WHO SHALL JUDGE?

Do you realize that the human eye is the most marvelous, most delicate, most sensitive and most intricate organism of that most wonderful creation--the human body?

Do you realize that, in proportion to its size, it is called upon to perform a greater amount of tedious, continuous, nerve-straining work than any other part of your system?

Are you aware that a vast number of ills are directly traceable to the defects of overstrain of the human eye? That many forms of headache, cerebral troubles, nervous disorders and even insanity itself are caused by errors of refraction or muscular derangement of the eye? No matter how excellent the mechanical work in a pair of glasses, it counts for nothing unless the formula from which the lenses are ground is the correct one for your eyes.

Remember, you are running no risk, taking no chances, when I examine your eyes. I use no drops or drugs of any kind as they are dangerous. My 34 years practical experience as an eye specialist is at your service without extra charge. If glasses are not needed, I positively decline to supply them. I have fitted many thousands of people in Marion and Polk counties and the universal satisfaction which I have given proves that I am worthy of the confidence placed in me.

I change your glasses for one year, if necessary, free of charge. No extra charges for examination. All broken lenses replaced while you wait, at very reasonable prices.
