

COLLISION OF TWO STEAMERS

She Goes Down and Fourteen Sons, Including Captain, are Drowned.

The Vessel Which Escaped Serious Injury Drifted Away Without Offering Assistance to the Occupants of the Steamer She Had Sunk.

Cardiff.—The British steamer Heliopolis collided Saturday at midnight with the British steamer Orlanda, outward bound from Penarth.

The Orlanda sank and fourteen persons, including her captain, were drowned.

The night was clear, but there was a gale blowing and a heavy sea running. The Orlanda, which was coal-laden for Spezia, was struck between the engine room and the stoke hole and was so badly damaged that she began immediately to fill and heeled over, sinking in half an hour.

The Heliopolis drifted away without rendering any assistance.

The captain mustered all the Orlanda's nineteen men on deck. Each was given a life-belt and jumped into the sea. Six of them reached a water-logged lifeboat, the only boat it was possible to launch, the other having been smashed at the time of the collision, and all of them, with the exception of one who died from exhaustion, were rescued by a pilot boat, after suffering greatly from exposure.

The Heliopolis had been chartered to convey 2,000 Spanish emigrants to Honolulu. In a letter to Lloyd's Shipping Gazette the ship brokers said they had arranged the charter in behalf of the American government, but it was stated elsewhere that the Spaniards had been engaged by Hawaiian sugar interests to replace Japanese laborers. The Heliopolis was at Barry, Wales, Saturday and was to proceed thence to Malaga for the immigrants.

The Orlanda was built in 1879 at Liverpool. She was of 1,500 tons displacement and belonged to the Oriental Steamship company of Liverpool.

MAKE A FETISH OF SOLDIERS.

Rabbi Gives Reasons Why Women Should Be Allowed to Vote.

Chicago.—Rabbi Emil G. Hirsch, addressing an audience at a mass meeting under the auspices of the National American Women's Suffrage association on Sunday, scored the tendency which he declared prevails, both in this country and abroad, to make a fetish of the soldiers and glorify agents designed for the destruction of human beings.

"The military idea," he asserted, "which among the earliest civilized nations caused war gods and the warriors to be so absorbingly worshipped that female children, because of the unfitness of the sex for war service, were destroyed at birth, is the reason why today man has not granted and refused to grant to woman the right to vote in matters of public policy."

His conception of the ideal government, he said, was one founded on the home, in which the mother and other women were endowed with the right to a vote at the ballot box on all questions pertaining to the government of that home and its children, as well as on the larger questions.

Woman Charged With Killing Her Mother.

New York.—Mrs. Lottie Wallen, wife of Leopold Wallau, a wealthy importer of bronzes, was arraigned before Coroner Acritello Monday charged with murder in the first degree in having caused the death of her mother, Mrs. Ida Binge, by the use of poison. She was held without bail.

Mrs. Binge, a wealthy widow, who lived with her daughter, died February 6, three weeks after an operation for cancer. An analysis of the contents of the woman's stomach showed that she had been poisoned.

Japs Are Not Satisfied.

Tokio.—No official step has yet been taken looking to a settlement of the California situation in accordance with the agreement reached between President Roosevelt and the San Francisco authorities, but should it be effected on that basis the government must be prepared to cover the cost of a building and making an exhibit for Kansas. W. D. Webb, the special commissioner of the exposition company, has been working enthusiastically up for the project and getting the members of the house and senate interested enough to vote for the project.

Kansas Getting Excited.

Topeka, Kan.—A bill appropriating \$75,000 for the Alaska-Yukon-Pacific exposition will be introduced in the senate by the committee on ways and means. The exposition is to be held in Seattle in 1909, and the appropriation is to cover the cost of a building and making an exhibit for Kansas. W. D. Webb, the special commissioner of the exposition company, has been working enthusiastically up for the project and getting the members of the house and senate interested enough to vote for the project.

Corbett Dies of Heart Failure.

San Francisco.—Harry Corbett, the well known sporting man, brother of James J. Corbett, former heavyweight champion pugilist of the world, and of Joe Corbett, the baseball pitcher, died suddenly Saturday morning of an attack of heart failure, at his home in this city. Corbett arose at 7 a. m. and went to the bathroom. Shortly afterward his young daughter was awakened by the sound of running water and went to the bathroom where she found her father lying on the floor in an unconscious condition.

