

PREPARING FOR THE WORK OF 1913

CITY BUILDING, RAILWAY BUILDING AND FARM OPERATIONS IN WESTERN CANADA, BIGGEST EVER.

The machinery, the money and the men for carrying on the big works in Western Canada in 1913 are already provided for. The splendid harvest which was successfully garnered, and by this time mostly marketed, responded to the big hopes that were had for it early in the season, and inspired capitalists and railroads to further investment and building. From lake ports to mountain base there will be carried on the biggest operations in city building and railway construction that has ever taken place in that country. The Canadian Pacific railway has everything in waiting to continue their great work of double tracking the system and by the time the Panama Canal is open to traffic there will be a double line of steel from Lake Superior to the Pacific coast. The cost will exceed thirty million dollars. The Grand Trunk Pacific plan of building a first-class trunk line and then feeders at various points will be carried forward with all the force that great company can put into the work. The Canadian Northern is prepared to put into motion all the energy that young giant of "ance and railroad building can put into various enterprises of providing and creating transportation facilities.

Building operations in the several cities, that have already marked themselves a place in the list of successful and growing cities, will be carried on more largely than ever. Schools, public buildings, parliament buildings, colleges, business blocks, apartments, private residences, banks, street and other municipal improvements have their appropriation ready, and the record of 1913 will be something wonderful. Other places which are towns today will make the rapid strides that are expected and will become cities. There will be other Edmonton, Calgary, Regina and Saskatoon, other places that may in their activity help to convince the outer world of the solidity and permanency of the Canadian West. The country is large and wide and broad and the ends of its great width and length are but the limits of its agricultural area. Its people are progressive, they are strong, there is no enervation there. The country teems with this life, this ambition, this fondness to create and to use the forces that await the settler. If they come from the South, and hundreds of thousands of them have, they are now the dominant men of the North, and they have imbibed of the spirit of the North. Therefore it is fair to say that no portion of the continent will show such wonderful results as Western Canada, and the year 1913 will be but the beginning of a wonderful and great future. And in this future the 200,000 Americans who made it their home, and those who preceded them, will be a considerable portion of the machinery that will be used in bringing about the results predicted.

The development of 1913 will not be confined to the prairie provinces. Railway building and city building in British Columbia will be supplemented by the farm, the ranch and the orchard building of that province. Vancouver will make great strides in building, and Victoria, the staid old lady of so many years, has already shown signs of modern ways, and if the progress made in 1912 may be accepted as anything like what it will be in 1913, there will be wonderful developments there. During last year the permits went over the ten million dollar mark and much more is promised for the year now entered upon.—Advertisement.

Took Load Off Mother's Mind.
Six-year-old Dora returned unusually early from school the other day. She rang the door bell. There was no answer. She rang again, a little longer. Still there was no response. A third time she pushed the button, long and hard. Nobody came to the door. Then she pressed her nose against the window screen and in a shrill voice, which carried to the ears of every neighbor on the block, called: "It's all right, mamma. I ain't the installment man!"

The Infant Terrible.
"Mr. Lisbeau, is it true that you haven't got sense enough to come in out of the rain?"
"Yes, Miss Kitty; you must always believe what papa tells you."

No matter what happens, the suspenders a man wears are never entirely free from responsibilities.

Sanctimonious Penny.
Jerome S. McWade, the millionaire collector of Duluth, was appealing on the Mauretania for a seaman's fund. "Let the collection be generous," he said. "We want none of the penny and quarter parable here."
A penny and a quarter, side by side in a pocket, fell into conversation. "I'm worth 25 of you," said the quarter laughingly.
"That's true," replied the humble penny, "but in one respect, sir, I'm superior to yourself."
"Pshaw; how so?" said the quarter.
"I go to church, sir, far, far oftener than you," replied the penny.

Collecting Antiquities.
Slopoy received a card on which was engraved: "Professor Bruce, Antiquarian."
He knew no such person, so his curiosity led him to receive him.
"What is your business, professor?" he asked politely.
"I am a collector of antiquities," answered the old man.
"So I imagined. And how can I serve you?"
"By paying a deposit on this little bill you have owed for more than three years."

He's Not There.
Jimmy was sure he had something the matter with him, so he went to see the doctor. His pulse was felt, his tongue was examined, his heart was listened to, and his lungs were thumped. He seemed to be sound.
"Do you sleep nights?" asked the physician.
"Yes but I don't enjoy my sleep."
"Ah—what disturbs you?"
"Nothing, except I don't get any good out of sleeping. I go to sleep the minute I hit the bed and the minute I'm awake I have to get up. How can a fellow enjoy his sleep when he doesn't know it?"

Public Would Gain.
"In looking over this paper I find that Mr. Proseklyewicz Iguainczinski and Miss Maloonoozek Winskadiakowski are engaged to be married."
"I am very glad to hear it."
"Why? What interest have you in it? Do you know them?"
"No, but I consider it a matter for public rejoicing that these two names are to be made one."—Stray Stories.

Timely.
Joseph Ettor, addressing the Little Falls strikers, cracked a timely joke. "Let us emulate the firmness of the millionaire class," he said. "Our millionaires, you know, swear off at the beginning of each year, and infallibly keep their pledge."
"Aw, whata do they swear off?" a striker incredulously demanded.
"They swear off their personal property tax!" was the reply.

Invalid Men and Women

I will give you FREE a sample of Dr. Pierce's Pleasant Pellets that have brought health and happiness to thousands—also a book on any chronic disease requested.

During many years of practice I have used numerous combinations of curative medicines for liver ills. I have kept a record of the result in case after case, so that my staff of physicians and surgeons, at the Invalids' Hotel, Buffalo, N. Y., are able to diagnose and treat cases at a distance with uniform good results.

But for the permanent relief of blood disorders and impurities, I can recommend my "Golden Medical Discovery" a blood medicine without alcohol or other injurious ingredients.

R. V. PIERCE, M.D., Buffalo, N. Y.

Nature's Way Is The Best

Buried deep in our American forest we find bloodroot, queen's root, mandrake and stone root, golden seal, Oregon grape root and cherrybark. Of these Dr. R. V. Pierce made a pure alcoholic extract which has been favorably known for over forty years. He called it "GOLDEN MEDICAL DISCOVERY." This "Discovery" purifies the blood and tones up the stomach and the entire system in Nature's own way. It's just the tissue builder and tonic you require.

Dr. Pierce's Golden Medical Discovery has the endorsement of many thousands that it has cured them of indigestion, dyspepsia and weak stomach, attended by sour risings, heart burn, foul breath, coated tongue, poor appetite, gnawing feeling in stomach, biliousness and kindred derangements of the stomach, liver and bowels.

"In coughs and hoarseness caused by bronchial, throat and lung affections, except consumption, the 'Golden Medical Discovery' is a most efficient remedy, especially in those obstinate, hang-on-coughs caused by irritation and congestion of the bronchial mucous membranes. The 'Discovery' is not so good for acute coughs arising from sudden colds, nor must it be expected to cure consumption in its advanced stages—no medicine will do that—but for all the obstinate, chronic coughs, which, if neglected, or badly treated, lead up to consumption, it is the best medicine that can be taken."
