Cream Bread
Fresh every day at J. Graaf & Co's old reliable bakery.

NEWS BY TELEGRAPH

Much Excitement in Mexico over the Recent Railway Accident.

Total Number of Killed, 193 Soldiers and 13 Officers.

Two Men Rob a Stage Between Alamosa and Leadville.

The Job Reported to have been Quickly and Quietly Done.

The Next Reform Movement by English Radicals.

Parnell Coming on Another Visit to the United States.

Terrific Explosion of Gunpowder and Gunpowder at Tucson.

Scandinavians Held as Slaves in the Sandwich Islands.

Newsy Telegraphic Paragraphs from Over Land and Sea.

Violators of Law Arrested.

Cincinnati, Ohio, June 29.—Pools have been sold on the recent races in violation of lately passed law. Arrests were made to-night of the guilty parties.

Peculiar Powder Explosion.
San Francisco, June 29.—Sunday morning the Alta Chemical Powder Works at Clark's Landing, Alameda county, blew up. Owing to the peculiar character of the powder the explosion made but little noise. Professor Manning, manager of the works, his son and Engineer Anderson were all badly burned, but no lives were lost. About 1800 pounds went off with a hiss or puff.

Verdict in Favor of Claimant.
Chicago, June 29.—A jury in the case of Architect John Clifford against Wm. H. Drake for making derogatory statements which prevented plaintiff from getting the San Francisco court house to build, thus preventing him from making a complaint alleged, a quarter of a million of dollars brought in a verdict of damages to the amount of eight thousand dollars against Drake, who appealed the case. Fifty thousand dollars was the amount of damages claimed.

Sessions' Indictment Without Precedent.
Albany, June 29.—The indictment of accused in this case was under investigation by the legislative committee never known before in this or any other country. The jury were also sworn upon the District Attorney who would not agree to have the trial because he was not prepared with evidence. The counsel laid stress upon the District Attorney hastening the indictments and then delaying the trial.

New Railroad.
St. Louis, June 29.—The board of directors of the Chester, Iron Mountain & Western Railroad which is to run from St. Marys Mission on the Mississippi, westward to Salem, penetrating a very rich iron and lead bearing region of Missouri, have been organized by President J. W. M. Jones of New York. Electing; Charles B. Cole of Chester, Illinois, Vice-President; Newton Crane of St. Louis, Secretary. Engineers have begun to survey a line for this road and work will be commenced at once.

French Censured.
New York, June 29.—The World's Washington special says the recent letter of French, auditor of railway accounts, to the President of the Central Pacific Railway Company in consequence of which the Central Pacific advanced sufficiently in the market to have netted French a snug fortune had he been inclined to take advantage of it, was the subject of Cabinet discussion to-day. The opinion was unanimous that having been sent west as Government agent, French had no business to transcend his legitimate duties, and that circumstances demanded his removal.

The Storm King Visits Chicago.
Chicago, June 29.—About 2 last night a terrific wind storm burst over the city and did considerable damage in the way of blowing down houses, unroofing buildings, uprooting trees, etc. Several persons were struck by lightning and killed at Austin, a suburban town. An Episcopal church, not yet completed, was prostrated to the ground. No loss of life is reported. There is very little telegraphic communication with the outside world in any direction and the storm appears to have covered a wide extent of country. The weather last night was sultry but after a shower it became bright and pleasant although still rather warm.

Scandinavians in Slavery.
San Francisco, June 29.—C. Chausen, a Swede, who recently arrived here from Honolulu, reports that several hundred Scandinavians who went to the Sandwich Islands under a labor contract made by Captain Lorange are held there in what is practically a state of slavery and disposed of by lot among planters, suffering from climatic influences and held rigidly to the terms of the contract on paid penal servitude, although the other parties to the contract have failed to carry out at least its spirit. His story creates a sensation in the city and several communications have been sent to Norway and Sweden warning the people against emigration agents from Hawaii.

Mexican Matters.

THAT RAILWAY ACCIDENT.
City of Mexico, June 26.—The railroad on which the accident occurred two days ago was built by Mexican engineers and was a first attempt at railroading. The road was cheaply built and the accident was prophesied by constant engineers. Public opinion blames Manager Sanchez who has left the city. The train conductor's defense is that there were no trackmen to warn him of the danger. It was the intention to extend the line to the Pacific at Ebelby by means of a government subsidy. The Lunas, the only city paper without government subsidy, attacks the government and the administration. It says Sahu is to blame, assails Perido Diaz and calls Sanchez to account. The Diario, official government organ, considers the accident beyond human foresight. The road has cost the government so far \$340,000 in subsidies and sixty miles have been built. A dispatch received reports that Governor Guerrero is missing. It is not known if he is on the train. Over 150 bodies have been recovered in a charred and mutilated condition. Reports have been meagre regarding the accident as the telegraph lines are destroyed by the managers for the purpose of suppressing details. The official announcement of the killed was 192 soldiers and 13 officers.