TO GIVE THE PRESIDENT POWER OF EXCLUSION

The Administration Plan for the Settlement of the Japanese Problem Passes the Senate.

Washington.—The administration plan to settle the California-Japanese situation was approved in the senate Saturday by the adoption of the senate committee report on the immigration bill. This report contains a provision which authorizes the president to exclude Japanese laborers from the United States at his discretion.

The report will now go to the house for its approval, which, it has been stated, is assured.

The entire day was devoted to debate on the report. The opposition presented as an alternative plan a resolution instructing the conferees to bring in a provision positively prohibiting the entrance of Japanese laborers. It was declared not in order, and, on motion of Mr. Lodge, an appeal from the ruling was defeated, 45 yeas, 24 nays, being practically a party vote. The conference report was then adopted without a roll call.

CROWDED CARS JUMP TRACK.

Awful Wreck in Which Twenty-two Are Killed and Fifty Injured.

New York.—Eighteen passengers were killed outright, four others having since died of their injuries, and at least fifty more were more or less seriously injured in the wreck of the White Plains and Brewster express on the Harlem division of the New York Central & Hudson River railroad near Woodlawn road, in the Bronx borough of Greater New York, Saturday night.

At Woodlawn road the four tracks run through a rocky cut and take a sharp curve. When the train reached the curve it was running at a speed estimated by some at sixty miles an hour. Both motors and the smoking car swung safely around the curve, but the other cars left the rails and plunging over on their sides with a terrific crash, tore up the tracks for a hundred yards before they collapsed. Of those instantly killed, by far the greatest number were women. Many were mangled beyond recognition.

Many of the injured were quickly extricated from the wreckage, while others were so pained that they could not be taken out for some time. The cause of the wreck has not been officially determined. At the Grand Central station there is inclination to blame the accident to spreading rails, but later it was said that it was believed that the action of the first passenger coach broke.

LUMBERMEN CLOSE CONVENTION

Salt Lake Man Re-elected President—Tacoma Gets Next Convention.

Salt Lake City.—With the election of officers and the passing of resolutions the Western Retail Lumbermen's association concluded its convention at Armory hall Saturday afternoon. Some of the executive business scheduled for Friday afternoon was not completed, but was carried over till Saturday and disposed of at a morning session.

George E. Merrill of Salt Lake was re-elected president. The other officers elected are: H. D. Andrews, Caldwell, vice president; E. E. Robbins, Riverton, Wash., W. P. Monson, Preston, Ida.; D. R. Beebe, Provo, directors for two years; J. M. Hunt, Bozeman, Mont., and T. B. Bartlett, Lewiston, Ida., directors for three years.

The convention of 1908 will be held at Tacoma, Wash.

Senator Clark of Montana Criticizes the President.

Washington.—In the senate on Saturday Senator William A. Clark made a vigorous speech in support of Culbertson's amendment to the immigration bill providing that the provisions relative to Japanese immigration regulations be considered separately from other features of the bill. He also criticized the action of President Roosevelt for his interference with local regulations of San Francisco in dealing with Japanese attendance in public schools.

After School Furniture Trust.

Chicago.—Frederick A. Holbrook, chairman of an association of manufacturers which is alleged to constitute a trust in controlling prices of school and church furniture, was arrested Saturday on a warrant from the federal court on complaint of Harry B. Duncan, special agent of the department of justice. Holbrook is accused of conspiring with E. H. Stafford, president of the Stafford Manufacturing company of this city, to restrain trade in violation of the Sherman anti-trust law.

A Double Murder.

Trinidad, Colo.—A double tragedy was enacted Sunday evening when J. Tafey, a Mexican, shot and mortally wounded Juan Griggs at Segundo, sixteen miles from here, and then rode ten miles to wreak his vengeance on another at Sopris, six miles west of this city, where he shot and killed an American named Grivity. The alleged murderer at once gave himself up and was taken to Trinidad. The prisoner refused to talk further than to say that he was justified in both cases.

Dog Savagely Attacks Woman.

Philadelphia.—Savagely attacked by a vicious bulldog which for hours had been brooding about a beating it had received, Mrs. Lena Smith, 38 years old, for twenty minutes was at the mercy of the beast, and but for the arrival of her husband would have probably been killed. Only when beaten into insensibility and its jaws pried open with an iron poker did the dog release his hold upon his helpless victim. Mrs. Smith is in a critical condition.

PINE TREE BREAD.

