Nobody.

The tallest trees are the most fiercely assailed by the winds. The most shining mark is oftenest hit by the arrow. The best man is the greatest object of hate by Satan and his emissaries. Some writer, we know not whom, has versified this sentiment, as follows:

If nobody's noticed you, you must be small,
If nobody's slighted you, you must be tall;
If nobody's bowed to you, you must be low;
If nobody's kissed you, you're ugly, we know;
If nobody's envied you, you're a poor elf;
If nobody's flattered you, flatter yourself;
If nobody's cheated you, you are a knave;
If nobody's hated you, you are a slave;
If nobody's called you a fool to your face;
Somebody's wished for your back in its place;
If nobody's called you a tyrant or scold,
Somebody thinks you a spiritless mould;
If nobody knows of your faults but a friend,
Nobody will miss of them at the world's end;
If nobody clings to your purse like a fawn,
Nobody'll run like a hound when it's gone;
If nobody's eaten his bread from your store,
Nobody'll call you a miserly bore;
If nobody's slandered you—here is our pen—
Sign yourself Nonody, as soon as you can.

WASTE NOT.

"Why do you waste that biscuit?" said a gentleman to a young lad who was busily employed in breaking up a fresh roll, and moulding the pieces between his thumb and finger, into different shapes. The boy hung his head and was about to leave the table, when the gentleman taking him kindly by the arm, said, "See here, I want to tell you a circumstance which occurred on board my whaling ship, a few years ago; and which made such an impression on my mind that I can never endure to see a crumb of food wasted.

"A few years ago, when I was in New Bedford, preparing for my last whaling cruise, my aunt came to me requesting that I would take her son, a very interesting boy of about fourteen years, to sea with me.

"'It will be very hard for me to part with Willie,' said the mother, 'for he is all I have; but his health is so poor, and he is so delicate, that I fear to keep him at home, lest I lose him by death. Had his father lived he would have taken him to sea long before this time'

"I readily consented to the mother's request, and Willie's health improved daily; and his amiable disposition made him a favorite with all on board.

We had been out nearly three years, and would with two or three more whales, have completed our cargo. Willie was now able to engage in whaling. One day it had been unusually dull; towards night the man on the lookout cried—

"'A whale! a whale!'"

"I went and looking in the direction indicated, saw a large whale making for us. It was too late in the day for us to entertain the hope of capturing her, so I ordered the ship to be put about,' well knowing that a whale will not attack a vessel under ordinary circumstances.—Having seen my orders obeyed, I went below deck, where Willie and some more of my companions were whiling away the time by song and jest; when, suddenly, something struck our ship with such force that every timber quivered.—A loud cry from the men on deck; and ere we had time to think, we recived another shock, and the water came rushing in upon upon us.

"'To the boats, to the boats,' I cried.

"In less time than I can tell it to you, the boats were lowered; and snatching such articles as lay in our way, we embarked in them.

"Scarcely had the last man left the wreck ere our gallant ship went down. The whale, I think, must have been maddened by other pursuers, and wreaked her vengeance upon us. The boat in which it was my lot to be cast contained some ten persons, among whom was my young friend Willie. Our hope was that we might fall in with some whaling vessel, and by it be secured. Our stock of provisions was very small, and from the first was dealt out in rations, with great care, that one should not have a crumb more than another. When the fifth day dawned we had not one particle of food, and the little that we had eaten for the few days previous had been far from sufficient to satisfy the craving of hunger, to say nothing of keeping up the strength of men who were toiling at the oars day and night. The small jug of water that we had with us was nearly exhausted, and yet no friendly sail hove in sight. As far as our eyes could reach there was nothing to be seen save the sky above and the sea beneath; and yet we toiled on, hoping that each succeeding morn would reveal to us a sail.

"But no! the tenth day dawned, yet no land had been discovered; hope had nearly deserted us. The men were frantic and clamorous for food. One had suddenly threw himself overboard, preferring drowning to the lingering death of starvation; and the sea, like some huge monster, opened her insatiate jaws and swallowed him. Now the men whispered to one another, and their eyes glared like maniacs.—At last, one bolder than the rest, spoke out.