OFFICIAL CHANGES.
Pacheco to-day becomes Minister of Public Works, vice Diaz, and Fernandez assumes Pacheco's position as Governor of the district. Pacheco and Fernandez are reported to be interested in the Morelos road and will oversee the investigation. It is alleged that the government gave the manager of the Morelos road \$80,000 to reach Cuantla for July. It appears the road was condemned by the public inspector the day of its inauguration. There is general indignation and the papers demand that the blame be fixed.

Comptroller's Conclusion.
Washington, June 29.—First Comptroller Lawrence has given a decision to-day in which he maintains that the act of February 23d, 1875, as to the fees of marshals and clerks does not change the rate or mode of computing mileage on writs served by marshals and clerks. He prohibits instructive mileage on writs transmitted and served by deputies and mileage for travel not necessarily performed. The opinion further maintains that by force of the revised statutes subpoenas for witnesses who are required to attend the August term of the circuit or district court on the part of the United States should require them to attend to testify generally on behalf of the United States and under such subpoena they are required to testify before the grand jury, petit jury and court. Clerks of court are required by law to insert in one writ the names of all such witnesses who at time of issuing the warrant and who reside in one locality or the same direction from the place where the writ is returnable. Marshals are entitled to but one mileage for summoning witnesses. Subpoenas having been issued for witnesses whose names should have been inserted in one writ, the decision authorizes the proper accounting officers of the Treasury Department to revise the accounts of the marshals and clerks of courts of the United States, notwithstanding their approval by proper court. The statute authorizing such revision Judge Lawrence holds is unconstitutional.

English Political Topics.
New York, June 29.—The World's London special says: Now that the Land Bill is safe so far as the House of Commons is concerned, and that law of the radicals are being restored in Ireland, the radicals are turning their attention to great domestic reform upon which they have set their hearts. An assimilation of borough and county franchise will be a comparatively easy job. The Tories who approved of Disraeli's reform of '67 cannot logically resist its application to agricultural labor nor would it be prudent for Tory chiefs to attempt to defeat such a measure. The laborers are now bound together in unions and swayed by a central union comprising men like Joseph Arch who are wise and vigorous leaders. It is contended that they are illiterate and therefore unfit to exercise the franchise. They may truly answer that the fault is not theirs but the squires' and the parsons'. As regards education however, they are not one whit behind tens of thousands of their countrymen which Disraeli was not afraid to entrust to power. The most important of the great questions of reform will be the redistribution of seats.

The radicals hope to annul to some extent the large influence wielded in many constituencies by wealthy land owners, in other words by house lords, *grandpapa old squire* and constituencies of that like have passed away but the power of territorial oligarchy is still in very many places unbroken. Thus North Allerton, in Yorkshire, is practically controlled by the Earl of Hartwood; the Earl of Egmont really keeps the little Sussex borough of Midhurst in his pocket; Earl Fitzwilliam has a controlling influence over Malton, in Yorkshire; Marquis of Ailesbury is a power at Marlborough; Earl of Litchfield at Litchfield; Earl of Sefton and Derby, in Southwest Lancashire; Duke of Devonshire in the county of Cork and Waterford and in several English counties; Lord Monson in Surrey, and so on. The radicals of course expect the opposition not only of the Lords but of the Gladstone brings in the measure next session his large majority will drive it through the lower house and the upper chamber will think twice before rejecting it. Reform in franchise and representation is always popular.

Magazine Explosion.
San Francisco, June 29.—A Tucson dispatch says L. Zickendorf's powder house containing two car loads, of English gun cotton and a ton of powder exploded at eleven last night. The windows of the city were broken and the doors burst in.

Daring Stage Robbery.

Leadville, Col., June 29.—Last night at twelve o'clock Sanderson's stage from Lake City to Alamosa was stopped by two masked men, ten miles west of Alamosa. One man held the horses and the other turned a reflector to shine inside the stage. He then commanded five men and one woman to come out, one at a time on his side of the road and threatened if any one went out of the other side he would be shot. After pulling a sack over each head and making the men fold their hands over the sacks and kneel in a row, they were searched. The robbers secured between eight and nine hundred dollars in cash and one pistol. Everything else was returned. Then they made the woman hold the lamp while they ransacked the U. S. mail bags and then taking the cash from the stage company's box, jumped on their horses and rode off. No description of the men can be given by the passengers. The robbery was committed very quietly and quickly.

Acquia Rights.
Judge S. C. Parks has withheld his decision in a very important water case argued before him some time ago. The case that the Judge has had under consideration is that of M. A. Otero and others against Virgil and others. The *New Mexican* says:

"It is a suit in chancery filed by the complainants in the district court of Valencia county in 1879, and involves many important questions relating to water rights. The parties are numerous on both sides, and deep interest in the result is entertained by the people of Valencia county. The question at issue is as to the rights of certain parties who some years ago constructed a ditch running from the Rio Grande to a place called Toma, distant from the river about fifteen miles. The ditch runs through a country where irrigation is necessary to the successful cultivation of crops and vineyards, and furnished the water for this purpose and for the running of several mills.

