenabled to pass through that serious period very comfortably."
