Local & Miscellaneous.

ASHTABULA, YOUNGSTOWN & PITTSBURGH RAIL ROAD.

On and after Thursday, May 28th, 1875, and until notice trains will run as follows:

Table with columns: P.M. No. 1, P.M. No. 2, Stations, P.M. No. 3, P.M. No. 4. Lists train numbers and routes between Ashtabula, Youngstown, and Pittsburgh.

Local & Miscellaneous.

The new P. Office building goes right ahead and will be included in the course of the present week.

The Post-office and Thier's market are now to be found in the rear of Haskell's store, on Spring street.

The dwelling house of Dr. Hubbard, by the aid of Swet's trucks, has found a place on Park St near the corner of Centre.

McKENZIE, the contractor, had an offer the other day, of \$200 for his large brown team, which was reluctantly accepted, after a hasty agreement to do so.

T. A. DORMAN sold two lots on Auburn st., a new street just opened between Round Head road and Ann street, to James H. CHAPMAN. Consideration \$400.

Mr. BIDDER, has been taking some pains to improve his saloon department, by enlarging his stalls, painting up and otherwise making things more airy and tasteful.

Geo. O. CHAPMAN has purchased the Snedeker place—adjoining that of Geo. NUTTLETON—on North Ridge, for \$3,500, and contemplates moving into town again.

DEST.—Our streets are getting dry and dusty, and with the fresh winds that have been blowing for a day or two past, it is becoming not a little inconvenient and disagreeable.

That new Fisk House going, in the way of intimidation, would answer the purpose of a whole Chinese regiment. It is a terrible affair, and plays very mischievous with one's tympans.

SOCIAL.—The Methodist ladies will give a social at the rooms of their church on this, Friday evening. All are invited and will be heartily welcomed to the pleasant festivity of the occasion.

Tuesday and Wednesday of this week were the most seasonable days of the Spring, and vegetation has hit the impulse more sensibly than at any previous time since the opening of the vernal season.

GILMORE the concert man of Boston, proposes to get up a concert in Chicago on the scale of three hundred performers, which will begin on the 5th of June, with accommodations for 50,000 spectators.

THE Stable property of Wm. BOWMAN, deceased, was disposed of on Wednesday last week, at what was considered fair prices. The Omnibus was bid off by JAMES CARMY at \$400, and the Hack by D. W. GARY at \$170.

ADVERTISING AGENTS.—Those of our readers who have advertising to do in the smart city will find Thos. L. McCALLISTER, dispatch building, 67x69 Fifth Avenue, Pittsburgh, a faithful and honorable person to fill their orders.

A pair of three year olds, this grass, recently purchased, and now in the hands of AUSTIN J. SMITH, are more than ordinary animals. Their weight—2,800—will indicate their size, but their promptness, carriage and action should be seen to be appreciated.

THE statement made last week, that the brick block that is to occupy the old site of McHenry's Row, was to be put up by M. H. & W. C. HASKELL, was not quite correct. Mr. M. H. HASKELL is master of the situation and sole proprietor of the enterprise.

AMONG the many handsome monuments that are to be seen at Chestnut Hill Cemetery is soon to be numbered one of Quincy Grant, to cost \$1,600 which will mark the resting place of the late JOHN E. PARSONS, counsel of the U. S. at Santi Ago de Cuba.

THE awning of the post-office, about which so little solicitude has been felt, was on Monday last, successfully moved, and stands erect against the Spring street side of Haskell's office, an irretrievable confirmation of the truth of the memorable aphorism of the immortal Sam Patch—"that some things can be done as well as others."

SUPERVISOR GIDDINGS whose district embraces the road to the Harbor on the East side has, humanely listened to our entreaties, and gone over the worst parts of the road with a scraper and shaved off the ridges and measurably filled the ruts, rendering an essential service to the public, and made the transit to the lake comparatively easy.

