THE EVENING WORLD'S RADIO PHONE SERVICE COLUMN.

News of Wireless Talking Activities and Developments, Musical and Other Programmes of Broadcasting Stations and Answers to Queries Will Be Found in These Columns.

By Capt. Robert Scofield Wood
(D. F. C., M. C., Croix de Guerre with four palms; formerly Commander 167th Squadron, Royal Air Force.)

RADIO CLUBS.

The sensational development of the wireless telephone and the enormous demand for receiving sets have created a demand for radio clubs. Every day we receive letters requesting information concerning local wireless organizations. Rural communities have established clubs which have become pop—— social centres. Some clubs meet twice a week to enjoy the broadcasting received on the club set which is usually more powerful and better equipped than the individual set. At these meetings topics of interest to all members are discussed. Later the members adjourn to dance to music from the air.

Other clubs meet as often as seven nights a week and boast an active enrolment of several hundred members. Schools, high schools and colleges, to say nothing of large organizations of every description, have taken up the fad and established radio clubs. In the suburbs and outlying districts the get-together spirit is very strong and clubs are formed with little difficulty. The city, however, is quite different and offers a variety of complications not easily overcome. Many fans are looking forward nevertheless to the establishment, in every district in Greater New York, of radio clubs where enthusiasts will get together to enjoy the entertainment and where they may, through discussion, find the solution to many of their local radio problems. There are enough radio enthusiasts in every district of this city to make the community club idea a success.

The Radio Editor extends an invitation to all radio clubs to send news of their activities to him for publication.

The programmes listed in this column are not the only ones being broadcasted in this district. There are numerous amateurs sending out good music on the 200-metre wave length. Appropriate music may be picked from the air at any time for any occasion by merely changing the wave length.

LETTERS

Among the letters of congratulations received by the officials of W D Y was one from J. H. Wiederhold, of Kitchener, Ontario, Canada. On the night of January 30 Mr. Wiederhold was invited to the home of a friend, Dr. J. Hett, of Kitchener, where he was to hear a radio phone concert. He arrived just in time to hear a familiar voice singing one of his favorite songs. He did not enter the room until the rendition was over. It was his brother singing and he did not want to disturb him although he though it strange that his brother should be in Canada without his knowing it. Much to his surprise he found in the room only the doctor and two or three mutual friends. Before he had a chance to ask any questions the doctor explained to him that he had seen the name of Albert Wiederhold, baritone, on the radio phone broadcasting programme and knowing him to be a brother thought he would give him a little surprise party so that he might hear his brother singing over a thousand miles away.

M. J. Caveney, 3 G G, Sandy Falls Timmins, Ontario, Canada, wrote to W J Z saying: "I am located in the Temagami Forest Reserve in northern Ontario. I have no idea how far I am from Newark, but I know I must be at least one thousand miles away. Anyway, you come in here swell, just like being in the room with you folks over there, and your operator is an old friend of ours—we know his voice so well.

"Last week I took the set back into the bush about twenty miles to a new camp and after scratching around for some soft place for a ground wire, eventually drove a pipe about three feet into the ground and then threw a wire over a tree for an aerial and made my connections.

"Just as I thought, in comes old W J Z and the miners' wives tore the head phones apart all trying to listen at once. I couldn't stand the squabbling so I left the receiver in the hands of the fairer sex and went outside. It was a cold, clear night, five feet of snow and forty-two degrees below zero, and not a sound but the snapping of the trees with the frost; five hundred miles from nowhere and the air full of sweet music. It's great to think of it and compare it with the old days of isolation, when the only song you had outside of the howl of the wolf was the whiz of the chips flying in fighting back a frozen death of an axe.

"The long nights are long no longer—K D K A, W J Z and W D Y are right here in the shack shortly after sundown and come in so plain that the dogs used to bark at you—but they bark no longer, for they know you now as I do and just stop, look and listen."

Frank H. Jones, an electrical engineer, stationed in the middle of Cuba on a sugar plantation, 1,450 miles from Newark, writes that he enjoys W J Z and W D X concerts nightly and sets his watch from the Arlington time signals.

Questions and Answers

E. P. Rush, Roselle, N. J., writes: "Does a crystal need any cleaning or attention?" *Ans.* Yes. It should be washed occasionally with soap and water, using a small, soft brush. If this is done daily it will increase the sensitivity of the crystal and prolong its usefulness.

A. E. S., Ossining, N. Y., inquires: "Can you tell me where 2 B A K is located and who operates it?" *Ans.* A great many have asked the same question and the following answer will serve for all: 2 B A K is located in the Old Post Road Garage at Tarrytown, N. Y., and is operated by Joseph B. Slavin.

W. C., New York, writes: "I live in a house surrounded on all sides by high buildings. Will my location interfere with good reception?" *Ans.* If your aerial is placed above the surrounding objects your position will not make any material difference.

Question No. 2. "What does CW mean?" *Ans.* CW means continuous wave. It is used in radio telephony and can also be used in radio telegraphy.

R. C. writes: "I have a two-slide tuning coil, a Galena detector, a fixed condensor, a pair of 2,000-ohm earphones and a single wire aerial forty feet long. It is properly hooked up and grounded and I can receive only telegraph messages. Can you tell me what the trouble is?" *Ans.* Your aerial is too short. For a single wire aerial you should have at least 100 feet.

S. Weinberg, Rockville Centre, L. I., writes: "Will a crystal set be any good to me up here?" *Ans.* If you have reference to the programmes broadcasted at Newark when you say "any good," the answer is, No. The radius of the crystal set is limited and I would not advise spending money on one if you are over fifty miles from the broadcasting station.

A. B. C. writes: "What is a choke coil?" *Ans.* A choke coil is a coil of wire wound so as to have great self-induction.

Question No. 2: "What is a rectifier?" *Ans.* A rectifier is an instrument used for transforming an alternating or oscillating current into continuous current.

Question No. 3: "Will bakelite make a better panel board than ebony?" *Ans.* Either will make a good panel board but the bakelite is much cheaper.

F. A., New York, asks: "How is a wave length measured?" *Ans.* The usual method is to measure from the crest of one wave to the crest of the succeeding wave.

Be sure to read Bide Dudley's impressions of radio phoning in to-day's paper.

W J Z (Newark) 360 Metres.

Features for the day:

Hourly news service, every hour from 11 A. M. to 8 P. M.

Official weather forecast: 11 A. M., 12 M., 5 P. M., 10.01 P. M.

QUICK RELIEF FROM CONSTIPATION
Get Dr. Edwards' Olive Tablets
That is the joyful cry of thousands since Dr. Edwards produced Olive Tablets, the sustitute for calomel.
Dr. Edwards, a practicing physician for 17 years and calomel's old-time enemy, discovered the formula for Olive Tablets while treating patients for chronic constipation and torpid livers.
Dr. Edwards' Olive Tablets do not contain calomel, but a healing, soothing vegetable laxative.
No griping is the "keynote" of these little sugar-coated, olive-colored tablets. They cause the bowels and liver to act normally.
If you have a "dark brown mouth"—a dull, tired feeling—sick headache—torpid liver — constipation, you'll find quick, sure and pleasant results from one or two of Dr. Edwards' Olive Tablets at bedtime.
Thousands take them every night just to keep right. Try them. 15c and 30c.—Advt.
