

## Still Waiting For His Ride

### DAIRY BREEDS SHOW WIDE RANGE OF PRODUCTION

Individuals and communities that plan the raising of dairy cattle should learn as much as possible in regard to the characteristics of the different breeds, says Professor Cunningham of the New Mexico Agricultural College. Each dairy breed association maintains a register in which pure bred cows are registered, regulation. A bulletin of the U. S. Department of Agriculture after having completed milk and butter fat records under definite reports the average yearly production of the cows of each breed recorded in the various registries.

The average production of 25 98 Ayrshire cows that had completed one year records up to the first of July, 1917, was 9555 pounds of milk, testing 3.95 percent of butter fat. The average butter fat production for one year was 377.51 pounds.

The 199 Brown Swiss cows that had completed one year records up to June, 1917 averaged 10,868.7 pounds of milk, testing 3.99 percent of butter fat. The amount of butter fat produced per year was 433.45 pounds.

The 6,200 Guernsey cows that had completed records up to August 15, 1917, averaged 8,934.44 pounds of milk per year. The average butter fat test was 4.99 percent and the pounds of butter fat per year was 446.01 pounds.

Three thousand two hundred and twenty Holstein-friesian cows had completed one year records up to February 19, 1917, and averaged 14,622.7 pounds of milk, testing 3.424 percent of butter fat. The average production of butter fat in one year was 500.7 pounds.

The average production of the 5,244 Jersey cows that had completed one year records up to March 16, 1917, was 7,792 pounds of milk, testing 5.35 percent of butter fat. The average production of butter fat in one year was 417 pounds.

Of course the productions indicated above are higher than the true breed averages because only cows that gave evidence of good production were put on test. It cannot be said that they represent an entirely fair comparison between the breeds because the number of cows tested is not the same for each breed and there may have been a greater tendency in some breeds than in others to put cows of medium production on test, thus lowering the breed average. They do not indicate comparative economy of production because feed records are not available.

However, in the absence of any method of determining the average production of all the cows of any breed they form a good basis for comparison and the percentage of butter fat in the milk of the different breeds check very closely with those reported by the state experiment stations.

Mr. E. J. H. Roy and Mr. Sol Floersheim made a business and pleasure trip to Sabinosa last Wednesday.

J. O. Green, manager for the F. B. Collins Inv. Co. of Clayton was in Roy a few hours last Monday evening.

Gerald Dodds was a business visitor at Wagon Mound the first of the week.

F. O. White of Panhandle Tex. is visiting relatives in Roy for a few weeks.

### COUNTY SEAT ITEMS

The Chautauqua has come and gone. They had a fine program each night and we can not but feel that it was well worth every dollar that it cost.

A letter from Mrs. Jack Kirby states that the little boy who had his leg hurt just prior to accompanying his mother on her visit to Texas was given a thorough examination and that it was found that the bone had been fractured, but that he is now commencing to recover nicely.

We have been quite busy this week, trying to repair our house, putting up a windmill and trying to keep up with our office work and correspondence. Tired, lazy and about half sick it has been rather trying on our patients.

Another addition to the rapidly growing town this week. Mr. R. L. Keller commenced the construction of a new business building on west Main Street and is rushing it through to an early completion. He will occupy it with an up-to-date meat market as soon as completed.

Judge J. W. Westfall, city marshal and Street Commissioner has had a crowd out on the streets this week cleaning up the vacant property and piling the trash and refuse on the alley to be carted away by the garbage man. The town is taking on quite an air of cleanliness these days.

Mr. J. C. Lloyd was badly hurt Friday at the George Spivey ranch, where he was assisting in the repair of a windmill. The pipe had been raised to a considerable height when the chains slipped and let the pipes drop. As they went down they caught on the end of a lever with which Mr. Lloyd had been lifting and caused the pole to fly up, catching him under the chin and lifting him high into the air, knocking out several teeth, scraping the flesh from the bones and leaving him in an unconscious condition for some time. Dr. Daniels was hastily called who gave treatment and ordered him to be left at the ranch until the next day when he was brought home and is reported to be slowly recovering although in a very badly bruised and shaken up condition.

Mr. I. A. Dyke has been remodeling the basement under his large store building, putting in a floor, windows and getting it ready for occupancy by the Harding County Developer which has again outgrown its present quarters. Having ordered a large press and considerable additional equipment they are forced to hunt more room and have rented the basement of the Dyke building.

Fifteen year old Eructoso Baca was accidentally shot in the abdomen with a twenty two caliber rifle on Friday the 23rd. Young Juan Aranda and the lad were herding goats in the near by canyons. Aranda had a rifle with him and one of the cartridges becoming jammed in the gun he attempted to extract it when it was discharged the bullet striking Baca in the abdomen. He was brought to Mosquero where an operation was performed at the Daniels hospital by Drs. Daniels and Gamble and the boy is reported to be recovering nicely and will soon be out of danger.

