WHEN BETTER AUTOMOBILES ARE BUILT—BUICK WILL BUILD THEM

The new Four-Cylinder Buick, here announced, is a thoroughbred—a pedigreed car well worthy of its name.

Down to the very last detail, this new model possesses every quality of enduring serviceability, complete comfort, and distinctive appearance that have always characterized Buick automobiles.

The advent of this new Four makes the Buick 1922 line complete. It offers to purchasers of a car of this size all the quality and service that go to make up the name "Buick."

The engine, of course, is of the time-tested Buick Valve-in-Head type. The year-after-year concentration of Buick's engineering skill and experience in building Valve-in-Head motors assures the highest standard of performance obtainable today.

Every other unit is of a quality equal to the power plant. The whole assembly constitutes a perfectly balanced chassis which is of typical Buick construction. The equipment of Cord Tires is merely evidence of the quality which characterizes the entire car.

Two open and two closed body types mounted on the Buick built chassis comprise the new series.

Even the most casual inspection of the details of design and workmanship will reveal that full measure of quality which motorists have learned to associate with Buick.

Obviously a high grade automobile—a genuine Buick production—the prices listed below make this great Four even greater. A value such as this is possible only because of the combination of Buick engineering skill devoted to the one ideal of quality, Buick production facilities developed over nearly a quarter of a century, and Buick's nation-wide distribution and service organization.

The Buick Motor Company is proud of the Buick Four. It has the faith of long experience in this newest addition to its line. It places upon it unreservedly the Buick guarantee carried by every Buick automobile produced. That its confidence is well placed is manifested not only by the keen interest with which motorists have awaited this announcement, but also the advance orders placed by distributors, dealers, and the general public.

the side of it and ten days later did. The June corn was ninety days in reaching the roasting-ear stage. The Minnesota 13 still has nice green stalks while June corn is dying under the same conditions.

### About a Square Deal.

If a man were to work for your father several days on the farm and then never come for his pay, you would think something was the matter with him, would you not? You would say that he didn't have "gumption" enough to demand a square deal. How then, about a club member who has plowed, or hoed, or canned, or sewed for several days during the past summer but fails to claim the credit or award for this work because he does not take his exhibit, record and booklet to the fall show? Are there any members in your club who seem backward in preparing to demand a square deal at your show and exhibits this fall?

If any club member seems to have forgotten his pledge to give and demand a square deal in club work, and is under the suspicion of cheating, where will the judges look for reliable information? To the two disinterested witnesses who have signed his book, of course. To prove in advance that he is giving a square deal and also to be in position to demand the same from all others, every club member ought to see to it that his record is signed by not fewer than two reliable witnesses who are not members of the family.

### MUSICAL PROGRAM

The Primary department of the New Mexico Conservatory of Music under the direction of Miss Lennie Curry, rendered the following program on Wednesday, August 17th. Opening Selection, Miss Lennie Curry "Bancroft", Francois Behr, Op. 575

- Elsie Burns
- "Dance on the Green"
- Joyce Anderson
- "The Violet" W. C. Powell
- Zola Bailey
- "Sweet Flower Waltz"
- Harold Spencer
- Valeria Bocoek
- "Dew Drop Waltz" Harold Spencer
- Virginia Flannery
- "Sleeping Doll Waltz"
- Henri Kliekman
- Zola Bailey
- "Cedar Brook Waltz" Phil P. Perry
- Eleanor Burns
- Waltz, Joyce Anderson.
- "Swaying Branches" Walter Rolf
- Virginia Flannery

After the regular program was rendered several selections were given by Mr. Musin Croft and Mrs. Hoyt Temple. Also Mr. D. N. Croft favored the department with a very entertaining musical reading which was greatly appreciated by all.

Delicious refreshments consisting of cherry punch and cake were served after the program and everyone reported an enjoyable evening.

### METHODIST CHURCH

The pastor has returned and will preach Sunday, both in the morning and evening.

## Interests of Bank and Depositors

Officers and directors of this bank recognize that the interests of this bank and its depositors are the same. When the resources of the patrons and depositors of the bank increase the volume of business increases. It is therefore wise and prudent for the bank to assist the people of this vicinity to increase their money and property.

To this end the most cordial relations between the officers of this bank and its depositors are encouraged. Any service that we can render is always cheerfully given in all financial matters.

## No Worry For Her

A person said "My head is fast growing gray. I've lived a long time in this world and had lots of trouble, most of which never happened."

Avoid the worry habit by avoiding the things that might be a source of worry.

She doesn't worry about the results of her baking when there is plenty of WICHITA'S IMPERIAL FLOUR in the pantry.

## Boys' and Girls' Club Corner

By Mrs. Edna Hume Durand  
County Club Leader

An interesting meeting was held at the home of Mrs. Sherwood, Shiloh, the 15th. A pressure cooker demonstration was given at which time two guinea fowls were cooked and two quarts of summer squash were canned. This was followed by a canning demonstration using corn as the basis for discussion.

Three members of the "U-Need-A-Cook" Cooking club gave a demonstration of cake baking. Mrs. W. F. Greer is the local leader for this group and the girls are doing excellent work. They have an original song (both words and music) that will prove a best seller and the girls have worked out a yell that will put snap in their work.

The Havener group will meet

Thursday at the school house. Every member is urged to be present with his record so that a helpful "round table" on records may be conducted.

The Grady community is so busy with harvest that the August meeting has been postponed until a later date.

The Locust Grove clubs will meet Friday, the 19th.

### Something to Think About in Preparing Your Exhibit

Poultry—How to make a proper coop, which cockerel and two pullets will make the best exhibit, what are the points of a good type of my breed? (If you do not know your particular breed you should send for Farmers' Bulletin No. 806 if you have an American breed such as the Plymouth Rock, Rhode Island Red, etc., or No. 808 if you have one of the Mediterranean or Continental classes such as the Leghorns, Minorcas, etc.)

Pigs—How to get your sow and litter in suitable crates so that they can be easily removed and handled at the show pens. Do you know how to

groom and care for your stock at fair grounds?

Calf—Are you feeding just a little grain these days? Oats or other grain help the calf to acquire a good looking coat. Break the calf to lead and "gentle" her with daily handling.

Corn—Study the two cuts on page 14 of your club book. Can you select a uniform exhibit? Do you know the "true type" in your variety?

Sorghum—Which 10 heads to select? How to cure the exhibit and display it?

Bean—Read page 14 carefully and be sure that your exhibit is hand picked.

Garden—Exhibit for variety, uniformity of group specimens and attractiveness of display. Assist the booth superintendent in arranging your exhibit. Do not search for your largest products, but for your best.

Canning—Are your containers uniform? Have you succeeded in getting a good pack? Have your vegetables retained their color? Is there excessive shrinkage?

Cooking—Do you know what is re-

quired for a standard exhibit? Have you practiced making the foods required until you are expert in getting results?

Clothing—Are your garments clean and neatly made? Can you pack them after they are pressed so that they will look well when removed for exhibit? Is your exhibit an example of honest endeavor and your very best effort?

All Projects—Can you complete your record and figure your labor income for the year?

Schedule for Next Week.  
August 24th ..... Hollene  
August 26th ..... Pleasant Hill and Shiloh.  
August 27th ..... Bellview

Report on Minnesota 13 Corn, by Lawrence Mills

Each stalk has all the way from one to three good ears on it, and is now past roasting-ear stage. In exactly sixty days after it was planted it was in roasting-ears. It never did fire up at the bottom for lack for moisture while June corn right by
