Paris—Europa No. 12, near Grand Hotel, and Rueque No. 10, Boulevard des Capucines.

If our friends who favor us with manuscripts for publication wish to have rejected articles returned, they must in all cases send stamps for that purpose.

Consider China!

The philand opponents of our acquiring the Philippines may get some light upon their attitude through considering the recent changes upon the coast of China.

Do they think that Germany's seizure of Kiao Chou Bay, for example, and a territory as large as the State of Connecticut, do no concern to this country?

Do they look on the absorption of China by European powers as beneficial to this country, and strength-giving to our fresh expectations of Oriental trade?

What Unionists Have Felt Themselves Compelled to Do for Ireland.

The debt which Irishmen owe to Mr. Gladstone can be but partially measured by the direct services which he rendered, although he gave them the Land Act of 1870, the Land Act of 1881, and twice strove to give them a separate legislature.

Of great, if not greater, importance are the political and financial concessions which the Unionists themselves have been shamed into making, if only to excuse their opposition to home rule.

The concessions made by the Unionists during the last twenty-two years are distributed by Mr. Russell under the several heads of the land, local government, and relief of the congested districts in the west of Ireland.

In one particular the Unionists have failed to keep their promises to the Irish Catholics; they failed to give them increased facilities for higher education.

Mr. Russell, although himself a Non-conformist, regrets the success of the opposition to Mr. Balfour's plan for an Irish Catholic university.

The Prohibition Plebiscite in Canada.

The prohibition question, which has perplexed politics in the Dominion of Canada for years past, is now to be settled in a new way.

The bill providing for this plebiscite, as it is called in Canada, received the required official assent on June 13, and section 4 having empowered the Governor in Council to fix the day for taking the vote of all Canadian electors qualified to vote at a general Dominion election.

The right of this plebiscite is now being exercised in the Dominion of Ontario and Quebec, the rest being from Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island, and the Northwest Territory.

The gold of the Philippines is produced by washing and dissolving. It is a process that is found in the rivers, and natives are engaged in washing their deposits.

The gold of the Philippines is produced by washing and dissolving. It is a process that is found in the rivers, and natives are engaged in washing their deposits.

The excise taxes paid into the Dominion treasury amount to about \$45,000,000 annually, or more than one-quarter of such collections.

Continuing his account, Sir JOHN proceeds to suggest an explanation why there has been no full development of the wealth of the auriferous regions of the Philippines.

Reformed Municipal Bookkeeping. Last week the League of American Municipalities had a meeting at Detroit, and recreated itself by uttering and hearing a lot of talk about various municipal and miscellaneous reforms and improvements.

Gold in the Philippines. A writer in the Overland Monthly, Mr. HENRY G. HANKS, has been exploring the libraries of San Francisco for historical references to the Philippines as gold-producing territory.

The Contraction of Joe Bailey. When the Hon. JOSEPH W. BAILEY returns to Washington next December it will be seen that he has diminished wonderfully.

Is Mayor FRANCISCO MEGIA of YAUCO, Porto Rico, aware that he is at present one of the most famous of American public men?

To-morrow will begin the nineteenth annual meeting of the League of American Wheelmen.

As helpful to the study of bicycles the most likely of service. Opinions upon the relative merits of different models are expressed freely, and go long way toward influencing manufacturers.

Another witness is M. DE GUIONNE, who visited the Philippines in 1709.

ROBERT MACMICKING published in 1851 his "Revolutions of Manila," and he says: "The gold which is found in Pictas in Measura and at Mambolo, Barcelona and Sarago, is consumed in the country in ornaments, art, and some sent to China."

The fullest and most interesting statement in the mass of testimony which appears in the Overland Monthly is by Sir JOHN BOWRING in 1859.

The gold of the Philippines is produced by washing and dissolving. It is a process that is found in the rivers, and natives are engaged in washing their deposits.

An English Opinion of America's Duty. In our opinion, the Government at Washington will not be doing their duty to the people of the Union unless they insist upon two principles: First, that Spanish rule shall cease absolutely and forever in Cuba, the Philippines, and in Porto Rico.

With the increasing commerce which we may justly expect, our relations with them will be of increasing intimacy.

Exc-Senator Sanders of Montana on the Nation's Destiny and Duty. To the Editor of The Sun:—The terms on which we shall compose our differences with Spain, with a single possible exception, the most momentous question with which American statesmanship has had to deal during the nineteenth century.
