Fruit Good at Any Time.

All fruit is said to be most wholesome and refreshing in the morning—and surely no fruit is so cleansing and refreshing as a big juicy melon, cooled over night and almost crawling open and voluntarily exposing its red heart after the knife has gone partly through it. Such a melon, however, is just as good at other hours in the hot days, for which it seems to be especially provided as a refreshing experience, something more than the shadow of a great rock in a weary land. It is no wonder the southern darkies are so fond of watermelons. In these most trying days of the long summer of the south the melon is more refreshing than chill dewdrops on the early morning grass, and to the overheated, overworked and thirsty soul a good juicy ripe one "comes home to the business and the bosoms" of darky and white man alike.—Hartford Times.

Easy Test For Proving a Diamond.

It is an easy matter to detect the difference between a genuine diamond and an imitation. Take a tube of filtered water and drop the stone therein. If it is a diamond, it will pass through the water, but if pure the eye is unable to see it at all. Another test is to place the stone upon a pencil dot made on a piece of white paper. If the dot is duplicated upon the facets you can rest assured that the stone is a fraud, but if not it is a good stone. The common belief that a stone can be tested by filing is erroneous, for the best diamond ever cut will splinter and break when rasped with this instrument.—St. Louis Globe-Democrat.

A deserter is not always a deserter, even though branded with a great big "D," according to the laws of Queen Victoria's realm. Some time ago a well known English resident of Wilmington, Del., applied to the British consul here for a pension, claiming to have served his country in an Australian regiment. He admitted having had his breast branded with a red iron, with the letter "D," which marked him forever as a deserter, but claimed to have rejoined his regiment after his punishment and served out the term of enlistment. The British home office found that he was right, and the pension has come to him after a long wait.

FAIR AND CLEAR

That's the way your skin will be after you take Dr. Pierce's Golden Medical Discovery. Pimples, blotches, eruptions, and humors are utterly banished by this medicine. It takes away more thoroughly and certainly than anything else the blood poisons or impurities that cause them.

For every Skin, Scalp, and Scrofulous affection, no matter how it came, the "Discovery" is a direct remedy. It cleanses, builds up, strengthens, and invigorates every part of the system. Eczema, Erysipelas, Salt-rheum, Tetter, Boils, Carbuncles, Enlarged Glands, and the worst Scrofulous Sores and Swellings are completely and permanently cured by it.

Unlike ordinary spring medicines, the "Discovery" works equally well at all seasons. Practically, it's sold on credit. If it ever fails to benefit or cure, you have your money back. You pay only for the good you get.

No cheap substitute, urged by a tricky dealer, though it may be better for him to sell, can be "just as good" for you to buy.

Call for Irrigation Convention.

TERRITORY OF NEW MEXICO, EXECUTIVE OFFICE, SANTA FE, N. M., August 1, 1902.

To the People of New Mexico, Arizona, Western Texas, and of the State of Chihuahua, in the Republic of Mexico:

WHEREAS, All of the citizens of the above states are actively interested in the irrigation industry, and are in a large measure dependent upon irrigation for the development of their agricultural resources; and

WHEREAS, A large proportion of the people in the Territory of New Mexico, of the western portion of the state of Arizona, and of the northern portion of the state of Chihuahua, are largely dependent upon the Colorado River for their water supply for irrigation purposes; and

WHEREAS, The greater portion of said river passes away during the season of the year when not needed for purposes of irrigation, which with a proper system of reservoirs, could be saved and utilized, and would thereby greatly add to the wealth and prosperity of said region; and

WHEREAS, Large quantities of the water of said river which have for many years been appropriated and used by the citizens residing in the valley thereof, north of Albuquerque, for the purposes of irrigation, and upon the continuation of which depends the life and prosperity of the community, has been wrongfully appropriated and diverted to other uses, in the Colorado, thus causing a water famine in the lower valley, which from year to year grows greater, until the agricultural lands are in imminent danger of destruction unless such diversions be stopped;

Now, therefore, for the purpose of consulting together, and devising ways and means to stop such wrongful and diversions of the water of the Rio Grande, and of storing and preserving it for the use of the people of said Territory, by saving the surplus water and storing it in reservoirs, and of devising and carrying out a general and concerted plan of action, looking to the development of the agricultural, mineral, and horticultural resources of such region, by saving and utilizing the water thereof, a mass convention of the citizens residing in said portion of said states and territories is hereby called to meet at Deming, in the Territory of New Mexico, on Tuesday, November 7, 1902, and subsequent days.

