FACTS OF FORUNE OR FALLACIES OF FANCY

Are you vicor in one or victim of the other? If the former, you will devote your moment to us; if the latter, you will appreciate the frankness of our statements.

The Nevada Prospecting and Mining Company has been organized with the purpose to view, with all stock selling, but of making money in Goldfield.

The management of this proposition realize the vast possibilities of the ways of this Bonanza, and it is upon an actual knowledge of conditions that its plan of operations is based.

We believe that no company now offering stock is able to show you an opportunity to get closer to the real ground floor than this, and we feel that you will agree with us on this point when our plan of operations has been fully explained to you.

The Nevada Prospecting and Mining Company does not only offer to take you on the same basis with the promoters, but on the same basis with the prospectors. It is no use as close as the capital in order to get your turn of mining as it is possible for you to get without actually shoveling your pick and going to the hills.

In the beginning the Company acts practically as one who grabs the prospector is his work. These prospectors are sent out under the guidance of the best information as to recent development and the advice of conservative mining men of practical experience. In this manner opportunity will be neglected to assure claims in the most promising sections, not alone of Goldfield, but of every section of Nevada. Consider that as Goldfield is developing some wonderful things today, other districts are coming to light to the south of this section may be equally wonderful tomorrow. This is the province of our Company to go into these fields with the prospectors and all developments. In a section as new with thousands of possible mineral territory comparatively unexplored, we realize that the prospector is one of our most valuable assets and that the possession of property valued in the hundreds of thousands may be made to keep and maintain a corps of competent prospectors is the basis for our undertaking.

As a result of the work of our prospectors we have found the so-called "Nanana" and "Homestead" claims on the Ormsby Gold Mountain, hard stock west of Goldfield in one of the most promising of the prospiring areas, one the claim of the Central and Gold Mountain (Crest), and so many other such claims in the Crystal Spring (Bullfrog District, just east of the Mosquito Range) and on the east side of the Gold Mountain District with good showing.

The "Central" claim we consider one of the best belonging to the Company. Our miners are now sinking a shaft of the extent and intervening the values which have hidden for centuries. A short distance to the north, on the line of an early tory dyke, is the "Montgomery-Shushun," and to the north several more productive ones have been added on the same dyke.

The possibility of the development of those properties to a self-sustaining basis, and of heating and breaking the value of the valuable holdings, as has been shown, only limited by the funds with which we have to work, the profit-bearing stage is reached.

At the officers and promoters of this Company have displayed their confidence in the undertaking by investing their capital therein. To better supply the necessary capital the Treasury Stock of the Company has been placed on the market.

WM. A. MARSHALL, President

The Nevada Prospecting and Mining Company has been organized under the Federal laws of the District of Columbia, with a capital stock of $1,000,000 shares, par value $1.00 each. Of this the generous sum of $1,000,000 shares have been placed in the Treasury after the consummation of all of the preliminary work and the acquisition of the valuable holdings mentioned above. For a limited time this stock will be on the market at a low figure, but in view of the increasing value of our holdings an advance will be made on an early date.

We believe that this is the opportunity that you have been seeking to make money in Goldfield. We feel that we will here have a combination of capital, energy, experience and ability that will put our proposition out of the category of "huck," on a safe business basis.

We feel that you cannot but be impressed with the plan of operation and opportunities for good profit assured by our Company. The entire operation hinges, you should conclude, on the charter of the management and of the officers and directors of the Company. The reputation of those who have been selected to carry on the business of the Nevada Prospecting and Mining Company I believe, and in this regard have not been shown to be in this respect. Nevada was a rich field for the operation of such a federation and the results of the enterprise I think further the opinion. We have three men at work on our Bullfrog claims and are rapidly developing one of the best looking properties in the district, consider the amount of development accomplished.

There is a few fine feet across, which is exposed on the surface for several hundred feet, and it is on this ledge that we are presenting development work. A good shaft has been made within five hundred feet of our "Central" claim and we are endeavoring to locate the "pay streak" of our own ground.

Our superintendent reports that they are making good "pansing" and the indications are that we shall have one of the best properties in the district. As to the matter of fact, I had a bona fide offer for the "Central" claim which if accepted would have enabled the directors to declare a dividend sufficient to copy every dollar received by the Company for the stock that up to this time has been issued. As this offer comes from a con

SERVICES OF THE COMPANY

The stock of the Company have commented on the fact of our locating several claims which we have been able to purchase by this time. The fact is, our prospectors and instructions when they started to locate holdings in the District was not worthy of development. As a result we have nothing but claims properly located and which give promise of developing into bonan

Mr. J. F. Mitchell has visited the "Central" claim and I attach his report.

Bullfrog, Nev., June 7, 1905.

Nevada Prospecting and Mining Company.

Gentlemen:

Attached to your request, I have examined the "Central" claim at Bullfrog, and I believe I agree with your opinion: The claim is a valuable one, particularly as it is running from the property of the Mont-
