The New Way to Thresh

The Case way is far more satisfactory, far more economical. A Case Kerosene Tractor, such as the 15-27 pictured above, can be used for belt jobs in addition to traction work. It drives a Case 26x46 Thresher, fully equipped, and other machinery requiring similar power.

This tractor is well designed for belt work. The belt pulley is mounted directly on the crank shaft. It is easy

to "line up" because the pulley and steering gear are on the same side.

Case Threshers have been noted for 76 years for their grain-saving ability, their economy, durability and all round superiority.

To the man selecting either a tractor or a thresher, we would like to have the opportunity to point out Case superiorities.
