The prospects are that a meeting of the territorial Democratic committee will be called to meet the last of this month, probably about the 30th instant.

Does the esteemed Deming Headlight mean to say that it indorses Delegate Ostron's statehood bill in toto, apportionment and all? We rather guess not.

Have you noticed, dear reader, the superiority of the New Mexican's telegraphic press report of late? The Associated Press seems to have at last placed a man on guard in the Rocky mountain district who knows his business. The New Mexican's congratulations to Mr. T. C. Demond, the A. P.'s Colorado representative.

By Gov. Matthews keeps up his present gait somebody will be nominating him for president. The Hoosier statesman's utterances of late indicate that he stands up straight on the financial question. The Democracy might go further than Indiana in search of a presidential candidate and do a great deal worse.

So AFTER all it appears there is no such thing as "the Schomburgk line." This man Schomburgk was not a surveyor at all; he was simply a botanical enthusiast who wandered over to Venezuela in search of wild flowers and grappled his discoveries by making crude maps of the section visited. Among other objects noted on these maps was a log cabin or two occupied by English adventurers, and when he reached London these cabins were officially designated as "British possessions" and Schomburgk was made much of by royalty for the work he had done in "re-establishing the British boundary line." No wonder the London Chronicle insists that Lord Salisbury will have to come down and arbitrate.

### PROTECTION FOR RAILROAD EMPLOYES.

During the year ending June 30, 1894, 1,823 railway employes were killed and 23,422 were injured. Compared with the previous year this shows a decrease of 904 in the number of employes killed and 8,807 in the number of employes injured. One reason for this large decrease in casualties is the reduction, to the extent of \$3,994, in the number of employes. No statistics covering the year ending June 30, 1895, have as yet been compiled. It is known, however, that the equipment of cars with hand-holds and grab-irons has been rapidly going on; that the majority of all cars are now so equipped, and that a large number of cars and locomotives have also been fitted with train brakes and automatic couplers during the year. It is believed, therefore, that the rate of accidents for the year ending June 30, 1895, will show a still further decrease.

For the year ending June 30, 1894, the number of employes for each employe killed was 428, as compared with 320 in the previous year. The number of train men employed for one killed was 156, as compared with 115 in the previous year. This is a marked improvement, and is believed to be due to the use of better safety equipment.

The supreme court of the United States has held in cases cited that the hazardous character of the business of operating a railroad seems to call for special legislation with respect to railroad corporations, having for its object the protection of their employes as well as the safety of the public, and that it is incumbent upon promoters of works of necessity or utility, where such occupation is attended with danger to life, body or limb, to provide all appliances readily attainable known to science for the prevention of accidents, and that neglect to provide such appliances will be regarded as proof of culpable negligence.

### PRESS COMMENT.

#### Well, Let 'er Drop.

Something may be expected to drop in official circles in this part of the territory before long. It won't be much of a surprise either.—Silver City Eagle.

#### Small Business.

Neither does the Democrat owe any thanks to Delegate Ostron for the congressional record. As he said when last in Albuquerque, he has "nothing for the Democrat."—Albuquerque Democrat. We can hardly conclude that any man capable of holding the position of delegate in congress would demonstrate his insignificance by a refusal to favor a leading opposition paper with the little courtesies common in public matters of this nature. If the Eagle should be ignored in such a case it would not be remarkable, because Mr. Ostron has probably never heard of the Eagle; but in the case of a leading Democratic daily it is another question, and such an attitude toward the paper would indicate that the greatness of the high official referred to is principally in the region of the waist and rather than in his mental caliber. We can but hope, for the sake of New Mexico, that our delegate in congress is large enough to hold himself above petty political or personal spite. Now that he occupies the position he does, by the vote of a large majority of the people of this territory, he ought to become the representative of all her citizens without reference to their political views. If he does not become such a representative he is unworthy of the high office he holds.—White Oaks Eagle.

## self-help

You are weak, "run-down," health is frail, strength gone. Doctors call your case anemia—there is a fat-famine in your blood. **Scott's Emulsion** of cod-liver oil, with hypophosphites, is the best food-means of getting your strength back—your doctor will tell you that. He knows also that when the digestion is weak it is better to break up cod-liver oil out of the body than to burden your tired digestion with it. Scott's Emulsion does that.

## The PECOS VALLEY of . . . NEW MEXICO

**OFFERS** unequalled advantages to the farmer, fruit grower, live stock raiser, dairyman, bee-keeper, and to the home-seeker generally. The soil of the Pecos Valley is of high average fertility, and under irrigation produces bountiful crops of most of the grasses, grains, vegetables, berries and fruits of the temperate and some of those of the semi-tropical zone. In such fruit as the peach, pear, plum, grape, pruna, apricot, nectarine, cherry, quince, etc., the Valley will dispute for the pre-eminence with California; while competent authority pronounces its upper portions in particular the finest apple country in the world. Enormous yields of such forage crops as alfalfa, sorghum and Egyptian corn make the feeding of cattle and sheep and the raising and fattening of hogs a very profitable occupation. The cultivation of osage—a tanning material of great value—is becoming an important industry in the Pecos Valley, a home market having been afforded for all that can be raised, at a price yielding a handsome profit. The climate of the Pecos Valley has no superior in the United States, being pre-eminently healthful and health restoring. Lands with perpetual water-rights are for sale at low prices and on easy terms. The water supply of the Pecos Valley has no equal in all the arid region for constancy and reliability; and this with the superb climate, productive soil and the facilities afforded by the railway which extends through the Valley's entire length, will cause these lands to enjoy a constant, and at times rapid, increase in value. The recent completion of the Pecos Valley Railway to Roswell will cause the more rapid settlement and development of the upper portions of the Valley, including the rich Feliz section. The company has recently purchased many of the older improved farms about Roswell, and has now for sale lands to meet the wants of all—raw lands, partially improved lands, as well as farms with houses, orchards and fields of alfalfa and other crops. In the vicinity of Roswell several pieces of land have been divided into five and ten acre tracts, suitable for orchards and truck farms in connection with suburban homes. Certain of these tracts are being planted to orchards, and will be cultivated and cared for by the company for three years at the end of which period they will be handed over to the purchaser. Write for pamphlet fully describing the terms and conditions on which these several classes of tracts are sold.