MR. KLEMPER of the East Ashtabula cheese factory informs us that he is working that institution up to its full capacity, making 22 cheeses a day. The necessity of more presses and another vat is an imperative one, and the Company have so far yielded to that necessity as to order these additions. When the cows of the customers of this establishment have all come in, it is expected that they will squeeze the milk of at least one hundred more than last year.

ASHTABULA Co. SUNDAY SCHOOL UNION.—Each Township Vice President who presents the annual Convention—a full report of the condition of the Schools in his township will receive a gold card, 2x2 1/2 inches in size, for his School.

The card has printed on it gold letters, the prayer "God bless our Sunday School." Remember the Convention is to be held at West Andover, and will commence at 1:30 P. M. on Wednesday the 29th inst.

Mr. J. W. SMITH, lady and son arrived on Wednesday last and domiciled themselves for the present, at least, in their old quarters. The block on Centre Street, is now to receive attention, and will probably be pushed forward with steady perseverance.

Mr. I. TERNER, we learn, thinks of building a space adjoining and uniform with the Smith Block. Should he determine to do so, quite a main will be taken up on the block between Main and Park Street.

GOOD COLT.—We noticed on the street, the other day, a dark brown colt, 22 months old, from the Blazing Star Horse, owned by Mr. Curtis of Saybrook, that attracted considerable attention and pleasure. He was of fair size, but one of the most symmetrically formed animals that we have seen. He had what was unusual in a colt of that age, the development in rounded fullness and breadth of breast and hinder parts of a five year old. He was bought last winter by Wm. Nettleton, of St. Paul, for \$200, and is left in the care of Mr. G. R. Scoville, of Saybrook, by whom it was raised.

STRIKE ENDED.—A special dispatch from Youngstown, dated the 20th, says: A large number of the old miners went into the several banks on Monday at Church Hill, Godburg, Brookfield, &c. More went in this morning. About seventy loaded coal cars came down Broadway on the Vienna branch. The strike is ended and miners, storekeepers, business men and citizens generally, appear elated at the event. The last importation of emigrants, which came last week, have left the mines, having been provided for the operators with work on the new railroads and elsewhere.

GRADE.—The fixing of the Grade of the slide walks on Main Street, is a work that our Council should not delay. Parties that are putting up new buildings, should not be subjected to inconvenience and needless expense by going in blind, as they are compelled to in the absence of any data for setting their buildings, in relation to the sidewalk. We understand that the new store of WAITE & STELL, will upon the fixing of the walk in front, to the proposed height, have its floor brought about on a level with that of the walk and perhaps subject the proprietors to the task of raising their building. As the Council have the matter in hand, they will hardly be excused for dropping it until the grade is established.

WITHOUT A SCHEMER.—A good many people, especially that non-complaining class, the agriculturists, are apprehensive we are to be cheated this year out of our average heat and sunshine. We don't believe a word of it. July and August will come along in due time, with their sweetening hot days, oppressive and sleepless nights, and the blizzarding music of the musquito bird. It may be our chilly and ungenial spring-time is a wise preparation to lay in a stock of endurance for the trials of the fiery furnace of later months. The peculiarities of the present season all over the county recall to recollection the dark year described by New England farmers, of 1816—"the year without a summer." Few persons living can recollect it, but it was the coldest and most cheerless summer of which we have accessible information, at least in this country.

BURGLARY.—On Saturday night last, the house of H. E. PARSONS, Esq., was entered by burglars and robbed of money, watches and jewelry, amounting in value to some \$400. The entrance was effected by the use of a sickle found on the premises, with which the bolt of the lock on one of the first story windows was removed. Mr. Parsons being absent, the family had all taken to the upper rooms, so that the lower part of the house was left free for the reconnoitering movements of the depredators, and they seem to have availed themselves of the arrangement. Nearly every room was visited and drawers and other receptacles ransacked. The port-monaie of Mrs. Parsons, with some \$130 of the ladies' society money, was found, and the wallet of Mr. Parsons, containing some \$15 more, was found in that gentleman's office. Beside these amounts in cash, two gold watches of moderate value were taken, and about 100 worth of jewelry. Another watch of considerable value, in the drawers overhauled, was overlooked, and a quantity of table silver was passed over and left. The family were not disturbed, and the robbery only discovered in the morning. Marshal THORNE found three strangers loitering about, one at the station and two in a barn in the neighborhood, and took them into custody and detained them until the Mayor could see and examine them. Nothing appearing against them, they were liberated and the affair remains without a clue or suspicion.

