Mr. Warren Atkinson:

Dear Sir:—I have used your fertilizers for three years, and they give me the best results of any I have used. Last spring I used one-half ton per acre of your High Grade Potato and Early Truck Fertilizer on erly white potatoes, without any manure; along side of this I had composted wool waste and manure in the row. Where I used the fertilizer I had ONE-HALF MORE POTATOES TO THE ACRE THAN WHERE I USED THE COMPOST, and the potatoes were brighter and smoother. The fertilizer also had these advantages over the manure; the potatoes were more easily and quickly planted, came up straighter in the row, and were more easily farmed.

GOLD MINING COMPAN

Western Slope of Pike's Peak, in the famous Cripple Creek

Gold Mining District. THE SAFEST OFFER EVER MADE TO INVESTORS

100,000 Shares Preferred Stock at 25c. per Share.

This District Produced More Gold in 1900 Than Any Other in the United States.

This property consists of 2000 by 2000 feet, or 200 acres, of gold land. The mine has been worked. The feature of this mine is the Veneta Vein, 30 to 40 feet in width, and is certainly one of the strongest veins in this famous district. There are some fifteen openings on this vein, he or from which assays in gold from 812 to 8100 per ton. The property is advantageously located for everlopment by tunnel, which will make it possible to produce an enormous amount of veilily, the quantity varying from 100 to 500 tons per day. The development by tunneling is the most economical and advantageous manner of working this property.

At a distance of 800 feet the TUNNEL will intersect the Veneta Vein at a depth of about 836 feet, and will also intersect several other veins. The TUNNEL will cut the Big. Horn Mountain 250 feet deep, and will give this Company 2,000,000 tons of ore, worth over \$20 per ton.

The new railroad, now practically completed from Colorado Springs, called the Colorado Springs & Crippie Creek road, passes with 2,000 feet of this tunnel.

Adjoining this property is the Colorado Springs TUNNEL Company. In this property, at a depth of 400 feet, the Veneta Vein was cut. At this point the vein was fully 20 feet in width, and its value from \$20 to 81,000 per ton.

There are already in operation mills and smellers sufficient to treat the output of this property which gives at once cash returns.

Steam Pumps, Tank and Tow- Capital Stock \$1,000,000. Par Value \$1.00 per Share. 100,000 Shares Preferred Stock at 25c. per Share.

In buying this Stock the purchaser owns a direct title in the Company a property. This Company offers you no watered stock, but a legituma e high-grade gold mining investment in the Cripple Creek District.

The above offer of Preferred Dividends is an insurance of early returns. After adding machinery is recteed, this property will be earning dividends almost equal to its Capital Stock.
