

### BURIAL PLACE OF COLUMBUS

The city about which center the most speculations and investigations of the discovery of the wooden fragments, Santa Domingo, the capital of the Dominican republic claims the honor of burying the body of the great navigator. It is under whose auspices the search was made which resulted in the discovery of the fragments.

The facts are these: Columbus died at Valladolid, Spain, on the 20th day of May, 1492, and his remains were taken to the Capitanes ministry of Santa Marta, de las Cuevas, Sevilla, where the bones of the second admiral, the son Diego, were kept. The bones of his father were exhumed in 1795 and taken to Havana, Cuba, and buried in the cathedral of that city.

A few days before the treaty of Paris was signed, the bones of Columbus were taken to Havana, Cuba, and buried in the cathedral of that city.

The Dominican version of the discovery of the fragments is that the bones were found in the ruins of the cathedral of Santa Domingo, which was destroyed by an earthquake in 1780.

returned there in November, 1492, he found the fort destroyed. Following the storm thirty miles eastward he founded the city of Isabella and established a mining camp at San Thomas in the gold country of central Hispaniola.

After his third voyage to the new world and the discovery of Trinidad and Puerto Rico, he sailed upon which the forward of a little boat by Dr. John H. Stokes of the famous Mayo hospital of Rochester, Minn., on the subject of venereal diseases and their attendant dangers. He organizes a society, known as the League for the organization of the public health service in the United States, and is instrumental in the passage of the law which provides for a vital register to all municipalities.

Kept Letters as Memento  
The discoverer of a new world, his brother and his son were put in chains and sent back to Spain as prisoners. Despite the offer of the captain of the vessel to remove his father, Christopher refused, saying he would wear them until their hardships of Spain themselves took them off and that he would keep them as a relic and as memento of the reward for his services.

Edward of History  
Florence, Italy, for Santo Domingo and the details of the discovery of the fragments of Columbus were the most closely guarded secrets of the government of that time.

### PREVENTION OF COMMUNICABLE ILLS

No better presentation of the dangers surrounding communicable diseases could be found anywhere than the forward of a little book by Dr. John H. Stokes of the famous Mayo hospital of Rochester, Minn., on the subject of venereal diseases and their attendant dangers. He organizes a society, known as the League for the organization of the public health service in the United States, and is instrumental in the passage of the law which provides for a vital register to all municipalities.

Real Dangers Confront Humanity  
Venereal diseases, syphilis, gonorrhea, and other communicable diseases have become a real danger to humanity. They are not only a source of physical suffering, but they are also a source of social disgrace and economic loss. It is the duty of every citizen to take steps to prevent the spread of these diseases.

which secure humanity need open and wide publicity and educational attention. They need the new scientific method of open discussion. These diseases have crept into our homes, hidden under false modesty and prudery and escaped the attention they deserve from the great thinking public. The United States public health service is waging a campaign against these evils, spending vast sums of money under the direction of the best informed men and physicians in the country to bring about the suppression of these and its attendant, more general diseases. When the public awakens to the real situation and begins to stamp out these evils in dealing with them in the open, then progress and success will become a reality. Quietly and dispassionately examined, they can be easily seen to be no more respectable than other communicable diseases, all enemies of the race. An understanding of them is the more obligatory upon us because these diseases undermine and attack the shield of life itself. The curbing of mysterious words and allusions, of shame-fast silences, of false delicacies concerning and attack the shield of life itself. The curbing of mysterious words and allusions, of shame-fast silences, of false delicacies concerning and attack the shield of life itself.