COUNCIL met on Monday evening, present—Mayor, and Councilmen Gilkey, Pierce, Apthorp, Hitchcock and Geopinger. Councilman Pierce officiated as Clero pro tem, in the absence of the regular Clerk, Solicitor Hall, together with Marrai Thorns, Supervisor Fuller, &c., were also present.

Fire and Water committee reported the condition of cisterns, and showed that a large proportion of them—say one-half, were defective and but partially supplied with water. The large one on Main street had but about 4 feet, and that near the Methodist church—two which the sprinkler is supplied—was not showing the abundance of last year.

Committee on sidewalks reported partially in reference to the grade of sidewalks on Main street. Matter deferred.

G. A. Knapp was elected Chief Engineer of Fire Dept. to fill the vacancy occasioned by the resignation of Chief Hitchcock.

A petition of 40 citizens for the observance of the 4th of July, asking the Mayor and Council to take direction of same. Referred to a committee of three—Hitchcock, Faulkner and Apthorp.

Solicitor Hall, to whom was referred the matter of advertising ordinance, &c., reported by resolution, that both papers be employed, and that the old rates of 75 cents a square, and 25 cents for continuance, be accepted, as the proposition of both Telegraph and Citizen—passed.

Petition presented for the vacation of Fisk street, and for the laying out of a new road from that to Centre street. Read and laid up on the table.

Ordinance submitted by Councilman Apthorp, providing for the payment of fines and costs of vagrants and disturbers of the peace, by hard labor upon the roads. Passed over.

Petition of M. H. Haskell for the erection of a flight of iron stairs on the west side of Haskell's block, Spring street, in lieu of a gate to be conveyed to the corporation, running along the east side of that street, of some 4 1/2 feet width at the widest part—near Fuller's stable. After some discussion laid over until due notice by publication be given.

The following bills were presented and approved:

Table with columns: Name, Amount. J. W. Watrous, painting engine house \$ 5 50. J. W. Howe, labor on park. 2. T. A. Dorman, trees for park. 9. J. A. Cook, 86 shade trees. 45. T. S. Faddock, two dog caps. 85 49.

G. Blakelee, repairing pump. 1. George Lewis, work on park. 9. V. Meenel, police. 2. J. Sinclair, police. 2. Mrs Smith, 220 loads of gravel. 32 50. James Merriam, labor on roads. 38. Chas Taylor, road work. 4 50. Fisk, Stillman & Co., gravel. 8 80. Don Kennedy, road work. 5. Thos. McCall, road work. 19. Thos. Downs, road work. 3. Andrew Jackson, road work. 6. Lovjoy, road work. 19. Supervisor Fuller. 129. John Prentice, road work. 39. Eugene Packard, road work. 30. Harvey Dohel, road work. 6. McGarle, road work. 35 50. Loral Warren, road work. 6. J. H. Chapel, police. 2. Wm Trimn r, repairing lock-up. 11 75. James Thorpe, Marshal. 10 25. J. O. Culley. 13 48. J. Eddy, police service. 6. Wm. Kewick, watch—3 months. 100. H. R. Hollis, care of engine. 9 55. Telegraphing bill—Mayor. 1 25. Edward Blakelee, lumber. 48. G. P. Fox, gravel. 1.

