Ayer's
Hair Vigor,
For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and a grateful perfume.

Ayer's Cherry Pectoral,
For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as the skill displayed by pulmonary compounds. Through a long series of years, and among all nations, the fame of these it has risen higher and higher as their extraordinary virtues have become better known. Innumerable processes against them, while subjected to the severest forms of disbelief and to every test that could be applied, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a protection against sudden attacks of *Croup*, it should be kept at hand in every family, and indeed no one is exposed to such sudden and fatal coughs as should be provided with this antidote for them.

Although settled *Consumption* is thought incurable, still great numbers of cases in which the disease seemed settled, have been completely cured, and the patient restored to sound health by the *Cherry Pectoral*, so complete is its mastery over the disorders of the lungs and throat, that even a shadow of them yields to it. When nothing else could reach them, under the *Cherry Pectoral* they subside and disappear.

Sleeplessness and great prostration follow ill.

Asthma is always relieved and often wholly cured by it.

Bronchitis is generally cured by taking the *Cherry Pectoral* in small and frequent doses.

So generally are its virtues known that we need not publish the certificates of them here, for those about us and the public read it constantly and fully maintained.

Ayer's Ague Cure.
For Fever and Ague, Intermittent Fever, Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bilious Fever, &c., and indeed all the affections which arise from malarious, marsh, or miasmatic poisons.

It is a sure remedy; it does Cure, and does not fail. Containing neither Arsenic, Quinine, Bismuth, Mercury, nor any other mineral or poisonous substance which is liable to produce injurious effects. The importance of a cure in the ague-districts literally beyond account, and we believe it can be justly classed in the history of American medicine. Our pride is gratified by the acknowledgments we receive of the radical cures effected in obstinate cases, and where every remedy had failed.

Thousands of persons, either resident in, or travellers through districts affected by, Ague, are protected by taking the *Ague Cure* daily.

For *Liver Complaints*, arising from torpidity of the Liver, it is an excellent remedy, stimulating the Liver into healthy activity.

For Bilious Disorders and Liver Complaints, it is an excellent remedy, producing many truly remarkable cures, where other medicines had failed.

Prepared and Sold by J. C. AYER & CO., Practical and Analytical Chemists, Lowell, Mass., and sold all around the world.

THE CHRONICLE.

THE FARM-YARD SONG.
BY J. J. TROWBRIDGE.

Over the hill the farm-boy goes,
His shadow lengthens along the land,
A giant staff in a giant hand;
In the poplar tree, above the spring,
The katydid begins to sing:
The early dews are falling—
Into the stone-heap darts the mink;
The swallows skim the river's brink;
And home to the woodland fly the crows,
When over the hill the farm-boy goes,
Cheerily calling,—
"Co', boss! co'; boss! co'! co'! co'!"
Farther, farther over the hill,
Faintly calling, calling still,—
"Co', boss! co', boss! co'! co'! co!"

Into the yard the farmer goes,
With grateful heart at the close of day:
Harness and chains are hung away;
In the wagon-shed stand yoke and plow:
The straw's in the stack, the hay in the mow,
The cooling dews are falling—
The friendly sheep his welcome bleat,
The pigs come grunting to his feet,
The whinnying mare her master knows,
When into the yard the master goes,
His cattle calling,—
"Co', boss! co', boss! co'! co!"
While still the cow-boy, far away,
Goes seeking those that have gone astray,—
"Co', boss! co', boss! co'! co!"

Now to her task the milkmaid goes,
The cattle come crowding through the gate,
Lowing, pushing, little and great;
About the trough, by the farm-yard pump,
The frolicsome yearlings frisk and jump,
While the pleasant dews are falling:—
The new milch heifer is quick and shy,
But the old cow waits with tranquil eye,
And the stream into the bright pail flows,
When to her task the mildmaid goes,
Soothingly calling,—
"So, boss! so, boss! so! so!"
The cheerful milkmaid takes her stool,
And sits and milks in the twilight cool,
Saying, "So! so, boss! so! so!"

To supper at last the farmer goes,
The apples are pared, the paper read,
The stories are told, then all to bed.
Without the crickets' ceaseless song
Makes shrill the silence all night long;
The heavy dews are falling.
The housewife's hand has turned the lock;
Drowsily ticks the kitchen clock;
But still in sleep the farm-boy goes
Singing, calling,—
"Co', boss! co', boss! co'! co'! co!"
And off the milkmaid in her dreams,
Drums in the pail with the dashing streams,
Murmuring, "So, boss! so!"

