The customary visits to neighboring towns cease to be news when frequently made.

The monthly Parent-Teachers' meeting will be held in Penn's Grove school house next Wednesday at 3.30 p. m. County Superintendent O. O. Barr will be present. These meetings are held to get more parents interested in the school which their children attend so there will be a mutual and cordial co-operation between parents and teachers. More should make a special effort to attend.

During the year 1912, 930 automobiles crossed the river at Penn's Grove. Their destinations were mostly to the seashore and return. This was very great considering the inadequate ferry facilities between Penn's Grove and Wilmington.

Last year was the first of any considerable travel. The forecast for 1913 with a new ferry boat and the route advertised there will probably be 2000 automobiles to cross the river at Penn's Grove. After the improved state road is built and the route extensively traveled the automobile travel will be immense.

SCHOOL BONDING VOTED-DOWN

Larger School Ground Wanted

The proposition offered by the Board of Education to bond the Borough for \$30,000 with which to build a new school house was voted upon last Wednesday evening and defeated by a vote of 53 against to 32 in favor.

William P. Denny was chairman of the meeting, Edward M. Munyan, secretary; George H. Elkinton, Esq., judge, and Warren Risner, teller.

I. E. A. Miller and former Mayor F. A. Gentieu asked for information as to where the building to be erected with the money asked for and if there was any other plan proposed other than the one exhibited at the annual meeting.

Mr. Denny had another plan exhibited of a two-story building to have a three-foot foundation above ground and a heater put under one corner. The first story contained four classrooms of legal size and two smaller rooms, together with two cloak rooms and two toilets. The second story contained five classrooms, two cloak rooms and an assembly room 32 by 51 feet. Mr. Denny said the Board of Education had no other site than that purchased two years ago, and some who favored that site two and one year ago were opposed and favored another now.

Messrs. Miller and Gentieu expressed opinions unfavorable to the present site, and mentioned the possibility of the burning of both buildings if one caught fire.

W. A. Sumner stated that he was a member of the Board of Education two years ago and was probably favored and agitated as much as any one purchasing the Cunningham lot, but his opinion had greatly changed in a year. A garage had been erected opposite the school house where automobiles frequently stop. There has been enrolled in the present building the past year 493 pupils. There has been enrolled 119 in the chapel and annex on State Street. The erection of a building on the lot opposite the present school house will provide for 612 present pupils and an increase of more than 200 pupils making over 800 on an acre and a half of ground in the two buildings thereon. Many children were on the streets at the school and the increasing automobile travel will increase the peril to their lives by the congregation of so many at one center.

The Board of Education controls the lot now paid for, and if the \$30,000 would erect a favorable vote they had a legal right to erect the building thereon.

He was an advocate of large school grounds where other parts of the country was providing for children. The extension of State Street thru W. A. Sack's property to Beach Avenue would develop the center part of the Borough where the past land is. Between State Street extension and the railroad and between the meadow and beach Avenue there is between three and a half and four acres of land. If that be purchased for a school site it would be ample ground for play ground in school time as well as vacation time. Other places are having summer play ground schools.

With a larger school ground a building could be erected on the block system, giving ample room for extension.

Some put a high value on the land. It is unimproved farm land with little rental value now and a prospect of sales for residential purposes near the railroad not the most desirable. What ever value the people who create the value have to pay, the adjoining property should be as valuable for taxing purposes.

Procuring all this ground will give ample room, not only for a school house and play grounds for the school boys and girls, but there will be room for base ball and foot ball for men's athletic sports which are now held on low and rented private property.

Going to began \$41 and the polls were cast by suffragettes.

As soon as the Board of Education meets they can present a proposition to bond on the purchase of another site and on another proposition to bond for building purposes.

LIFTING THE LOAD
Some citizens because so rude at a public school meeting as to put such pointed questions that it seemed to others like carrying a jummy to try off lids. Some who have paid little attention to school affairs may not be aware, until they become members of the Board, that such an honor is considered a private trust. Probably many have never noticed that an itemized account of school moneys has not been published for years, such as the County Board of Freeholders and Borough Council publish every year. The State school law chapter 60 says: "Such Board of Education shall, as soon as practicable after the close of each school year, cause to be printed and published a report of the condition of the public schools under its charge, of all the property under its control, and an itemized account of the expenditure of the Board and of the finances of the district."

The editor of the Record will be a member of the Board, because a while naughtily by asking impertinent questions and telling tales out of school. He got turned out. By continuing to cause trouble the Board thinks it time to administer punishment by taking public printing out of town.

Curious citizens are requested to leave their jimmies at home hereafter and not to go to trying into matters not presented for direct consideration.

State To Improve Roads
Col. Edwin A. Stevens, State Commissioner of Roads, went thru Salem county last Friday to view the shore roads from Oldmans creek thru Penn's Grove to Salem, which it is proposed to have improved with county and state aid. He said a new law was passed at the last session of the Legislature which is designed to give the State control of all highways between leading towns, and that the shore road from Oldmans creek thru Penn's Grove and from Penn's Grove to Woodstown would be included in the proposed improvement, but he could not say when they would be built.

Col. Stevens was accompanied by Harry B. Allen, Board of State Board Department in Trenton. They took dinner at French's hotel with a committee of the Board of Freeholders, consisting of Joshua Wiseman, Jr., Robt. N. Yarnum, and Messrs. B. Reeves, R. B. Griscom, and county engineer H. B. Keasy and road supervisor W. J. Casper.

They took a lunch supper at the Country Club on Elinboro shore.

W. Cook.

Play Grounds
Citizens are establishing play grounds for the protection of children's lives as well as to teach them useful things.

A former teacher in Penn's Grove school receives a larger salary to teach on the play grounds during the vacation in Chester, Pa., than she received for teaching the regular school months.

Since vacation schools were established in Paterson, N. J., the arrests of juvenile offenders has decreased three-fourths.

Pupils in Salem schools have raised \$300 to employ teachers for instruction on play grounds during the coming vacation.