"'There is no denying the fact, starvation stares us in the face. To longer go without food is impossible. I propose that we shall cast lots to see who shall die first, and by the sacrifice of one, perhaps save many.'

"For a moment death-like stillnes hung over the little boat; and nothing but the convulsive tremor of the oars in the water betrayed that those fearful words had been heard. At length the oars resumed their usual beat, and the proposal was seconded by another, and assented to by all. The lots were soon cast—alas, that I should live to tell! the lot fell upon Willie.—And now the question arose. Who shall slay him? No one was willing to do the dreadful deed, and yet they were dying for food.

"'We can cast lots to see who shall do it,' at last spoke out one of the most ferocious of the crew.

"No sooner proposed than done; and the lot fell upon *me*.

"'I will not do it,' I cried; 'I will give myself up in his stead. He is the only son of his mother, and she is a widow.'

"'The lot fell upon *him*,' was the reply, 'and if you won't kill him some one else must. We will cast lots again.'

"'Twas done, and this time the lot fell upon a burly sailor.

"'How shall I do it?' said he.

"As a pistol was produced by one of the men, it was agreed to shoot him. All this time Willie had been pulling at the oar; he now asked for some one to take his place, which being done he moved along to the stern of the boat, when, turning his back to us, and lifting his tarpaulin from his head, he knelt in prayer for a few moments. Then rising, he appoached me, and taking my hand, said—

"'Captain, if ever you reach home, remember my poor mother. Say to her Willie was ready to die, but never let her know the real circumstances of my death.'

"Then turning to his comrades, he said—

"'Comrades, I am ready.'

"A neckerchief of one of the men served to tie his hands. He took his place in the bow of the boat. I turned my back and leaned over the boat side. The sharp report of a pistol, and Willie was no more. Thank God, he did not linger.

"The men seemed fearful at first, to eat that which they had so coveted; but hunger soon compelled them to partake. They ate sparingly at first, then ravenously. I did not partake; *I could not*.

"Four days after this, near sunset, we thought we discovered a dark spot upon the water. It might be a vessel; every nerve was strained to reach it. It proved to be an English whaler, and the Captain most humanely took us on board, and done everything he could for our relief and comfort.

"When the little boat which had been our home for fourteen days was hoisted along side, some of Willie's remains were yet to be seen; and the good Captain gave orders to have them gathered, and prepared for burial. It did not take long to fold them in a sheet, nor long to sew them in the canvas—which is the sailor's coffin. His comrades with such of the whaler's crew as could be spared from duty, gathered round his remains, and the Captain, reading that most impressive service, from the book of Common Prayer,' 'committed his body to the deep.'

"Never, since that time," said the gentleman, "do I see a well spread table but I think of those poor famishing men. Never do I see a *crumb* wasted but the sweet, pale face of Willie rises before me.

"Many mouths afterwards, when I reached my home, Willie's mother hastened to me to enquire, with anxious heart, after her dear boy. I could not tell her all, and left her with the impression that he was lost on the wreck."

State Fair Items.

—The State Fair commences on Tuesday, the 14th of September, and continues four days.—From present indications it will surpass in stock and attendance all the previous Fairs.—Nearly one hundred choice Shorthorns are already registered for competition. Several entire herds from south of the National Road will be on exhibition.

—It not unfrequently happens that persons attending the State Fair do not receive the benefit of the half fare regutation, because they neglect to purchase the ticket from the regular agent at the Station where they take the cars.

—The principal hotels in Sandusky are West's new hotel—a first class one just opened—St. Lawrence, Townsend, and Verandah.—There are some fifteen or sixteen other hotels in the city. A number of elegant steamers will lie in the Bay during *State Fair week*, to act in the capacity of hotels, and to make pleasure trips among the Islands. The "*Island Queen*, and perhaps other small steamers, will ply between Sandusky and Kelly's Island daily.—"Any quantity" of small sail vessels can be chartered for trips to Cedar Point, Bull's Island, Plaster Beds, Port Clinton, Marblehead &c., &c.

—A new feature in the ensuing State Fair will be the exhibition of some splendid specimens of Lake Superior minerals, Ohio fresh water shells, some marine shells from California, &c., &c.