We haven't had a quarrel or a fight with anybody (except our wife and that don't count) that we are getting tired of being corresponded, Ogden of the Patriot ignores us. That Mills correspondent sidesteps or dodges around so that we can't find anything to quarrel with her about and Fairplay and Fairview and a host of others that get into print leaves us out of their arguments so that we can find no excuse to horn in on their little "spats" so-darned if we don't quit and give it up as a bad job unless we can strike up a quarrel with some one to keep our interest and our fighting ability duly exercised.

J. E. Russell, wife and son Reece are in Roy this week from Clarendon Texas. Mr. Russell is looking after his ranch interests north of town and Mrs. Russell and Reece came along to take care of Jesse. They report hot weather down at Clarendon and are glad to get a few days rest on the cool mesa. Mr. Russell tells us that his eldest son Stephen will have charge of the schools at Mountain View, north east of Mills this winter, and of course this is an indication that the Russells have an eye on returning to the mesa some of these days ere long.

Mrs. Keller and Mrs. Shvaer of Mosquero visited with Mrs. Don Bradley Tuesday. Mrs. Shaver is one of Mosquero's popular young teachers of last year. She will visit at the home of Mrs. Bradley a short time as these teachers all like to get together and plan on their new school and enjoy the country as well as town life.

**FOR RENT—320 acre farm north east of Roy, will rent to right party or parties, for particulars see or write**

W. S. Morris, Roy, N. M.

Don't forget the base ball excursion to Tucumcari next Tuesday, the train will leave Roy about 8 A. M. and the round trip will be \$5.04 Everybody should try and make the trip and help out the home team with their presence.

Mrs. P. P. Branch is having a beautiful monument placed over the graves of her husband and son at the Roy Cemetery. The stone is a fine granite double monument and is placed over the graves of P. P. Branch and Edward Benjamin Branch.

Ralph Hazen was up from the Bradley neighborhood Wednesday on business.

The morning sermons at the Community Hall are being well attended and the hall is filled with interested hearers each day from 10 to 11 A. M.

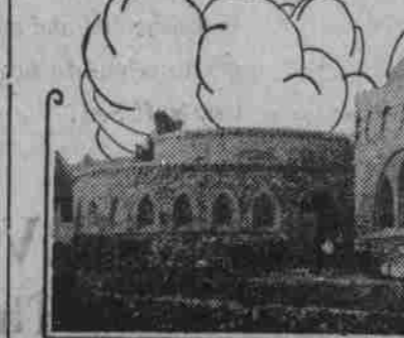

Several car loads of Royites went out to Sabino Canyon Tuesday and viewed the giant tusk and other fossils found in the canyon after the recent flood.

Several car loads of Royites went out to Sabino Canyon Tuesday and viewed the giant tusk and other fossils found in the canyon after the recent flood.

### CHURCH BUILT BY ONE MAN

It is said that the wonderful cathedrals of Europe were constructed by the laymen and skilled workers of the church. L. D. Cornuelle, formerly a Cincinnati man, built this elaborate edifice single-handed, filling the role of architect, mason and carpenter. He worked from a pencil sketch only and finished the work in a year and eight months. The church stands at Sierra Madre, California, and nestles in the foothills back of the little town.

### TRANSFERS OF REAL ESTATE

Furnished by the Mosquero Abstract & Title Co.,  
**WARRANTY DEEDS**

T. J. Cress et al Gilbert R. Randle, Lots 21 and 22 in Block 14 Cress addition to town of Mills.

**PATENTS RECORDED**

James Hunter White, 80 acres

Bingley D. Atkins 160 acres.

**PRESIDENT IN SYMPATHY WITH PLAN TO ELIMINATE DEADLY GRADE CROSSINGS**

(Special to the S. A.)

Washington, June 19.—The interstate commerce commission compiles statistics of accidents involving loss of life or injury in which railroads are involved. According to these figures, last year 1,072 persons were killed and 4,818 persons injured. Most of these were automobile accidents.

As a result, a Sampaign, having as its slogan "Cross Crossings Cautiously," is being instituted by the American Railroad Association, which will endeavor to impress upon all who use the road which passes over a railroad track, both in this country and in Canada, of the need of stopping, looking and listening and of letting the train go by first.

Of this campaign President Harding has said: "The complete scope of such an effort would mean the saving of thousand of lives, the prevention of many more thousands of injuries and incidently the prevention of a great property loss."

"Of course, the ideal solution is elimination of grade crossings to which all possible energy and means should be unceasingly directed. But the extent of our country and its railroad mileage make apparent that not for many years of utmost effort could this be effected."

"There should be constant pressure for elimination of the danger spots, particularly in the more populous areas, pending which there is need for just the kind of preventative effort that your association is planning."

"Among these measures the most effective would seem to be to arouse in the minds of drivers a sense of their personal responsibilities. When thoughtlessness is allowed to usurp the place of vigilance, as too often happens, the scene is set for tragedy. Reminders and still more reminders of the need for caution at railway crossings are needed."
