The new wagon will be christened

Hoyt's "A Bunch of Keys."

At the opera house tonight. Again
we hear the jingle of the "Bunch of
Keys." The dainty and tuneful farce
has yearly toured the country and
never failed to delight the people and
compensate the management. The
management announces a lot of new
and pretty girls, and up-to-date songs
and novelties. The "Bunch of Keys"
never gets rusty and we hope never
will. It is the best farce comedy ever
wrote and Hoyt was the best satirist
and humorist we ever had.

This weather naturally turns our
thoughts toward a comfortable stove
for the winter. We have them ready
for you and every stove in our house
was made for service.

SPEEDY TICKET SELLERS.

The Elevated Railroad Man and the
Circus Man Work Alike.

New York ticket sellers for the ele-
vated roads do their work with a cele-
brity equaled only by the lightning
change artist of a big circus. How do
they manage it? Peep into one of the
little ticket offices, and you will see
that the methods of the man inside
are identical with those of the circus
man. There is only one way of selling
tickets rapidly, whether at an "L" sta-
tion or from the red wagon of a circus.
When you hand in your money through
the little opening, your coin or green-
back goes to the ticket seller's left,
and from that side comes the ticket,
which he tears off from the long strip
with his right hand. Almost simulta-
neously the same hand shoves out your
change, for he has the exact change for
your coin or bill ready, counted out
and piled up. Close to his right hand,
just inside the little window, are a lot
of nickels for changing dimes. Next to
these are nickels and dimes arranged
with 20 cents in each pile, ready for
the man with a quarter. Then there
are a lot of forty-five cent piles and
others containing 95 cents, so he doesn't
need to stop to count out your change.
If you call for two tickets and hand in
a dollar, the ticket seller takes a nickel
from one of the ninety-five cent piles
and instantly has the change that you
require, and whenever there is a lull in
the stream of ticket buyers the man
behind the window replenishes his
piles of change, so that he is seldom
caught without just the amount you
need already counted out for you.—

A Strategist.

He was too old to jump on a moving
car with safety and was handicapped by
a heavy bag of tools slung over his
shoulder. Half a dozen motormen had
disregarded his signals to stop and had
run their cars past the crossing at even
greater speed than that with which
they approached.

The old laborer didn't grumble or
swear. He waited on one rail for the
next car. As it drew near he signaled
the motorman to stop. The power was
increased to run by, as before, and the
old man turned as if to get out of the
way. The heavy tools slipped from
his grasp and fell on the rail. The mo-
torman frantically shut off the power
and set his brake hard. The wheel
was within a yard of the obstruction
when the car stopped. The old man
picked up his bundle and smiled broad-
ly as he climbed on the front platform.
"Think you're smart, don't you?" said
the motorman.

"Much obliged," said the old man,
still grinning. "You're the only accom-
modating motorman I've seen today."

The Wonderful Toad Bone.

All early writers attribute wonderful
qualities to toads and frogs and the
various parts of their bodies. "They
believed, for instance, that if a toad
was brought into the midst of a mob
or other large and unruly concourse of
people "silence would instantly pre-
vail." A small bone found in the
right side of toads "of the proper age"
was also believed to have powers over
the various elements. "By throwing
this bone into a vessel of boiling
water," says Pliny, "it will immedi-
ately cool it, the water refusing to boil
again until the bone has been removed.
To find this bone, expose the dead toad
on an ant hill. When the facts have
eaten her all away except the bones,
take each bone separately and drop it
into boiling water. Thus may the
wondrous toad bone be discovered."

Strange Craft.

A traveler says: "The strangest craft
I have ever seen were the balsas of
Lake Titicaca in Bolivia and Peru.
These balsas are made of an aquatic
plant growing in the waters of the
lake. The principle on which they are
constructed by the Aymaras Indians
proves their ingenuity. A bale of hay
naturally floats in the water, and ac-
cording to the quantity of dried grass
used in constructing the boat do they
control the displacement or carrying
capacity. These boats are likewise fit-
ted with a mast and sail, and in some
instances carry from eight to ten per-
sons. The Indians travel long distances
over this vast inland lake, the surface
of which is on a level with the summit
of the Jungfrau of the Swiss Alps."

Shakespeare's Blunders.

The anachronisms and errors of
Shakespeare are too well known to
require repetition. He speaks of cannon
in the reign of King John a century
and a half before their invention; he
refers to printing in the reign of Henry
II., of clocks in the time of Caesar;
makes Hector quote Aristotle and Cori-
olanus refer to Cato. He introduces a
billiard table into the house of Cleo-
patra, makes Delphos an island and
gives a seacoast to Bohemia.

Cutting the Counselor Short.

"Do you give me credit for wis-
dom?" asked the judge.
"Certainly," replied the lawyer who
had just started on a long winded and
wearying argument.
"Well, just remember," said the
judge, "that a word to the wise is suf-
ficient."—Chicago Post.

Sure to Follow.

"Hello, central!" called the man at
the phone. "Give me the gas office."
"Yes, sir," replied the operator, "but
I must warn you in advance that we
cannot tolerate any bad language over
the wire."—Spare Moments.

house tonight will be all that the lov-
ers of music and good dancing could
expect. The "Bunch of Keys" is well

mer success. Among the special fea-
tures introduced this season will be

RHEUMATISM CURED AT LAST

Good News For All Who Suffer
With Rheumatism Free.

To all who suffer with rheumatism
I will gladly send free the wonderful
story of how my mother was cured
after ten years of suffering, together
with the most elaborate treatise on
rheumatism ever published.

No matter what your form of rheu-
matism is, whether acute, chronic,
muscular, inflammatory, deforming,
sciatic, neuralgia, gout, lumbago, etc.,
no matter how many doctors have
failed in your case—no matter how
many so-called "sure cures" you have
tried—I want you to write me and let
me tell you how mother was cured.

I am neither a doctor nor a profes-
sor—simply a plain man of business—
but I have a CURE for rheumatism,
and I want to tell every one who suf-
fers with rheumatism all about it. I
wish to be very clearly understood,
and I trust that all who are suffering
with this terrible disease, however ap-
parently beyond the reach of cure,
will write to me this day and I will
send you by return mail this work of
mine. I appeal especially to the
"chronically ill" who are wearied and
discouraged with "doctoring" and to
those who have been cast aside as
"incurable." All you have thought
about rheumatism may be wrong. Let
me tell you our experience. Surely, if
you have rheumatism, or have a suf-
fering friend, it will pay you to inves-
tigate my offer, anyway, and prove for
yourself these claims I make.

Send me your address today—a pos-
tal card will do—and I will mail you
this wonderful story. If you have any
friends suffering with rheumatism, no
matter where located, send me their
address, and I will mail them a copy.
My address is VICTOR RAINBOLT,
Bloomfield, Ind.

guessing the nearest the correct
number will receive \$5 in money.