—Entries may be made up to one o'clock, P. M., on Tuesday the 14th of September. Horses and cattle only to be published in a catalogue were limited to the 25th of August.

—Sandusky City has been thoroughly canvassed, and a committie of reception appointed, whose duty it will be to direct visitors to places where boarding and lodging may be obtained. Some member of this committee will be at each depot on the arrival of trains.

—Among the stock on exhibition at the State Fair will be the imported *Draft Stallion Defiance*, that sold under the hammer last December for $2,850, together with several other horses and a Norman mare of same importation.—We learn that "*Bonnie Scotland*," owned by Messrs. Reber & Kutz, will also be on hand.

—Editors and other invited guests will report themselves at the Secretary's office, to register their names, and receive a ticket conferring on them all the privileges of the grounds.—Paper, pens, ink, &c., &c., will be found in the Editor's Department on the grounds.

—Stock and heavy articles should be shipped *the week previous to the Fair*, because the freight trains will be withdrawn from the roads terminating in Sandusky during the State Fair.—*Ohio Farmer*.

Railway Matters.

There are, in different parts of the world, now open to the exigencies of trade and travel about 9,000 miles, and the rest of Europe about 21,000 miles, leaving to the United States and Canada about 25,000 miles.

Great Britain has expended for her railway system no less than $1,565,000,000, or about $72 for each inhabitant. Some idea of the immensity of this vast system of trade and travel-locomotion may be gleaned by the following statements: If all the engines in use in Great Britain be supposed to be concentrated into one engine, which should have run twelve months, it would have passed over 80,000,000 of miles, which, if the engine had only made 30 miles per hour, would have required no less than three years, moving night and day. Not less than two and a half miles of railway are constantly covered by trains. To control the motion of these there are required no less than 5,000 locomotive-engines. The total number of cars is not less than 150,000. Admitting the average length to be twenty feet, and if these trains were linked together, the whole would cover the New York and Erie railroad from end to end, and leave enough spare cars to cover the road from Cincinnati to Hamilton—some 500 miles in all. One hundred and eleven millions of passengers pass over these roads during the year at an average distance of twelve miles each, or for one man 1,332,000,000 miles, or enough to carry a man to the sun and back no less than seven times every year. To the people of Great Britain there is thus saved, in the time of travel, no less than 38,000 years every twelve months, and in money, at a fair rate, $11,400,000, or nearly ten per cent, on the $1,565,000,000—capital employed.

RAILWAY INTEREST.

The average interest paid to English shareholders is 3.5 per cent.: Scotland, 2.7 per cent.: while in Ireland the dividend is annually 4 per cent. In the United States we have one road that pays 22 per cent.: several from 10 to 20 per cent.: ten paying 10 per cent.: fifteen paying 6 per cent., and one which only pays 2½ per cent. It would thus seem that American railway stocks are more profitable than English stocks.

LONG ROADS AND SHORT.

The longest road in the United States is the New York Central, 556 miles. The total expenditure on this road until completed, was $30,000,000. It pays a dividend of 8 per cent. The shortest road is the Erie and North-east (on the authority of Hunt's Merchant's Magazine—but we believe the Petersburg and City Point road is ten miles shorter,) viz., 20 miles. The cost and equipment of this road was $750,000, and its last dividend was 10 per cent. The largest dividend made by any road in this country, is by the Galena and Chicago—viz., 22 per cent.; and the smallest by the Raleigh and Gaston road, in North Carolina.

The railroad debt of this country is enormous; and we sustain this assertion by the fact that twenty companies have contracted a debt of full *two hundred millions of dollars*! We fear this debt will long continue to cripple our roads.

RAILROAD ACCIDENTS.

In Great Britain the number of accidents is very small, simply because the roads are well built, and in cautious hands. On an average only one passenger is killed for 5,200,000 conveyed. In the United States we have more accidents, and generally attended with a greater loss of life—because our roads are not so well built, the country is more uneven, and the conductors less cautious. Besides, we have a greater variety of natural obstacles to contend against, as frosts, ice, falling timber, etc.

