The annual meeting of the Ohio State Horticultural Society will be held at the Court House in Chillicothe, on Wednesday, Thursday, and Friday of this week.

Our senior editor, Mr. J. L. Boardman, and his daughter Alice, visited Dayton yesterday, to attend the Ohio Editorial Association. They will not go on the trip South, on account of his impaired eyesight.

Thanksgiving and a goodly supply of job work interfered with the News of this week, but our country relatives made the silver lining of the cloud all right. We meet them half way all the time, and are glad to know they had plenty of turkey last week. Col. Peard and bride arrived here last Friday evening from their bridal trip to the South and other points, and are the guests of Miss Emily Grand-Girard at the Institute. The bride is the daughter of Mr. and Mrs. Dan Koch, of South High street. The church was filled with friends to witness the impressive ceremonies which lasted two happy hours together. After the wedding a reception was held at the residence of the bride's parents, where the happy couple received the congratulations of their many friends.

WORK OF THE FIRE FIEND.

MRS. MARY PICKERING BURNED TO DEATH NEAR LEXINGTON. Jud. Woodmansee's Residence Burned to the Ground, and A Little Child of Lewis Miles' Burned to Death near Russell Station.

On Tuesday morning of last week, near Lexington, Mrs. Mary Pickering, mother of J. K. Pickering, met with a horrible death by fire. She was in her 92nd year, and very feeble. Mr. Pickering, while in his barn on that morning, smelled something burning, and immediately ran to the house, and into his mother's room, where he found her lying on the floor with her clothes all around her, and the chair, on which she usually sat, also on fire. The old lady's body about the knees was burned almost to a crisp, and she breathed only twice after found. The female members of the household were in other parts of the house at the time, attending to their morning work. She was in the habit of continuing to talk to the fire, and it is supposed that while so doing, her clothing caught fire, and on account of her advanced age, she was frightened to alarm the other members of the house, or to put the fire out. The neighbors were soon notified of the sad calamity, and rendered all assistance necessary.

BOARD OF SCHOOL EXAMINERS.

List of the Questions Proposed Saturday, December 2, 1882. What is the rate of interest when a 30-day note is discounted at 6 per cent. per annum? What is the rate of discount when a 60-day note yields 4 per cent. per annum?

A distiller sold his whiskey, losing 4 per cent., keeping \$18 of the proceeds, he gave the remainder to an agent to buy rye at 8 per cent. commission. He lost in all \$33.75. A grocer, at one straight out, took off a piece of a whole cheese, which had a mark of the circumference and weighed 3 lbs. What did the whole cheese weigh? I want an article for 90 per cent. gain, had it cost me \$300 more, I would have had 20 per cent. cost? A and B pay \$1.75 for a quart of varnish and 10 cts for the bottle, A contributing \$1 and B the remainder. They divide the varnish equally and A keeps the bottle. How do they settle? A man and a boy can mow a field in 8 days; if the boy rests 2 1/2 days, it takes them 11 1/2 days to do it. In what time can each do it alone? If 3 boys do a work in 7 days, how long will it take a man to do it who works 4 1/2 times as fast as a boy? A owns 2 1/2 per cent. stocks at 10 per cent. Below par, the income from the former is 400 per cent. more than from the later, and the difference between the two investments is \$14,000. What is the whole investment and whole income? \$18,000 and \$900.

C. C. Norton left on Thursday last for a few days visit among relatives at Logan, Ohio. Dal Edrick and H. H. Miller were in Cincinnati on Monday. We learn their visit was to purchase the Cincinnati Stock Yards, but can not vouch for the truthfulness of the report. Miss Cora Annett gave a large party for her numerous friends on Friday evening of last week, at her home, about three miles southwest of town. There were present over twenty couples, who report having a good time. When the telephone line to Hillsboro is completed, it will be an excellent idea to run a loop to the Marietta depot so that the line could be used at night should occasion require? A night operator is regularly employed at that office. The ladies of the First Presbyterian Church of this place, on Friday last, sent a valuable box of clothing, consisting of scarfs, socks, gloves, handkerchiefs, &c., to the possession of the missionaries at the above named place, and the contents will be distributed among the Indians in that vicinity. One of the company was in town on Thursday, having walked up from Chillicothe, and reported walking up with ease. Mr. and Mrs. Jesse Robbins were very agreeably surprised on Thanksgiving day, on returning home from church, to find their home filled with friends and relatives to the number of nearly fifty who had passed the day in their company, created a large table capable of accommodating the number, and filled it with good things for dinner. Spring and H. E. Spring, the former editor and proprietor of the Chief, have requested them to name a day of the week for the celebration of the anniversary of the Chief. That under the Spring management, the Chief was well and ably conducted is a fact which is known to all who are conversant with the history of the paper. It is a matter of course that the friends of the Chief, who were present at the celebration, were very much pleased to see the Chief under the management of two friends and less enemies, than most persons who have conducted a newspaper for so many years. Mr. Chase, formerly of Hillsboro, but who for the past year has occupied the position of bookkeeper in the firm of W. H. Bell and Sons, of this place, met with quite a serious accident this morning, and one that will lay him up for some time. The snow, though not completely overcast with joy, and very happy. Mrs. Wm. What has become of Baby Waddell? Now that the papers have Harry D. Waddell settled in the Wickertown property and also in the Bowser house, and his wife in the First National Bank and also in the same money store, we rise to inquire, what has become of the baby? That little Waddell, even if he can not waddle yet, is not to be left in the cold if the News can get him in. Now you see the dilemma we are in by those telephone poles not arriving on time, in consequence of which, Bro. Cooper, we can not telephone Wilmington to tell us how the baby is getting on. But we will tell you what we heard by the Wilmington Journal: H. D. Waddell, of Hillsboro, entered upon his duties in the First National Bank, of this place, last week. Mr. Waddell comes from a family long and well known in the newspapers of his native town. He is a young gentleman who can not fail to be more popular, not only as a business man, but also socially. We are glad to welcome him to our town. Now, Mr. Vernon, please inform our distinguished town where that baby is. We know that it left here three weeks ago, but—

THE TRANSIT OF VENUS TO-DAY. She will move, with astronomical precision, between the hours of 8.30 a. m. and 2.30 p. m., to-day, across the sun's disc, and then we will know, perhaps, whether we are 700,000, 900,000, or 96,000,000 miles from the sun. A few miles don't make much difference, but there is something like knowing for certain. We will not issue an extra on the subject, as it will take our astronomer too long to make out our figures. Miss Venus will do it again in 123 years, but we will make a transit ourselves before then. Let us have an extra contact for Cincinnati will be 8 o'clock and 36m. in the morning. At 8h. 47m. Venus will be wholly on the face of the sun. This last phase is the important one. The corresponding time for the return is 9h. 5m. At 2h. 30m. Venus disappears. If the weather is good, Venus may easily be seen with the naked eye. Use a piece of smoked glass. The planet will appear as a black spot about one-third of the sun's diameter, and will first touch the sun very near the lowest point. It will pass obliquely upwards, cutting off about one-eighth of the diameter of the sun. If one reckons that the sun is apparently fifteen inches in diameter, then Venus will be half an inch, although it is at least seven thousand five hundred miles, and is twenty-four million miles from the earth.