All persons resident within said portion of said states and territories are respectfully requested to attend and participate in the deliberations of said convention, and all counties, municipal corporations, irrigation districts, and canal corporations, boards of trade and chambers of commerce, are invited to send delegates thereunto.

Done at Santa Fe, the county of New Mexico, this 24th day of August, A. D. 1902.

(SEAL) J. W. HUNTINGTON, Governor of New Mexico.

R. ALEXANDER, Secretary of Territory.

India For the Indians.

A Madras native gentleman was once asked by Lord Roberts what he thought of "India for the Indians." He replied: "Go to the zoological gardens and open all the cages. You will then see what would be the end of India for the Indians. There would be a grand fight among all the animals, with the result that the tiger would walk over the dead bodies of the rest." On being asked whom he meant by the tiger, he replied, "The Mohammedan from the north."

The moral of this allegory of my friend, who was certainly one of the most enlightened native gentlemen I have ever met with, was that India could not be left to herself, and that a supreme power was necessary to hold together the varied and various races.—London Spectator.

People Who Do Not Whistle.

Arabia must be a heaven for those whose lives are made a burden to them by the whistler. The Arab maintains that a whistler's mouth cannot be purified for 40 days and nights, and they assert of the whistler that Satan has touched his body and caused him to produce the offensive sound. Then there are the natives of the Tonga Islands, Polynesia, who hold that it is a sin to whistle, as it is an act disrespectful to God. Even in some districts in north Germany the villagers declare that if one whistles in the evening it makes the angels weep.—Exchange.

aid, and then he while he thus woman tripped sailed along like

ree wind and port a distinctive air of er, and she carried outside pocket of an atched her and lie- ment when she open- ed the man in the

Again, two parol-board checks were handed out, and by this time the "turkey" on the outside was becoming frantic. It was coming easy for everybody but himself, and he resolved to hazard a chance and keep his half dollar. He took a fresh bite of plug, gave his trousers an extra hitch and approached the window on tiptoes. He peered cautiously around the edge of the narrow opening. Harry was still there, checking up the house. He hesitated only for a moment, and then he blurted out:

"Hello, Harry, old boy."

"How are you, sir?"

"O'm wur-r-kin."

"Are you, my friend?"

"Yes."

"Where?"

"Shitcock, yar-r-d."

And when the doorkeeper was through with him and the patrol wagon had gathered him in he sadly wondered at the eternal unfitness of things and why all men are not born equal.—Chicago Mail.

The Cause of Waterpouts.

A waterpout is a meteorological phenomenon of peculiar character, which is occasionally observed on land, but usually occurs at sea. It consists of a cone shaped pillar of condensed vapor, which descends, with the apex downward, from a dense cloud and at sea attracts a somewhat similar cone in a reversed position from the surface of the water. The two may not inarily be compared to a gigantic hourglass. The cause of this phenomenon is supposed to be the gyratory movement of the air with such swiftness as to produce a vacuum in the axis of rotation, and the contact of the lower extremity of such an axis with water would effect the elevation of a column of the latter to a considerable height. The most probable solution of the phenomenon is that waterpouts originate in adjacent strata of air of different temperatures, running in opposite directions in the upper regions of the atmosphere. They condense the vapor and give it a whirling motion, so that it descends tapering to the sea below and causes the spiral of the water to ascend in a pointed spiral till it joins that from above.—Brooklyn Eagle.

Reports from Chama state that there are close to 100 cars of wool at present stored at that place. Hon. T. D. Burns has just sold thirty carloads to a Boston firm, which is now being loaded on the cars for shipment.

The O'Donnell Bro's who have been running a horse ranch north of Lordsburg for the past few years, left the first of the week for their old home, in Kansas City, having turned the ranch and horses over to Jas. Carr.

