One Hundred and Sixty-Two Railroads These Lines Will Be Called Upon By Interstate Commerce Commission to Prove They Don't Discriminate.

Attorney General Clegg today issued a general investigation into freight rates on livestock, packing house products and fresh meats in effect throughout the portion of the country, west, south and southwest of Chicago today was ordered by the Interstate Commerce Commission. The proceedings will begin at Oklahoma City on Sept. 11.

The inquiry will be a wide one. It will affect directly not only the livestock and packing house product rates throughout the central west, but also those east of Chicago and west of Denver.

The respondent railways number 162. The investigation is based on complaints of the rates filed with the commission by the Railroad Commission of Oklahoma, the Texas Cattle Raisers' association, the American National Livestock association and other interests in livestock and meat product shipments. Incidentally commercial rivalry between two sets of meat packers in Chicago enters into the case.

In view of the great importance of several proceedings heretofore instituted it was decided by the commission to consolidate them into one case. It was regarded as next to impossible so to adjust the rates as to insure parity of charges throughout the territory by the consideration and disposition of individual cases.

A determination, therefore, was reached that "in order to remove all unlawful rates and practices it is necessary that the scope of the hearing should be broadened so as to include rates from all points of origin of livestock in the states of Texas, New Mexico, Oklahoma, Louisiana, Arkansas, Colorado, Kansas and Missouri" to the livestock markets at Fort Worth, Oklahoma City, Wichita, Kansas City, St. Louis, Omaha and Chicago, and other points in order to place all producing points and consuming points of packing house products and fresh meats on a just, reasonable and non-discriminatory basis.

It is indicated by the commission that the purpose of the inquiry is not only to secure a parity of rates, but to establish by definite order rates which the commission shall regard as reasonable and not unjustly discriminatory.

Hearings of the case will be held by the commission at several points in the central west, including probably besides Oklahoma City, Kansas City, Fort Worth and Chicago.

A final determination of the commission's proceedings is not expected before next spring.