Cooking Feed for Horses.
A writer in the Journal of Agriculture says: Last winter I had a lot of fine rye, which I could not sell at a remunerative price, hence I concluded to feed it to the horses instead of corn, which was $1 a bushel. First I had the rye ground, mixed the meal with cut oats, moistened with hot water, and fed at the rate of about three half bushels baskets a day to each horse. The animals kept in tolerable condition, but did not improve as much as I desired. Besides the miller's toll was much heavier than I liked. I then commenced cooking the whole rye in a large iron caldron, set in brick.

One bushel of rye with four or five buckets (about eleven gallons) of water, and seasoned with a handful of salt, were cooked with very little fire in the afternoon for next day's feeding, and fed at the rate of five quarts of the cooked mess a meal.

I observed this: that one bushel of rye uncooked will give six meals, and when cooked twelve; that the uncooked grain is very imperfectly digested and requires hogs to follow the horses, and the cooked grain is completely digested; that the horses rapidly gain flesh, not in fat, and enjoy excellent health. I follow this practice still—am feeding now, wheat which costs 70 cents a bushel, and find the trouble and extra labor of cooking the feed every other day very small. A boy ten years generally manages the whole operation inside of half an hour.

Ill health is often generated by bad treatment of the feet. The pores are not repellants, but absorbents, and this foetid matter, to a greater or less extent, is taken back into the system. The feet should be washed every day with pure water only, as well as the arm-pits, from which an offensive odor is also emitted, unless daily ablution is practi ced.

THE CHRONICLE.

Cast Thy Bread, &c.
The Piqua (Ohio) *Journal* tells the following good story:

An African M. E. Church, not far from Piqua, numbers among its membership a masculine who is noted for his zeal in contributing to the coffers of the Lord. Though but poorly supplied with this world's goods, he gives liberally of his scanty means at all church collections, feeling assured that his donations will be doubly returned to him in the way of divine blessings and favors. Some evenings since, a collection was taken up at the church in question for a charitable object. The amount received being meager, our hero, who was present, expostulated with his brethren and sisters in this wise:

"I tell you, brudders and sistern, disain't gwine to do, nohow. De good Lord will nebber bless de stingy giver, suah. You needn't be afeerd to give because de Lord will return de amount wid interest. Why, brudders and sistern, a little while ago de Lord called on me to give somethin' to his cause, and I freely gib de last 'shinny' dat I had, bekase I knowed it would come back to me. And suah enough, about a week after, I bought a pair ob shoes on Main Street, and de man *gib me ninety cents too much change!*—Praise de Lord for his goodness!

The Population of the Globe.
On the globe there are 1,288,000,000 of souls, of which
360,000,000 are of the Caucassian race.
552,000,000 of the Mongol race.
190,000,000 of the Ethiopian race.
176,000,000 of the Maylay race.
1,000,000 are of the Indo-American race.

There are 3,642 languages spoken, and 1,000 different religions.

The yearly mortality of the globe is 333,333,333 persons. This is at the rate of 91,554 per day, 3,730 per hour, 62 per minute. So each pulsation of the heart marks the decease of some human creature.

The average of human life is 23 years.

One-fourth of the population dies at or before the age of seven years.

One-half at or before 17 years.

Among 10,000 persons one arrives at the age of 100 years, one in 500 attains the age of 90, and one in 100 lives to the age of 60.

Married men live longer than single ones.

In 1,000 persons 95 marry, and more marriages occur in June and in December than in any other two months of the year.

One-eighth of the whole population is military.

Professions exercise a great influence on longevity. In 1,000 individuals who arrive at the age of 70 years, 42 are priests, orators or public speakers; 40 are agriculturists, 33 are workmen, 32 are soldiers or military employees, 29 advocates or engineers, 27 professors and 24 doctors.

Those who devote their lives to the prolongation of that of others die the soonest.

There are 336,000,000 Christians.
There are 5,000,000 Israelites.
There are 60,000,000 Asiatic religionists.
There are 190,000,000 Mohammedans.
There are 300,000,000 Pagans.
In the Christian Churches:
170,000,000 profess the Roman Catholic faith.
75,000,000 profess the Greek faith
80,000,000 profess the Protestant faith.

A colored cook, expecting company of her own kind, was at a loss how to entertain her friends. Her mistress said:

"Polly, you must make an apology."

"La, Missis, how can I make it?—Got no apples, no eggs, no butter, no nuffin to make it wid."
