**Filterer and Cooler, Combined**

And we say unhesitatingly and advisedly, that it is the only article of the class which has ever been offered to the public that in every way fills our expectation. We sell it at a moderate price. It will run for years without touching. When necessary, can be re-packed in twenty minutes.

Every Family, Store, Manufactory, Hotel, &c., should have, one.

**The Filthiest Water in the World will pass through it,**

And come out icy cool and clear as amber.

Besides its filtering properties, it purifies. It is a well-known fact that lime and other minerals in water are injurious to health, and when the cholera was last in our midst, those who drank rain water were less liable to be attacked and to die by this scourge of man than those who used the impure waters.

The filtering materials used in this patent arrangement (patented by BEST & HOGLEN,) are white sand, animal and vegetable charcoal, &c., and are so combined as to do their duty perfectly.

**SNOW POWDER**

Patented May 29, 1866.

This is an article for washing without rubbing, except in very dirty places, which will require a very slight rub, and unlike other preparations offered for that purpose, WILL NOT ROT THE CLOTHING, but will leave them much WHITER than ordinary methods, without the usual wear and tear.

It removes grease spots as if by magic, and softens the dirt by soaking, so that rinsing will in ordinary cases entirely remove it.

This powder is prepared in accordance with chemical science, and upon a process peculiar to itself, which is secured by Letters Patent. It has been in use for more than a year, and has proved itself an universal favorite wherever it has been used. Among the advantages claimed are the following, viz:

It saves all the expense of soap usually used on cotton and linen goods.

It saves most of the labor of rubbing, and wear and tear.

Also, for cleaning windows it is unsurpassed. With one quarter the time and labor usually required, it imparts a beautiful gloss and lustre, much superior to any other mode. No water required except to moisten the powder.

Directions with each package.

And can be readily appreciated by a single trial. The cost of washing for a family of five or six persons will not exceed THREE CENTS.

The manufacturers of this powder are aware that many useless compounds have been introduced to the public which have rotted the cloth, or failed in removing the dirt, but knowing the intrinsic excellence of this article, they confidently proclaim it as being adapted to meet a demand which has long existed, and which has heretofore remained unsupplied.
