Persia Looms as the One Great Moslem State; Turkey Passing After Centuries of Misrule

Great Britain's Protecting Hand Turns From the Ottoman Empire to the Upbuilding of Shah's Dynasty

By F. CULLEY-WRIGHT

LONDON (uNTH) - The British government has incorporated Lord Curzon's views on the future of Persia in the final movement of which Britain is bound to be a party and the future of Persia as well as the future of the Ottoman Empire to be a great factor in the future of Eastern Europe. The British government has laid down a plan for the future of Persia and for the future of Turkey that is in harmony with the views of Lord Curzon.

The Persian statesman, who has been described as a man of the future, has expressed his views on the future of Persia and on the future of Turkey in a speech delivered to the British parliament. He has said that the future of Persia is to be decided by the British government, and that the future of Turkey is to be decided by the British government.

The Persian statesman has said that the British government has already decided that the future of Persia is to be decided by the British government, and that the future of Turkey is to be decided by the British government.

The British government has also been described as a man of the future, and it has been said that the British government has already decided that the future of Persia is to be decided by the British government, and that the future of Turkey is to be decided by the British government.

History of the Pumpkin

The pumpkin is a member of the squash family, and is native to the Americas. The pumpkin has been cultivated for thousands of years, and has a long and fascinating history. The pumpkin was first domesticated in Mexico or Central America, and was later spread to other parts of the Americas.

The pumpkin was first brought to Europe by the Spanish, who used it as a food source. It was later introduced to Asia, where it became a popular vegetable. The pumpkin is now grown in many countries around the world, and is a staple food in many cultures.

The pumpkin is a large, edible squash, and has a thick, green shell. The flesh is orange, and has a sweet, nutty flavor. The pumpkin is a good source of vitamins A and C, and is also a good source of fiber.

The pumpkin is a popular vegetable in many cultures, and is often used in soups, stews, and other dishes. It is also a popular treat during the fall season, and is often used in pumpkin pie, pumpkin bread, and other pumpkin desserts.

The pumpkin is a member of the Cucurbitaceae family, which also includes cucumbers, melons, and gourds. The pumpkin is a large, edible squash, and has a thick, green shell. The flesh is orange, and has a sweet, nutty flavor. The pumpkin is a good source of vitamins A and C, and is also a good source of fiber.
