It provides for an appropriation of not over \$500,000 for the present fiscal year and \$1,000,000 for each succeeding fiscal year up to and including 1927, or a total of \$5,500,000, to be used in conjunction with federal aid road money and in cooperation with state highway departments for the survey, construction, reconstruction and maintenance of highways on or adjacent to Indian lands not taxed by the state. It provides also that so far as possible the preference shall be given to Indians as laborers on such road work.

This Indian road fund shall be apportioned among the several states in proportion to the area and value of such untaxed Indian lands. It is provided that the government may, wherever possible, reimburse itself from tribal funds of the Indians thus benefited by such roads. This reimbursement may be made by taking from the income of the tribes from 5 to 20 per cent annually until the government shall be paid back in full. This income to Indians comes from timber sales, grazing permits, oil and mining leases and any other tribal resources.
