S.S.S. SPRING TONIC

Spring is the season when the blood is weakest, and our systems least responsive to the demands of nature. It is the time of fickle appetites, poor digestion, lack of energy, bodily fatigue, and many other systemic disturbances when we need a tonic. A great many so called tonics are merely stimulants, often producing exhilarating effects, but acting with decided injury on the system later. If your system is weak and depleted you can only tone it up by supplying an increased amount of nourishment, and this can come only through pure, rich blood. S.S.S. is the greatest of all blood purifiers; and it is the one medicine you can rely upon to supply the system with the best tonic effects and at the same time thoroughly purify the blood. Many people have put off using a tonic until the system became so weakened it could not resist disease, and have paid for the neglect with a spell of debilitating sickness. S.S.S. is nature's ideal tonic; made entirely of healthful roots, herbs and barks. It tones up the stomach and digestion, aids and improves the appetite, and in every way contributes to strong, robust health. S.S.S. is for sale at drug stores.
