SHAMROCK

"The Irish Queen of the Oil Fields"

The New Electric Power Center of the Great Cushing Oil Field

This is the new town, just starting in the newly developing center of the Great Cushing Field. It is to be the great electric power center from which a great portion of the oil field is to be operated.

New Oil Field Railroad

Hundreds of men and teams are now grading and constructing track for the new Sapulpa & Oil Fields railroad, an electric railroad, which will connect with the Frisco at Dewey.

THREE 40,000,000 FT. GAS WELLS

The greatest gas wells in America are at Shamrock. Three of these wells produce forty million cubic feet of gas each daily.

Power Center of Cushing Field

Gigantic turbine engines will soon be installed in the big new generating plant at Shamrock. The power generated by the cheap natural gas fuel will be sufficient, not only for the new railroad, but for extensions to be built throughout the field.

Big Industrial Possibilities

Big supply houses, machine shops, refineries and other industries are preparing to locate in the new oil center--Shamrock. Enormous gas supply, cheap electric power and unexcelled transportation facilities make Shamrock ideal for all industries.

The New Oil Center

The oil experts have long contended that the Shamrock field is to be the scene of the next great oil development. The drilling of a number of excellent wells, with practically no failures, makes this a certainty.

Get Located at the Start

The new electric railroad will be completed within 60 days. There will be no delay. The complete electrification of the Cushing field from Shamrock will be the ultimate object.