KAMCHATKANS USE THE INNER BARK OF PINE TREES.

Macerate it in Water and Bake Good, Wholesome Bread—The Pine Keeps the Blood Pure and The Body Healthy.

In Kamchatka the people live in earth-covered pits. Mr. Kennan compares the sound of their language to that of water running out of a narrow-mouth jug. Their bread is made from the inner bark of the Pine Tree, macerated in water and baked without flour. They are a hardy race, the Pine keeping the blood pure and the various organs of the body in a healthy condition. Consumption is unknown among them.

A noted specialist in throat and lung trouble, who established a camp for consumptives in the Pine Woods of Maine, and whose remarkable cures there have attracted great attention from the medical world, says the one-half ounce of the Pure Virgin Oil of Pine, mixed with two ounces of Glycerine and one-half pint of good Whisky and used in teaspoonful doses, will heal and strengthen the lungs, break up a cold in twenty-four hours, and cure any cough that is curable. The ingredients can be secured from any prescription druggist at small cost.

Inquiry at the prescription department of a leading local druggist elicited the information that the Pure Virgin Oil of Pine is put up only in half-ounce vials for dispensing. Each vial is securely sealed in a round wooden case, with engraved wrapper, showing the name—Virgin Oil of Pine (Pure) guaranteed under the Food and Drug act, June 30, 1906. Prepared only by the Leach Chemical Co., Cincinnati, O.—plainly printed thereon. There are many rank imitations of Virgin Oil of Pine (Pure), which are being put out under various names, such as Concentrated Oil of Pine, Pine Balsam, etc. Never accept these as a substitute for the Pure Virgin Oil of Pine, as they will invariably produce nausea and never effect the desired results.

Fire Record for Last Year.

The fact that when a severe becomes a cruel foe is suddenly developed is attested by the dreadful havoc and loss of life occasioned by fire in the United States within the 12 months covered by a summing up of these losses for 1906. This record shows that nearly 7,000 lives were lost and more than \$500,000,000 worth of property was destroyed by fire during that period. In no other country in the world is the fire loss, in bulk or pro rata, anywhere near our own. Last year, owing to the devastating fire that followed the earthquake in San Francisco, this loss was in great excess of the average, but the average for some years past has been \$200,000,000 a year.

Two Rules for Good Carriage.

If you are walking along the street and wake up to the fact that you are carrying yourself poorly take the mental attitude of standing straight, as well as the physical one. Look at the men you meet and imagine that each of them owes you a dollar. Put even a suggestion of arrogance into your position. Hold your head well back and look squarely in the face. This will not only give the impression to others that you possess the power you want, but it will actually tend to bring that power. Keep the neck against the collar.—World's Work.

Insect Drunkards.

Insects that enter their own public houses, and get intoxicated just like human beings, was the charge made by Prof. Bottomley in a lecture at the University of London, South Kensington. The leading public house in the insect world, according to Prof. Bottomley, is the wild arum. It looks like a large lily, and its big, dark shaft extending upward is the sign that attracts the insects. They climb down into the nectar pit beneath the flower's bags of pollen, and there the orgy commences.

Time and Toide.

Mrs. Hooligan was suffering from the common complaint of having more to do than there was time to do it in. She looked up at the clock and then slumped the iron she had lifted from the stove back on the lid with a clatter. "Talk about time and toide wait 'er fer no man," she muttered as she hurried into the pantry; "there's times they waits, an' times they don't. Yishterday at this blessed minute 'twas but tin o'clock, an' to-day it's a quarter to twelve."—Everybody's.

DREADED TO EAT.

A Quaker Couple's Experience.

How many persons dread to eat their meals, although actually hungry nearly all the time! Nature never intended this should be so, for we are given a thing called appetite that should guide us as to what the system needs at any time and in any place.

But we get in a hurry, swallow our food very much as we shovel coal into the furnace, and our sense of appetite becomes unnatural and perverted. Then we eat the wrong kind of food or eat too much, and there you are—indigestion and its accompanying miseries.

A Philadelphia lady said the other day: "My husband and I have been sick and nervous for 15 or 20 years from drinking coffee—feverish, indigestion, totally unfit, a good part of the time, for work or pleasure. We actually dreaded to eat our meals. "We tried doctors and patent medicines that counted up into hundreds of dollars, with little if any benefit. "Accidentally, a small package of Postum came into my hands. I made some according to directions, with surprising results. We both liked it and have not used any coffee since. "The dull feeling after meals has left us and we feel better every day. We are so well satisfied with Postum that we recommend it to our friends who have been made sick and nervous and miserable by coffee." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in page. "There's a Reason."