—The farmers of Clover Hill, Chesterfield county, Va., deplore sadly the lack of rain in that section, where not a shower of two minutes duration has fallen for ninety days. Within a radius of five miles of Clover Hill, every corn field is completely burnt up, many having been scorched by the raging sun of June, when scarcely of one-third growth.

A GOOD TEXT BUT NOT OF THE BIBLE.—That was a strikingly intelligent person, who called upon a sign-painter to have a Sunday School procession banner, and said: "we're going' to have a tearin' time with our Fourth o'July Sunday School celebration, and our folks wants a banner." "Well," naturally enough responded the painter, "you *ought* to have one. What will you have painted on it?" "Wal, I d'n know; we ort to hev a text o' skripter painted onto it for a motto, hadn't we?" "Yes; that's a very good idea; what shall it be?" "Wal, I thought *this* would be about as good as any;" "*Be sure you're right then go ahead!*"

DR. MORSE'S INDIAN ROOT PILLS.

MORSE'S INDIAN ROOT PILLS.
CAUTION.

Merchants and traders will be on their guard and not be imposed upon by a Counterfeit of Morse's Indian Root Pills, signed *A. B. Moore*. All genuine Indian Root Pills have the name and signature of *A. J. White & Co.* on each box.

DR. MORSE, the inventor of MORSE'S INDIAN ROOT PILLS, has spent the greater part of his life in traveling, having visited Europe, Asia and Africa as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Moore was the first man to establish the fact that all diseases arise from IMPURITY OF THE BLOOD—that our strength, health and life depended upon this vital fluid. A. J. WHITE & CO
59 Leonard Street, N Y

DR. MORSE, the inventor of *MORSE'S INDIAN ROOT PILLS*, has spent the greater part of his life in traveling, having visited Europe, Asia, and Africa as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY OF THE BLOOD—that our strength, health and life depended upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted and diseased; thus causing all pains, sickness and distress of every name: our strength is exhausted, our health we are deprived of, and it nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and thus our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's garden, for the health and recovery of diseased man. One of the roots from which these Pills are made is a Sudorific, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectorant, that opens and uncloges the passage of the lungs, and thus, in a soothing manner, performs its duty by throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives ease and double strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out bountifully by the urinary or water passage, and which could not have been discharged in any other way.—The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, It is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become united with the blood, for they find way to every part, and completely rout out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfectly healthy; consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and clear.

The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts, and which will open the natural passages for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are litterally overflowing with the corrupted mass; thus undergoing disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the body by disease. Mr. Morse's PILLS have added to themselves victory upon victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely surprised, in witnessing their charming effects. Not only do they give immediate ease and strength, and take away all sickness, pain and anguish, but they at once go to work at the foundation of the disease, which is the blood. Therefore it will be shown, especially by those who use these Pills, that they will so cleanse and purify, that disease—that deadly enemy—will take its flight, and the flush of youth and beauty will again return, and the prospect of a long and happy life will cherish and brighten your days.

CAUTION.—Beware of a counterfeit signed A. B. MOORE. All genuine have tha name of A. J. WHITE & Co. on each box. Also the signature of *A. J. White & Co.* All others are spurious.
A. J. WHITE & CO., *Sole Proprietors*,
59 Leonard Street, New York.

Dr. Morse's Indian Root Pills are sold by all dealers in Medicines.

Agents wanted in every town, village and hamlet in the land. Parties desiring the agency will address as above for terms.

Price 25 cents per box, five boxes will be sent on receipt of $1, postage paid.

December 24, 1857.—32ly.

SINGER'S SEWING MACHINES.

IN all the leading branches of manufacturing industry the great practical superiority of Singer's Sewing Machines is a fact established beyond dispute. No tailor, shoe manufacturer, clothier, seamstress, dress-maker, saddler, carriage trimmer, hat manufacturer, &c., &c., can afford to do without them.

One Thousand Dollars a Year

Is only a fair average of the actual profit from the use of each one of these Machines, and, for confirmation of this truth, we refer to any one of the thousands of persons who use them. They are adapted to every sort of work, fine or coarse, upon silk, cotton, linen and woolen fabrics, also light and heavy leather. They never fail to give entire satisfaction.