The cattle which have been advertised for sale by T. C. Tiltonson, at Eddy, to satisfy a mortgage, were disposed of at the court house on the 4th inst. The cattle sold numbered 1,500 head, and brought \$3,100, being bid in by Charles Schriener, of Keerville, Texas, and Buck Anderson, of this county. Mr. Schriener was the mortgagee and took the large number.

The following formula for preventing the growth of horns on calves should be tried by those who object to deborning: Take 50 parts of caustic soda, 25 parts of kerosene, and 25 parts of water. Heat the kerosene and soda together, stirring vigorously, and then add the water. Take a calf at from one to three weeks old, trim away the hair around the base of the horns, then with a few drops of the mixture on the cork, which should be of rubber, rub on first one horn and then the other, repeating until three or four applications are made. Be careful not to allow the fluid to run down upon the face.

For the first time in four years cattle were shipped from this point direct to market this week. T. R. Kerr, of Cambray was the shipper, and Los Angeles the destination. The cattle were fine and sleek. The shipment consisted of one carload—Richard and Harry Classen of Lordsburg were in the county capital this week, on important business connected with the extensive cattle interests of Hart Brothers. William Leffler of the Turf ranch is about again after a serious illness due to inflammation of the bowels. Mr. Leffler has had a pretty severe siege of it for nearly three weeks.—Deming Headlight.

any thing wrong and republicans are responsible for it. Many people say that the democratic party is badly demoralized and that the republicans will carry the Territory with a big majority next year. We are of a different opinion. We believe the democratic party is stronger now than it ever was. The men who have year after year marched to the polls under the banner of democracy remain unterrified. They cannot be confused.

The question of irrigation concerns every body in New Mexico. It is of great importance for upon it will depend in a large measure the well being and prosperity of our Territory. By means of irrigation the barren wastes around us can be transformed into fertile fields, and the ground that does not now produce enough to feed a prairie dog will bring forth food for thousands of men. How to obtain these benefits is the question. We hold that it is not only possible but probable that this country will yet become an important agricultural district through and by means of irrigation; and we believe it rests with the people of New Mexico as to when our development shall begin. If we do our duty on November 7th and 8th next we will attend the Deming convention and there make united effort in our own cause. The people of Kansas are at work, so are the Californians. Let us not be behind any body in trying to develop and build up our country.

YOUNG democrats of New Mexico will have a picnic with their candidates, Hon. A. B. Fall, for delegate to congress, against any man the republicans may put up.—Albuquerque Democrat.

The people of the third judicial district would much prefer to keep Judge Fall where he is, in a position to which he is admirably adapted, and one he fills alike with honor to himself and satisfaction to all.—Enterprise.

The position of delegate to congress is of more importance to New Mexicans than all the offices. We need such a man as Judge Fall to represent us at Washington.

The human hair is absolutely the most profitable crop that grows. Five tons of it are annually imported by the merchants of London. The Parisians harvest upward of 200,000 pounds, equal in value to \$20,000 per annum.

The mosaics in the Church of St. Mark in Venice are the finest in the world. They cover 40,000 square feet of the upper walls, ceilings and cupolas and are all laid on a gold ground.

Until about a hundred years ago burial in coffins was by no means universal. In early times corpses were merely wrapped in linen shrouds.

Very few can reach deep into their own minds without meeting what they wish to hide from themselves.

The First French Doctor of Law.

Mlle. Jeanne Chauvin, the first French doctor of law, has held since Jan. 1 last the post of professor of law in the girls' college of Paris. By a special order of M. Gerard, vice rector of the Academy of Paris, professors are prohibited from placing in the hands of their girl pupils copies of the code itself, so that the young neophytes whom Mlle. Chauvin initiates into the civil and criminal code have only their teacher's oral lessons to go upon.—Paris Letter.

The Taste Girls Should Have.

A Louisville magistrate has decided that girls have just as good a right to smoke cigar stes on the streets as dudes. But the dear girls should remember that they are supposed to have better taste than dudes—and refrain.—Minnesota Tribune.

An Oregon (Ills.) young woman is making a crazy quilt of the silk ties which have been given her by her devoted admirers. Her pillows are to be stuffed with their love letters.

Those in search of novel luncheon dainties should try the peanut sandwich. Be sure the peanuts are freshly roasted. Chop fine and spread between slices of buttered bread, cut very thin.
