HEN SHINES AS VICTORY PROPHET

The Hen prophet and her three eggs— from telegraphic description. Galinette, the news comes forth with a hen that lays eggs with pictures on them—a kind of news review.

She laid an egg very plainly engraved with the Stars and Stripes, a V and a circle on it. Before this excitement had died down she added to her wonderful work an egg inscribed with an airplane. The crowning effort came one day later when the third egg was produced with the lines of a battleship on it.

After this the sheriff, W. C. Darbo, was called on the case. By an ingenious method of deduction he translated the egg marks to mean that the Stars and Stripes would be victorious in one year and that Battleships and Airplanes would pay a great part.

OREGON WILL VOTE FOR DRY PROVISION

"Enough pledges have already been given by nominees for the legislature to insure that Oregon will ratify the national prohibition amendment," says Edwin Rawden, of the Oregon Anti-Saloon league who is in the city today. Mr. Rawden says it is merely a matter of whether or not the vote can be made unanimous in the legislature next winter.

Thirteen states have already ratified the dry amendment, five of these states being wet states. It will be necessary for three fourths the states to ratify the amendment to make it effective. Mr. Rawden says there is slight doubt about there being enough to make the amendment effective. He says there is a good chance that California will ratify the amendment.

Signal Corps Sanon Really Took Epieds

(FRED FERGUSON.)
WITH THE AMERICAN ARMY, July 25—It develops that a signal corps Sanon finally captured Epieds. Following terrific American shelling after the Germans' last occupation of the village, a patrol was preparing to enter the place to determine the strength of enemy survivors when a canon rumbled up. THE NASH QUAD

IT STEERS, DRIVES AND BRAKES ON ALL FOUR WHEELS.

Never in the history of the country has the farmer been so short of help with which to move his crops to market.

Never has the price of feed been so high with such justification to dispose of some of his teams and turning to Motor Power.

At the price guaranteed by the Government for wheat this year, a truck will soon pay for itself. Likewise, while it is not in use, it will not be eating up your profits.

An ordinary round trip to market with a load of grain requires all day with the team, while the farmer with a truck can make several trips; have his noon meal at home with his family as an added economy, and make his return trips to the ranch loaded each time with fuel or supplies.

The NASH QUAD with its wonderful power and ease of handling is just what you want to do all of this for you.

A demonstration will convince you.
