With intelligent people? From the many windy and fraudulent advertisements that appear in the papers and from the reading of such we are made to believe that such business houses are selling goods for no profit, less than cost, or selling a special article at a loss and making it up on anything else they may sell, these blowers simply say one thing and mean another, in order in this way, delude the public into their stores and then sell their goods at a large profit by it. If they were honest and not making money in this wise, then they would quit the business at once, naturally.