After the construction of the ditch by the complainants the defendants opened another acquia which tapped that of the plaintiff's and obtained its supply of water therefrom. This second ditch was used for supplying water to another section, and as there was plenty of water for both no objection was made on the part of the complainants. In 1879, however, there was severe drought and the supply of water in the ditch being limited the defendants appropriated the entire quantity to their own purposes, thus leaving the original custodians of the ditch from the Rio Grande to Toma without water. The complainants thereupon brought suit to determine their rights in the premises—whether they actually own the water in the ditch constructed by them, and if not, what are the rights of parties constructing acquias tapping running streams of water?"

Albany Advice.
WAR OF WORDS.
Albany, June 29.—A stir was created to-night on the main floor of the Delavan House where it was reported that an angry conversation took place between Assemblyman Crapser, a Half-breed, and Assemblymen Bemis and Phillips and Senator Winslow. Stalwart Crapser charged the Stalwart party with trying to destroy the Republican party by foisting upon it candidates not acceptable to either party or to the people and inferred that the Half-breeds were men possessed of manhood sufficient to be led about with rings in their noses. The affair created great excitement.

ARTHUR'S NEW IDEA.
It is reported that Vice-President Arthur said to-night that the only way for the Republicans to get out of this difficulty was to concentrate on Conkling and Dewey.

Tablegrams.
THE GOLD RUMOR.
London, June 29.—The rumor of the murder of Gold, on the London & Brighton railway, excites intense interest. The real name of Lefroy, who is suspected, is Henry Mayrton. He called the police and is missing. The murdered man, Gould, was in the habit of traveling on the train in question. Some articles, such as Hanoverian tokens, were found on the person of Lefroy, and also beside the murdered man, which it is thought will implicate Lefroy.

Lefroy claimed to be the author of "Pins and Needles," now being played in the United States, and also the author of several burlesques and opera bouffes performed in Melbourne, Australia.

WOOL SALES.
At the wool sales to-day 7,440 bales were disposed of, comprising New Zealand and Sydney. The demand was good, and rates firm.

OPPOSED TO BIMETALISM.
London, June 29.—The Times says the financial report of the Russian delegate to the monetary conference has been submitted to his government and opposes bimetalism.

Law for Guidance of Intruders on Choctaw and Chickasaw Lands.
Washington, June 29.—Instructions were mailed to-day from the Indian office to U. S. Indian Agent Tufts, at Muskogee, Indian Territory. Tufts is directed in conformity with the decision of the Attorney General to give notice to all parties interested that reasonable time, say thirty days from July first, will be allowed within which they can make arrangements to comply with the Choctaw and Chickasaw permit laws or leave the country. Such as refuse or neglect within that period to take out the necessary permits will be driven out of the Territory.

Amount of Bonds Received for Continuance.
Washington, June 29.—The amount of five per cent. coupon bonds received for continuance at 95 per cent. aggregates \$88,000,000.

Fresh vegetables every day at the Park Grocery. 4-10tf

Why Parnell is Coming.

New York, June 29.—A London special says: Parnell has a two-fold object in visiting the United States in autumn, to-wit, "to pass the hat and to induce the skirmishers" on your side to moderate their bloodthirstiness. The utterances of O'Donovan Rossa's paper and of other journals of that stamp are cabled over here ever week to Parnell's embarrassment. One of these dispatches quotes a skirmishing journal as saying, "without some kind of fight or skirmishing outside of Ireland and back up what Parnell is doing to draw off the enemies' attention from his peaceful and constitutional agitation, that agitation will collapse." This forces upon Parnell an alliance utterly ruinous to his power, and the Catholic bishops in England, without exception, have denounced skirmishing in a solemn manner. Parnell is taunted with these wild huravangs by his opponents, and his friends urge him to take steps to muzzle the patriots of that kidney. Father Ryloft, a member of the Dublin Executive Committee of the league explored the people at the last meeting to pay no heed to the teachings of Irish papers in New York, and to abstain from acts of violence against the constabulary. Parnell will probably find it difficult to gag New York preachers of force, especially those who run skirmishing funds in connection with their advocacy of dynamite.

Telegraphic Briefs.
A fire at Byersburg, Tennessee, Sunday night, destroyed fifty houses including a building occupied by the State Gazette newspaper.

A Springfield, Ohio, special says a severe wind storm visited that city yesterday morning. The plow factory of Doyes and Evans house were unroofed.

One thousand two hundred and sixty shade trees were blown down by last night's storm in Washington, scores of houses were unroofed and damaged and 400 street lamps were damaged. All the gas was blown out.

Ex-Secretary Ramsay, to whom was assigned the work to examine into the charges preferred against Superintendent Dodge, of the San Francisco mint, has received his instructions.

Messrs. Ferrington & Co. have sold their bowling alley and saloon to Lawrence Romar who will refit and stock it in a manner to suit the trade. Charlie Carter, formerly manager of the bar in Motley's Theater, Santa Fe, will have charge of the liquid department.

Wednesday evening there will be a broom, brush and pail voted to the most domestic young lady in Las Vegas. Friends will govern themselves accordingly.

Notice of Removal.
The San Miguel National Bank has removed from the Plaza to the stone building on the East Side, opposite the St. Nicholas Hotel, where they will be glad to see all their friends and patrons. 6-3-81