THE PRESIDENT GAINS PARTIAL VICTORY ONLY

Public Lands Committee Does Not Agree With His Position on Coal Lands Question.

Washington.—A bill conforming in a measure to President Roosevelt's recommendation for the leasing of coal lands by the government rather than for their sale was decided upon Friday by the house committee on public lands.

On Wednesday the committee reported a bill which was widely at variance with the suggestions made in the president's message on coal lands sent to congress the same day. The committee was unaware of the message until after it had reported the bill, and Representative Lacey, the chairman, suggested a reconsideration.

The committee on Friday added a leasing clause to the bill, but no agreement could be reached on such a general leasing plan as the president desires. The bill as amended authorizes the president to lease any coal lands with a royalty of not more than 2 cents a ton and provides that the lands may be withdrawn from entry after they are leased, but not before. The amount to be leased to any one person is limited to 2560 acres.

President Roosevelt wanted all coal land withdrawn from entry at once, "if the general withdrawal is strongly opposed by western members, who are not willing to have any more land go into government reserves."

MILLIONS FACE STARVATION.

Russian Leader Tells Awful Tale of His People's Condition.

New York.—Alexis Alladin, leader of the Peasant party in Russia, arrived here Friday. Alladin said that he would not be surprised if the new doomsday is never organized.

"It is now too late to stay the progress of liberty in Russia," he said. "The liberal sentiment is so general that it will come to the front in spite of all the government opposition."

"The conditions in Russia have not improved during the last year. Thirty millions of people in Russia are today practically upon the point of starvation, and during March, April and May it is likely that a million people will die. It is my desire to appeal to the American people to help my distressed country, but whatever money may be raised here, I don't want it to fall into the hands of the Russian government officials. The American relief committees should have their own representatives in Russia to distribute the funds. The Russian government does not grant a constitutional form of government, the greatest strike in the history of the world will follow. It will be a greater strike than that of 1906."

CONDUCTOR PROVES HERO.

Saves His Passengers in Time of Panic, But is Himself Injured.

Silverton, Colo.—Twenty passengers, including one woman, in the south-bound passenger train on the Gladstone & Northern railroad, were saved from injury and possibly death Friday through the bravery and presence of mind of Conductor Carl Barnes.

A mile from Silverton the rear coach broke loose and began to run back down the steep grade. The passengers, panic stricken, rushed in a body for the platform, but Conductor Barnes restrained them and assisted them, one by one, to jump off the rapidly moving car.

As Barnes was about to jump the car left the track and rolled down an embankment. Barnes was badly crushed about the hips and body.

Adams Jury Selected.

Wallace, Ida.—A jury for the trial of Steve Adams, charged with the murder of Fred Tyler and implicated in the murder of ex-Governor Steunenberg, was completed Friday, as follows: Geo. Wilson, mining man; A. R. Leard, retired; Jacob Frank, miner; George H. Curtis, employe of morning paper; Harry Wilson, mining man; Pink Rogers, candyman; John Furst, hotel proprietor; Peter Doyle, employe Heala mines; Frank J. Riding, merchant; H. E. Ellers, dairyman; J. E. Connors, retired; J. Vanderwerker, miner.

Mrs. Bradley Charged With Murder.

Washington, D. C.—The grand jury of the District of Columbia returned an indictment on Friday against Anna M. Bradley for murder in the first degree for shooting ex-Senator Arthur Brown, of Salt Lake, at the Raleigh hotel, December 8 last. Mrs. Bradley was directed held by the coroner's jury at the inquest immediately following the death of Brown. She has since been in the district jail, held without bail to await the grand jury's action.

Jute Trust is Blamed.

Philadelphia—Counsel for the Jas. P. Dunlap Carpet company, which operates large mills in this city, announced Friday that the company is temporarily embarrassed. It was stated that in round figures the liabilities are \$600,000. The reasons of the embarrassment are said to be the failure of tentative subscribers to the company's stock to pay for it, and the fact that James Dunlap, the president of the company, had "run up against the jute trust."

Ties Woman to Wall, Then Robs the House.