To meet the growing demand for a smaller and more elegant machine for private household purposes, we have just produced, and are ready to receive orders for

Singer's New Family Sewing Machine,

Which is the most compact and beautiful Sewing Machine ever constructed. It is ornamented in the highest style of art, and all who see it are delighted with it. It makes the improved interlocked stitch, and is capable of doing a greater variety of work in better style than any other Sewing Machine ever offered for family purposes.

It is not subject to the objection of using twice too much thread, and making a raveling seam, like the Grover & Baker; nor is it confined in its operation to a few thin fabrics, liable to get out of order, and unfitted to use flax thread, like the Wheeler & Wilson Machine; but is amply sufficient to perform all kinds of family sewing.

Price of Family Machine with iron table complete for use, $100. The larger standard machines, from $125 to $200. Send for I. M. Singer & Co.'s Gazette, a beautiful pictorial paper, devoted to Sewing Machines, and containing list of prices, and all other information on the subject. It will be forwarded gratis.

THE GREATEST
MEDICAL DISCOVERY
OF THE AGE.

MR. KENNEDY, of Roxbury, has discovered in one of our common pasture weeds a remedy that cures

EVERY KIND OF HUMOR,
from
The worst Scrofula down to a common Pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases, (both thunder humor.) He has now in his possession over one hundred certificates of its value, all within twenty miles of Boston.

Two bottles are warranted to cure a nursing sore mouth.

One to three bottles will cure the worst kind of Pimples on the face.

Two or three bottles will clear the system of biles.

Two bottles are warranted to cure the worst canker in the mouth or stomach.

Three to five bottles are warranted to cure the worst kind of Erysipelas.

One to two bottles are warranted to cure all humor in the Eyes.

Two bottles are warranted to cure running of the ears and blotches among the hair.

Four to Six bottles are warranted to cure corrupt and running ulcers.

One bottle will cure scaly eruption of the skin.

Two or three bottles are warranted to cure the worst kind of ringworm.

Two or three bottles are warranted to cure the most desperate case of rheumatism.

Three to four bottles are warranted to cure Salt-Rheum.

Five to eight bottles will cure the worst case of scrofula.

A benefit is always experienced from the first bottle and a perfect cure is warranted when the above quantity is taken.

ROXBURY, MASS.

Dear Madam,—The reputation of the Medical Discovery, in curing all kind of humors, is so well established by the unanimous voice of all who have ever used it, that I need not say anything on the subject, as the most skillful physicians and the most careful Druggists in the country are unanimous in its praise.

In presenting the Medical Discovery to your notice, I do it with a full knowledge of its curative power, in relieving all, and curing most of those diseases to which you are unfortunately so liable. That most excruciating disease to an affectionate mother,

NURSING SORE MOUTH,

Is cured as if by a miracle; your own temper is restored to is natural sweetness, and your babe from short and frctful naps to calm and sweet slumbers; and the Medical Discovery becomes a fountain of blessing to your husband and household.

In the more advanced stages of

CANKER

it extends to the stomach, causing

DYSPEPSIA,

which is nothing but canker on the stomach; then to intestines and

KIDNEYS,

creating a sinking, gone feeling, and an indifference even to the cares of your family.

Your stomach is

RAW AND INFLAMED,

your food distresses you, and you can only take certain kinds, and even of that your system does not get half the nourishment it contains as the acrimonious fluid of the canker eats it up; then your complexion loses its bloom and becomes sallow or greenish, and your best day is gone. For want of nourishment your system becomes loose and flabby, and the fibres of your body become relaxed. Then follow a train of diseases which the Medical Discovery is peculiarly adapted to

CURE;

Palpitation of the heart, pain in the side, weakness of the spine and small of the back, pain of the hip joint when you retire, irregularity of the bowels, and also, that most excruciating of diseases, the

PILES.

How many thousands of poor women are suffering from this disease and pining away a miserable life, and their next door neighbor does not know the cause. I wish to impress on your mind that good old proverb, "An ounce of prevention is better than a pound o cure." In the

MEDICAL DISCOVERY

you have both the preventative and the cure, with this great and good quality, that it will never, under any circumstances, do you any injury.

