Executives going to a conference in their company's Packard. Hundreds of Corporations have standardized on Packard on an economy basis—high mileage per dollar of investment and low running cost over a term of years

Does the Car Buyer Want the Facts

THE late Joseph Choate used to say that lawyers would go out of business if men were not so bent on making the same old mistakes the same old way.

LET a man figure on keeping his Packard from six to ten years—and he has a material saving in investment, as against the car that must be traded in every two or three years.

engine are better balanced than in any other automobile engine. Consequently there is less vibration and less wear on bearings.

No one need—or can—make the old mistakes in selecting his motor car, if he will look for transportation facts instead of "features" and "talking points."

Think of the stability of the Packard design! His Packard always a "new model."

WHEN a man buys a motor car he knows pretty well what sort of transportation he expects it to deliver.

The strong Packard opinion which he finds on every hand does not express itself in technical details or costly luxury—but in such every-day words as economy, comfort, ability and lasting value.

His gasoline mileage will be from nine to thirteen, depending on road conditions. Oil mileage, 700 or more to the gallon.

Economy does not lie in the direction of temporary makeshifts or compromises.

Young man 26 years old, married, possessing college education and four years' business experience, desires to associate himself with a reliable concern.

The steel in his Packard is worth more than twice as much as the steel in the ordinary car.

Packard first-class transportation will give him a definite and permanent advance in his way of traveling.