San Francisco, Cal.—An unknown man forced his way into the house of Mrs. Mildred Cozue, 1532A Sanchez street, Friday afternoon in the absence of her husband, tied her hands and feet, drove a spike into a wall of the bath room and tied her to the spike. He then proceeded to rob the house, securing about \$12. Mrs. Cozue remained secured until her brother-in-law returned at 4 o'clock and hearing her cries released her.

EARLY NORTHWEST VOYAGES.

Some Account of the Arctic Trips That Have Been Made.

Beginning with the American discoveries of John Cabot in 1497, the search for the northwest passage was for many years the object of rival expeditions from Denmark, England, France and Portugal, says A. W. Greely, in the Century. It was Frobenius, however, who in 1576-78 first gave a distinct national character to the quest. John Davis of Davis' strait followed in three voyages, 1585-88, and then, in 1612, came the illustrious and hapless Henry Hudson, whose motto was that explorers should "sachieve what they had undertaken or else give reasons wherefore it will not be."

The search for the Atlantic side closed for two centuries with the voyage of a great seaman, William Baffin, who, in a tiny boat of 55 tons, with a miserable equipment, but with an undaunted heart, attained, in 1616, the highest north in the western hemisphere, 77 degrees 45 minutes N., and discovered three radiating sounds, Jones, Smith and Lancaster, the last being the eastern entrance to the long sought passage.

BABY TORTURED BY ITCHING.

Rash Covered Face and Feet—Would Cry Until Tired Out—Speedy Cure by Cuticura.

"My baby was about nine months old when she had rash on her face and feet. Her feet seemed to irritate her most, especially nights. They would cause her to be broken in her rest, and sometimes she would cry until she was tired out. I had always used Cuticura Soap myself, and had heard of so many cures by the Cuticura Remedies that I thought I would give them a trial. The improvement was noticeable in a few hours, and before I had used one box of the Cuticura Ointment her feet were well and have never troubled her since. I also used it to remove what is known as "cradle cap" from her head, and it worked like a charm, as it cleaned and healed the scalp at the same time. Now I keep Cuticura Ointment on hand in case of any little rash or insect bites, as it takes out the inflammation at once. Perhaps this may be the means of helping other suffering babies. Mrs. Hatfield Currier, Thomaston, Me., June 9, 1906."

SOME NEW FRENCH KNIGHTS.

Queen of Holland Has Agreed to Recognize Vatican Titles.

Among the lucrative sources of revenue of the pope before the separation of church and state in France was the toll or tax on titles of nobility and decorations. Since the rupture of the French government no longer recognizes the ennobling titles and decorations of the holy father. To have the right to wear the Vatican ribbon, or to be called count, it was necessary to obtain a confirmation of title. This gave much perplexity to the candidates.

The question has just been settled. Queen Wilhelmina has consented to validate such titles and distinctions. The result has been an amusing pilgrimage to The Hague—and also in an increase in the price of these pontifical favors.

In the last few weeks the French Knights of the Golden Spur, of the Holy Sepulcher, of Christ, of Gregory the Great, of Pius IX, have greatly increased.

HOME-MADE CATARRH CURE.

Sufferers Should Make This Up and Try It Anyway.

Any one can mix right at home the best remedy of its kind known. The name "Cyclone" is given to the following prescription, it is supposed, because of its promptness in driving from the blood and system every vestige of catarrhal poison, relieving this foul and dread disease, no matter where located. To prepare the mixture: Get from any good pharmacy one half-ounce Fluid Extract Dandelion, one ounce Compound Kargon and three ounces Compound Syrup Sarsaparilla. Shake well and use in teaspoonful doses after each meal and at bedtime.

This is a harmless, inexpensive mixture, which has a peculiar action upon the eliminative tissues of the kidneys, assisting them to filter and strain from the blood and system all catarrhal poisons, which, if not eradicated, are absorbed by the mucous membrane, and an open sore or catarrh is the result.

Prepare some and try it, as it is the prescription of an eminent catarrh specialist of national reputation.

The Way You Look at It.

"Gaze upon that pure, beautiful evening star, and swear to be true while its light shall shine! Swear, my love! Swear by Venus!" exclaimed a youth in impassioned accents.

"How stupid you are!" answered the girl. "That is not Venus. The right ascension of Venus this month is 16 hours, 9 minutes; her declination is 17 degrees, 25 minutes south, and her diameter is 10.3 seconds."—Exchange.

A Mortifying Answer.

