A Plea for the Publication of the Naval Records

Of the War of the Rebellion Made by Secretary Whitney—An Important Decision Is rendered by the Supreme Court.

CAPITAL DOINGS. WASHINGTON, Jan. 22.—Secretary Whitney yesterday sent a letter to Senator Cameron, chairman of the Committee on Naval Affairs, in which he says: "I have to acknowledge the receipt of your letter of the 18th instant enclosing resolutions of the headquarters commandery of the Military Order of the Legion of the United States, of Des Moines, Ia., in favor of the publication of the naval records of the war of the Rebellion, and desiring to be informed of my opinion on the subject.

"The importance and value of this work are, in my opinion, not open to question. The detailed history of the war is a matter of professional necessity to the navy. It is the only war in modern times in which naval operations, on a great scale, have been carried on. It is the only war in which rams, torpedoes, ironclads and steam blockades have been employed.

"All that is known of naval war to-day dates from the year of 1861. We need the information for building our ships, for training our officers and for administering the navy department—in short, we need it for every branch of naval administration if we want to have an efficient navy. The work should be done at once, and prosecuted to speedy completion.

The Supreme Court of the United States yesterday rendered an opinion in the important patent case of the Bate Refrigerating Company, appellant, vs. George Hammond & Co., appeal from the Circuit Court of the United States for the district of Massachusetts. By statute of the United States it is provided that when a patent is taken out in a foreign country and one subsequently is also secured in this country, the patent shall expire in the United States with the expiration of the patent in the foreign country in which it first runs out.

BOUGHT BY THE VANDERBILTS.

The Hostetter Interests in the Pittsburgh & Lake Erie Railroad Purchased by the Vanderbilts, Giving Them Control of That Line.

Pittsburgh, Jan. 22.—While there was considerable talk yesterday among brokers and bankers in regard to the reported purchase of the Hostetter interests in the Pittsburgh & Lake Erie railroad by the Vanderbilts, there was no special flurry of excitement on account of the rumor, because the Vanderbilts had been practically in possession of the road. President Newell and other officials of the line exercise a typical railroad reticence relating to the subject.

A prominent broker, who is very close to the interested parties, said: "The report is true. I know that the Hostetter interest in the Pittsburgh & Lake Erie railroad was bought by the Vanderbilts last Wednesday. The consideration is known only to a few. This will increase the power of the Vanderbilts, although they controlled the road before, and after their winning the 'trust' suits the power they possessed was ample enough to be dictatorial.

The annual meeting of the Pittsburgh & Lake Erie which is to be held to-day, is principally for the purpose of hearing the reports of the managers and electing a board of directors for the ensuing year.
