EDUCATIONAL WORK TO BE STARTED SOON IN CHINA AND PHILIPPINES

[By Associated Press to The Banner] SHANGHAI, Oct. 20—Following an investigation of the activities of the Rockefeller Foundation in China and the Philippines that was conducted through the summer months by Dr. George E. Vincent, president of the Foundation, it is understood extensions of the educational work in the Far East, particularly in China, will be authorized at the annual meeting of the Rockefeller Foundation in New York in December. Existing medical schools and hospitals at various places in China have been receiving contributions and aid from the Foundation. The two most important enterprises of the organization in China are the Peking Union Medical College, under construction at the Chinese capital, and the Shanghai Medical College, the erection of which is expected to be authorized at the annual meeting. The main purpose of the institution is to train Chinese as practitioners of medicine, according to the standards of American schools of the best class. The development of an indigenous medical profession of a high order and the ultimate transfer of this form of education to Chinese hands are the announced aims of the Foundation in China. Three of the main buildings of the Peking Union Medical college will be opened this fall. The project to build the Shanghai Medical College has been under consideration since 1915, but the difficulty of obtaining materials from abroad has prevented the beginning of building. The Rockefeller Foundation is expected to decide at its December meeting when work will be started on the Shanghai institution. Pending the completion of the new schools, in addition to its other activities the China Medical Board has been granting fellowships and scholarships to medical missionaries for study in the United States and has been aiding native physicians, nurses and students to pursue courses in American schools. The expenditure of the Rockefeller Foundation in China in 1918 exceeded \$2,000,000. In the 300-odd islands of the Sulu Archipelago that are out of touch with the rest of the world a remarkable work has been done by the Rockefeller Foundation. The remote villages along the shores of Mindanao had been inaccessible to medical men until the Foundation placed in service the ship Buisanga. She is of 300 tons burden and is fitted with a modern operating room, a ten-bed hospital ward and a pharmacy. This floating dispensary touches regularly at points on the coasts of Mindanao and the islands of Sulu Archipelago. The vessel works in cooperation with the base hospitals that have been established at Jolo and Zamboanga. By the terms of an agreement the Rockefeller Foundation is to maintain the Buisanga in service for five years after which control of the vessel is to be taken over by the Philippine authorities.

AIR SERVICE LINE GREAT UNDERTAKING

[By Associated Press to The Banner] LONDON, Oct. 20—The proposed Liverpool-Australia and Liverpool-New York air service will be an enormous undertaking. The problem of supplying the necessary dirigible airships is but one of the items to be considered. They cost about \$2,750,000 each to construct. At least six of these huge craft will be necessary to maintain these two services with any degree of regularity. There are also to be considered the problems of suitable landing grounds and mooring-posts; the intention of the Great Northern Aerial syndicate being that aerodromes will be provided at the more important stations while mooring posts will serve as second-class stops or halts. Aerodromes for dirigibles are required only at every 2,000 miles and it is now possible for an airship to be moored to or released from a mooring tower in any wind up to 60 miles an hour; yet the total financial backing considered necessary for such an undertaking is in the neighborhood of \$10,000,000. The mooring out station for airships which is in the form of a high tower enclosing an elevator shaft by which passengers and cargo will be taken up and down from the ground is over 150 feet high. With a revolving head the airship can be rigidly attached to this tower by the nose,

EDUCATIONAL WORK TO BE STARTED SOON IN CHINA AND PHILIPPINES

will ride clear of the ground in all weathers, and be able to swing with the direction of the wind. Each of these towers will be provided with a hauling in which and a rope by which the airship will be hauled up to the mooring post; also a supply base of hydrogen, fuel, and water ballast. meyer's A Wonder, No. 6889A; dam, King's Jumbo Lady, No. 205874, and she by Iowa King, No. 200405A. Weight 500 lbs. or better. Guaranteed to be all right. Good breeder. Large litter. 'Phone Ralph Haas, F-137, Utica. Address, Vannatta R. D. 1. x23