The terms of Dr. Farrington and E. A. Hitchcock as members of the Board of Health having expired, Dr. Farrington and James Reed were nominated and elected for the long term of three years.

An early meeting of the Board of Health was asked for by Mr. Geopinger, in reference to steps recently taken for the abatement of his glue factory.

On motion, voted that the sum of \$700 be paid to the Bond for the present year, for turning out with the firemen, playing on the green, &c., and if their services were required on the 4th, an additional sum of \$20.

Adjourned to Monday evening next.

THE BOARD OF HEALTH was called together by Councilman Geopinger on Tuesday afternoon last, and was organized by full numbers—the Board consists of Drs. Farrington, Hubbard and James, Geo. C. Hubbard, Geo. Willard and James Reed, and Edgar Hall, Clerk. The coming together of the Board was not for the purpose of abating any new or recently developed nuisance, but to go over the ground again and consider the character of Geopinger's Glue factory. This old bone of contention has come up again by a movement on the part of the citizens of that neighborhood to see what virtue there is in law, to hold themselves of the stonches that sometimes make their residences very uncomfortable, if not unwholesome, and poisons the stream running by the factory, along its whole length, and rendering its waters unfit for any domestic use or for watering of animals. As was stated last week, an injunction had been served upon the proprietor, and his business stopped. Of course this necessitated some effort at relief from the difficulty, and hence the call for the meeting of the Board. The object, therefore, it will be seen, was in the glue factory interest, not for the purpose of abating a nuisance, but after a pretty thorough cleansing of the premises, to show to the Board that the complaints about these noxious smells, which have come up from that neighborhood every summer for a score of years, are without foundation. The Board of Health, therefore, is sought to be used as evidence that the manufacture of glue, as carried on at this point, in the midst of a thickly settled village, is without objection, and the people of that locality grant and complain without cause or reason. After consulting the law in reference to nuisances, and the powers of Boards of Health, the Board visited the factory, and examined the premises pretty thoroughly, and the stream passing through the premises, and questioned the proprietor about the mode of manufacture and the causes of the complaints made against the business. After which an adjournment was had to Wednesday evening.

The meeting of the Board of Health on Wednesday evening was occupied mainly in the discussion of the subject of nuisances, and what constituted a statutory nuisance, or within the province of a Board of Health. The debate was somewhat irregular, and took a rather wide range. Doctors were found to denigrate animal matter were applicable—injurious to health and life, while Dr. HUBBARD denied it. The discussion, however, was a fruitless one, as every member of the Board seemed to have his opinion made up, not to be changed by any thing that was brought out in the discussion. DAN L. MERRICK was elected Health Officer, without opposition, and Dr. EMMS submitted a paper defining his views upon the matter in hand, which concluded with the following pramble and resolutions. As the Dr. was called away, his vote does not appear in support of these resolutions:

Whereas the Glue Factory of Mr. Geopinger, being in active operation must necessarily poison the atmosphere and the stream on which it is situated, and subject to some extent the health and comfort of that neighborhood and whereas its removal will be attended with considerable trouble and expense—Resolved, that we be changed by any thing that was brought out in the discussion. DAN L. MERRICK was elected Health Officer, without opposition, and Dr. EMMS submitted a paper defining his views upon the matter in hand, which concluded with the following pramble and resolutions. As the Dr. was called away, his vote does not appear in support of these resolutions:

Resolved, that we be changed by any thing that was brought out in the discussion. DAN L. MERRICK was elected Health Officer, without opposition, and Dr. EMMS submitted a paper defining his views upon the matter in hand, which concluded with the following pramble and resolutions. As the Dr. was called away, his vote does not appear in support of these resolutions:

Resolved, that we be changed by any thing that was brought out in the discussion. DAN L. MERRICK was elected Health Officer, without opposition, and Dr. EMMS submitted a paper defining his views upon the matter in hand, which concluded with the following pramble and resolutions. As the Dr. was called away, his vote does not appear in support of these resolutions:
