THOUSANDS OF TONS OF BEANS CROP

Rains in Las Moras Heaviest in Seventeen Years and Preparations Are Under Way for Bumper Crop.

Tucson, Ariz., July 27.—When one speaks of growing frijoles by the ton it sounds big, but when one estimates the crop of beans for the year by the thousand tons, it certainly makes an impression...

Colonel Sturges expects this year to be the best agriculturally in Arizona that has ever been known. He has acted on that expectation and at Las Moras he is planting more beans than in any previous year...

J. P. SCRAP OVER IN ROSWELL TO BE LONG ONE

Quo Warranto Proceedings Begun; Attorney General Clancy Gives Opinion on the Proposition.

(Special Correspondence to the Herald) Roswell, N. M., July 27.—Quo warranto proceedings have begun in the district court in behalf of the territory of New Mexico...

The motion for the petition in the quo warranto proceedings against Mr. Witt was presented to Judge William H. Pope yesterday morning and the petition was given August 4, 9 a. m. set for the trial of the case.

Filed with the motion was the affidavit of Attorney General Frank W. Clancy to show the territory's name in the case. Mr. Clancy in giving this affidavit said:

In view of some unjust criticisms which have been made as to similar giving of authority on my part in another matter, I think it proper to say that my reason for not so being considered as founded upon any opinion as to the merits of the proceeding against Mr. Witt, whatever opinion I might have as to such a matter, I feel I ought to give the necessary authority as a matter of course, except in extreme cases where there could be no possible contention on behalf of the territory. In other words, I do not want to stand in the way of Mr. Witt who has a case to be presented to the courts.

Attorneys Day and Dault, representing Mr. Witt in the court, yesterday morning asked for the full twenty-day limit to return their answer. This was objected to by the attorneys for the territory who claimed that this was a matter of a public office and needed immediate attention. The judge compromised by giving the counsel for the defense eleven days to file their answer.

During the session yesterday morning the attorneys for Mr. Witt stated that they would ask for a jury.

It will be remembered that the attorney general previously decided that the office of justice of the peace is not a county office therefore was subject to re-election which was the cause of the election over the territory last February.

The matter is not another phase of the well and dry local fight, the dry claiming that Mr. Witt is a resident of the wet elements of the city while Mr. Wittler is a representative of the dry.

Should Judge Witt be thrown out of office it would not affect the legality of any action of his while in office as he would be considered a de facto officer.

The case promises to be an interesting one, as many new questions will be brought out in the trial.

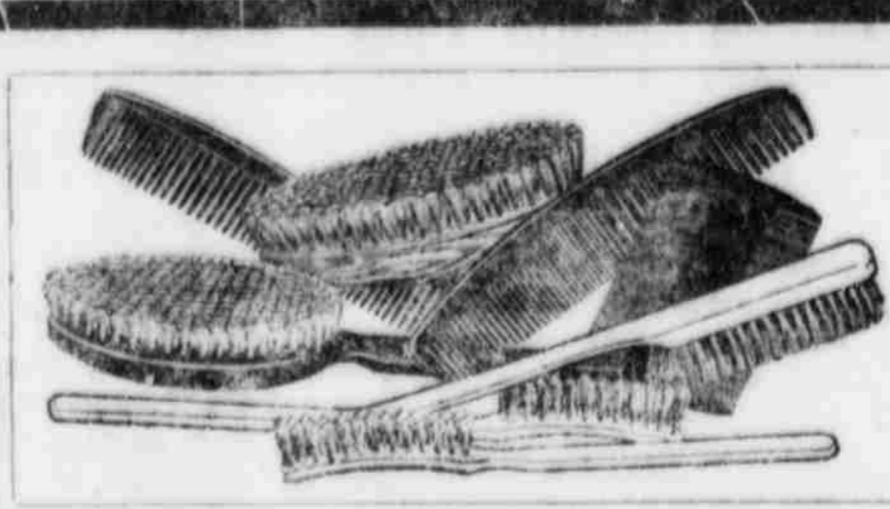

MENDENHALL DID MUCH WORK FOR PECOS VALLEY

Pioneer Who Died in Roswell Was One of Foremost Boosters for Development of Eastern New Mexico.

(Special Correspondence to Herald) Roswell, N. M., July 27.—The passing of Stephen B. Mendenhall Wednesday at the home of his daughter, Mrs. Will S. Prager, 302 South Main street marks the ending of a useful life to the Pecos valley.

Mr. Mendenhall was born May 23, 1847 at Joplin, Mo., where he lived for a few years, afterwards moving to Missouri. In that state he was married to Miss Isabel Bunker at Joplin on the 21st of November 1866. In 1873 Mr. and Mrs. Mendenhall came to New Mexico living first at Las Vegas and later at Carlsbad where his foreman later the future developer of this valley helped to solve many a problem which has given to the present valley of today.

While in Carlsbad Mr. Mendenhall became interested in the Roswell section by making several trips to examine promising supplies. During the Reconstruction promotion of the railway to Roswell he was an efficient helper, as a contractor. Not only in the promotion and building of the railway, but in all business and social activities did he wield an influence in the prosecution of the times.

A Noteworthy SALE OF Brushes

HOBO WAS NOT SO POOR AS HE LOOKED

Old-Time Panhandler Hands Out a Toot of Bills and Tides Away in a Small Touring Car.

New York, July 27.—Ragged and unkempt, a dirty old hobo duster about his shoulders and the stump of a cigar in his mouth, an old man was arrested before Recorder Harbison in Union Hill, N. J., charged with vagrancy.

"It's Argentine J. Major," a policeman told the recorder. "He hangs out in a hobo lodging house and is a professional panhandler. He's been coming over here for years begging on the streets."

NEW MEXICO WILL BE REPUBLICAN

G. A. Martin, Washington Correspondent for El Paso Herald, Gives His Views Upon "Our Coming Statesmen."

G. A. Martin in a signed letter to the El Paso Herald states that the chances for New Mexico statehood seem rather bright. Commenting upon the coming statehood race he says:

As politicians here look at it, New Mexico is going to be Republican without any trouble and will send Albert B. Fall and W. J. Mills, present governor, as the first two senators.

THINNINGS ARE SOLED

AT CONSIDERABLE PROFIT Roswell, N. M., July 27.—Three car loads of green apples have been shipped out of the Roswell country

and two more were loaded today. These five cars are going into Texas more or less as an experiment but it is believed that they will meet a demand there as cooking apples. They were of a very good quality, and were not "windfalls" as was thought by some. They were picked to keep the trees from breaking and it is probable that about twice as many more will have to be picked to protect the trees as the fruit gets larger.

Old timers who have gone to the orchards where the picking has been going on have been astonished at the amount of apples. On trees where from five to ten boxes have been picked there is no trace of any having been taken off.

Everything is shaping up nicely for the apple harvest and there seems to be no doubt that by the time the heavy work begins the association machinery will be working like clock work.

As an example of what can be accomplished in an orchard the work of Wednesday in the Wetig orchard of twenty-two acres is cited. He has one of the heaviest orchards in the valley and had already started to thin the fruit when it was decided to ship the thinnings. The first car of fruit was loaded from this orchard, and on the first day his force of pickers and packers got more than four hundred boxes ready to load.