No change of diet ever necessary—eat the best you can get and enough of it.

DIRECTION FOR USE.—Adults one table spoonful per day—Children over ten years dessert spoonful—Children from five to eight years, tea spoonful. As no directions can be applicable to all constitutions, take sufficient to operate on the bowels twice a day.

Yours truly,
DONALD KENNEDY.

Price $1.00 per bottle. For sale by PECK & HAMILTON, Perrysburg; H. BURRITT, Maumee; and by Druggists Generally.

Greatest Discovery of the Age.

IMPORTANT TO
TOBACCO CHEWERS!!
DR. GUSTAVUS LINNARD'S
TASTE RESTORATIVE TROCHES,
The Great Substitute for Tobacco.

It is a well known and incontrovertable fact that the inordinate use of Tobacco is the promoting cause of the most severe

MENTAL AND PHYSICAL DISORDERS

to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain narcotic properties most insidious in their effects, which, by entering into the blood derange the functions and operations of the Heart, causing many to suppose they are troubled with a chronic affection of that organ.

TOBACCO affects also the entire nervous system, manifesting itself—as all who have ever used the noxious weed will bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dyspepsia, and many other disorders of a similar character.

THE TASTE RESTORATIVE TROCHES

Are designed to counteract these baneful influences and have proved completely successful in a multitude of cases, and wherever used. Being harmless in themselves they exert a beneficial effect upon the entire system, restoring the Taste which has become vitiated by great indulgence, completely removing the irritation and accompanying tickling sensation of the Throat—which are always consequent upon abstaining from the use of Tobacco, and by giving a healthy tone to the Stomach, invigorate the whole system.

NO EXCUSE

Need henceforth ever be made by TOBACCO CHEWERS that there exists no perfect substitute or relief for their cravings and unpleasant feelings, when attempting to break off from the use of Tobacco, as the TROCHES or Lozengers are warranted to aerform all such offices. They are put up in a convenient and portable style at 50 Cents per Box and can be had of all respectable Druggists. A liberal discount to the trade.

Prepared solely by the undersigned to whom all orders should be addressed.

James E. Bovee, Druggist.
Cor. 24 and Race sts., Philadelphia.
March 25, 1858—46ly

Howard Association.
PHILADELPHIA.

A Benevolent Institution, established by special endowment for the relief of the sick and distressed, afflicted with Virulent and Epidemic Diseases.

TO all persons afflicted with Sexual Diseases, such as *Spermatorrhœa, Seminal Weakness, Impotence, Gonorrhœa, Gleet, Syphilis, the Vice of Onanism, or Self Abuse, &c., &c.*

The *Howard Association*, in view of the awful destruction of human life, caused by Sexual diseases, and the deceptions practiced upon the unfortunate victims of such diseases by Quacks, several years ago directed their Consulting Surgeon, as a CHARITABLE ACT worthy of their name, to open a Dyspensary for the treatment of this class of diseases, in all their forms, and to give *Medical Aid Gratis*, to all who apply by letter, with a description of their condition, (age, occupation, habits of life, &c.,) and in cases of extreme poverty, to *Furnish Medicine Free of Charge*. It is needless to add that the Association commands the highest Medical skill of the age, and will furnish the most approved modern treatment.

The Directors, on a review of the past, feel assured that their labors in this sphere of benevolent effort, have been of great benefit to the afflicted, especially to the young, and they have resolved to devote themselves with renewed zeal, to this very important but much despised cause.

Just published by the Association, a Report on Spermatorrhœa, or Seminal Weakness, the Vice of Onanism, Masturbation or Self-Abuse, and other Diseases of the Sexual Organs, by the Consulting Surgeon, which will be sent by mail, (in a sealed letter envellope,) *Free of Charge*, on the receipt of TWO STAMPS for postage.

Address for report or treatment, Dr. George R. Calhoun, Consulting Surgeon, Howard Association, No 2 South Ninth Street, Philadelphia, Pa.

By order of the Directors,
EZRA D. HARTWELL, *Pres't.*
GEO. FAIRCHILD, *Secretary.*