Richard, aged seven years, in company with his parents, was visiting a friend. At the dinner table he was asked to have some cake. He hesitated.

"Say, quickly, Richard! Will you have some cake?" said his mother.

Imagine her chagrin when Richard replied: "If it's the kind we have at home, I don't want any."

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

American Hens Did Well.

A SURE INVESTMENT

LOTS IN EAST GARFIELD

A suburb of Salt Lake City where three steam railroads run by and the Harriman Electric Franchises through the town. Only 25 minutes ride to the center of Salt Lake City.

TEN MILLION DOLLAR EXPENSES expended in works by the Garfield smelters which will give employment to thousands of people who must have houses and as East Garfield is the only town in easy walking distance the lots are rapidly being sold. Ten business houses now flourishing and more coming. Present prices will advance soon so buy now while there are cheap. Size of lots 25x121 feet, corners 25 feet. Prices \$40 to \$250 each. Terms: one-fourth cash, balance in six equal monthly payments. Liberal discount for cash.

For maps and other information address as on file.

East-Rooklidge Investment Co.

Hooper Bldg., Salt Lake City, Utah. Reference, Walker Bros' Bank.

AFTER NEARLY TWO YEARS

We are able to announce that our Water Repeating Department has been enlarged sufficiently to PROMPTLY take care of all cases of Catarrh.

ESTABLISHED 1862

Park's

170 MAIN ST. SALT LAKE CITY, UTAH

Ninety-Nine Year Leases.

Ninety-nine year leases are said to have been their origin in England. In Queen Elizabeth's time a law was made prohibiting property owners from renting their ground or buildings for a longer period than 100 years, and thereafter the 99 year lease became popular. At one time there was a statute in the Illinois code by which the length of a lease was limited, but this later was declared unconstitutional.

The Youthful Mind.

Among the answers to questions at a recent school examination appeared the following: "Gross ignorance is 144 times as bad as just ordinary ignorance." "Anchovy is an old fashioned hermit sort of a fellow who has anchored himself to one place." "The liver is an infernal organ." "Vacuum is nothing with the air sucked out of it put up in a pickle bottle—it is very hard to get."

Somewhat Growsome Humor.

A well-known city officer in Auld Reekie was celebrated for his cunning and wit. His mother having died in Edinburgh, he hired a hearse and carried her to the family burying place in the Highlands. He returned with the hearse full of smuggled whisky, and being teased about it by a friend, he said: "Oh, man, there is no harm done! I only took away the body and brought back the spirit."

Keep Moving.

The heavens themselves run continually round the world in never still; the sun travels to the east and to the west; the moon is ever changing in its course; the stars and planets have their constant motions; the air we breathe is continually agitated by the wind, and the waters never cease to ebb and flow—doubtless for the purpose of their observation and to teach us that we should ever be in action.—Burton.

The Changes of Time.

The physical characteristics of the English are altering rapidly says a writer. The tall, graceful woman with the finely shaped head, well chiseled nose, kindly eyes, sweet smile, small feet and hands, and light tread is almost extinct; she is being replaced by big-madame women, with a firm chin, hard-looking, and taking long, devious strides.

Prosy Talk After Dinner.

From New York comes a wall of agony. It is the despairing cry of the bored diner; the man who goes to a banquet and has his entire evening spoiled by the stupid speeches which top off the feast. He even threatens to forego this feeling; a terrible threat for a metropolis and an index of the greatness of the evil and its accompanying torture.

Suicide Among Negroes.

The number of negroes committing suicide is increasing rapidly each year, but before emancipation such things as a negro killing himself was almost unheard of. Now they occur with great frequency.

"Poodles and the Man."

At a tea party the conversation turned first upon the poodles and then upon men, and one of the ladies asked deaf old Aunt Thekla, apropos of the last subject, which she preferred, fair or dark. "O," said the old lady, thinking they were still on the poodles, "I like them quite black; they don't get dirty so soon."

The World's Habit of Ill-Using.

Though my complaint of the world is new, its habit of ill-using is very ancient.—Columbus While in Chains.

No Good in Whining.

Whining is a poor investment for a young man to make. It never pays dividends. The person who sits back and complains because things aren't different makes little progress. The man who makes the best and the most of his surroundings and keeps his nature cheery is the one who is the most likely to move up and to get ahead.

A Daily Thought.

We ought to call in reason like a good physician, as a help in misfortune.
